

Plat-Dev-210 Valid Practice Questions & Plat-Dev-210 Exam Reference

2026 Latest ExamDiscuss Plat-Dev-210 PDF Dumps and Plat-Dev-210 Exam Engine Free Share: https://drive.google.com/open?id=1T6jf5y1_KEU3qLyg3BZnt1ESNTD7PZwj

We offer money back guarantee if anyone fails but that doesn't happen if one use our Plat-Dev-210 dumps. These Salesforce Plat-Dev-210 exam dumps are authentic and help you in achieving success. Do not lose hope and only focus on your goal if you are using Plat-Dev-210 dumps. It is a package of Plat-Dev-210 braindumps that is prepared by the proficient experts. These Plat-Dev-210 Exam Questions dumps are of high quality and are designed for the convenience of the candidates. These are based on the Plat-Dev-210 Exam content that covers the entire syllabus. The Plat-Dev-210 practice test content is very easy and simple to understand.

Salesforce Plat-Dev-210 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Integration Procedures: This section measures the skills of an Integration Architect and involves designing and configuring Integration Procedures to automate processes and integrate systems. It requires comparing and contrasting different elements and configurations within Integration Procedures to meet specific use cases. Candidates are also tested on selecting the correct elements and properties to satisfy functional requirements, ensuring seamless data flow and process automation.
Topic 2	<ul style="list-style-type: none">Flexcards: This section of the exam measures the skills of a Solution Architect and covers the ability to design and configure FlexCards based on specific business requirements. It evaluates the candidate's knowledge in selecting appropriate card styles, defining data sources and fields, and implementing user actions across different card states. Additionally, this domain tests the understanding of constructing the underlying JSON data structure that powers the FlexCards framework, ensuring that the configured cards meet both functional and technical specifications.

Topic 3	<ul style="list-style-type: none"> • Omniscritps: This portion of the exam measures the skills of a Business Analyst and focuses on the use of OmniScripts to create dynamic, guided user experiences. It includes comparing and contrasting various OmniScript elements and their configurations to fulfill given use cases. The section also examines the candidate's understanding of the JSON structure that supports OmniScripts, as well as the ability to select appropriate elements and properties to address functional requirements effectively.
Topic 4	<ul style="list-style-type: none"> • Integrated Troubleshooting and Deployment: This final section measures the skills of a Support Engineer and focuses on identifying and resolving issues within Omnistudio tools. It involves diagnosing errors based on given scenarios and determining where breakdowns occur in the data flow for specific customer issues. This ensures the candidate can effectively troubleshoot, debug, and maintain solutions to ensure optimal performance and reliability.

Free PDF Salesforce - High Hit-Rate Plat-Dev-210 - Salesforce Certified Omnistudio Developer Valid Practice Questions

As a market leader, our company is able to attract quality staff; it actively seeks out those who are energetic, persistent, and professional to various Plat-Dev-210 certificate and good communicator. Over 50% of the account executives and directors have been with the Group for more than ten years. The successful selection, development and Plat-Dev-210 training of personnel are critical to our company's ability to provide a high standard of service to our customers and to respond their needs. That's the reason why we can produce the best Plat-Dev-210 exam prep and can get so much praise in the international market..

Salesforce Certified Omnistudio Developer Sample Questions (Q62-Q67):

NEW QUESTION # 62

Refer to the exhibit.

The card layout uses an integration Procedure as a data source. The cards use the layout data source. Which JSON data structure supports this card layout and follows best practices?

- A.
- **B.**
- C.

Answer: B

Explanation:

The JSON data structure in option C supports the card layout and follows best practices. It has a list of objects, each representing a product, with the properties "ProductCode", "ProductName", "ProductDescription", and "ProductPrice". These properties match the fields in the card layout. The JSON data structure also follows the naming convention of using camel case for property names. The JSON data structures in options A and B do not match the fields in the card layout and do not follow the naming convention.

NEW QUESTION # 63

A customer has a new Engagement Manager who is going to be the new Primary Contact for the Account.

What type of mapping does a DataRaptor Load use to create the new contact and then add it as the new Primary Contact?

- A. Relationship Query
- B. Lookup Key
- **C. Linked Mapping**
- D. Lookup Mapping

Answer: C

Explanation:

According to the DataRaptor Load Overview page, a Linked Mapping is used to "create or update multiple records in different

objects that are related by lookup fields".

NEW QUESTION # 64

A developer examines data received from an external data source. The data is nested two levels down in the JSON structure. Which OmniStudio tool could the developer use to simplify this data?

- A. A guided workflow
- B. An integration Procedure
- C. An HTTP Action Element
- **D. A DataRaptor Transform**

Answer: D

Explanation:

A DataRaptor Transform can simplify nested data by transforming it into a flat structure. The developer can use JSON paths to map the input data to the output data and define the output structure.

NEW QUESTION # 65

A developer examines data received from an external data source. The data is nested two levels down in the JSON structure. Which OmniStudio tool could the developer use to simplify this data?

- A. Guided Workflow
- B. Data Mapper Transform
- **C. Integration Procedure**
- D. HTTP Action Element

Answer: C

Explanation:

According to Salesforce OmniStudio Integration Procedures documentation, when working with deeply nested JSON, Integration Procedures are ideal. They allow developers to flatten and manipulate JSON data, especially when handling external responses.

* C. Integration Procedure - This is correct. IPs provide Response Transformers, DataRaptor Transforms, and Response Actions to reshape and simplify nested data structures for consumption by front-end components.

Incorrect Options:

* A. DataRaptor Transform is used inside IPs but cannot directly handle external HTTP calls or manage complex orchestration.

* B. HTTP Action Element is used inside an Integration Procedure, but by itself, it does not process or simplify the data.

* D. Guided Workflow is not a recognized OmniStudio component for data transformation.

OmniStudio Integration Procedures Guide # Handling Nested JSON

NEW QUESTION # 66

A developer needs to configure a calculation procedure to calculate a subtotal using two different formulas depending on whether the input Boolean variable is Customer is set to true or false.

How should a developer configure the calculation procedure to conditionally execute the correct formula?

- A. Use two separate Calculation Steps with the Conditional Step property selected: reference just the is Customer variable in the Conditional syntax (no comparison necessary)
- B. Use two separate Calculation Steps with the Conditional Step property selected: compare the isCustomer variable directly to the literal true and false values in the Condition syntax.
- **C. Use two separate Calculation Steps with the Conditional Step property selected: use the ISTRUE (is Customer) and NOT (ISTRUE) (is Customer) functions in the Condition syntax.**
- D. Use a single Calculation Steps with IF statement directly in the formula definition to reference the isCustomer variable and conditionally perform the appropriate calculation.

Answer: C

Explanation:

Using two separate Calculation Steps with the Conditional Step property selected allows the developer to specify different formulas

based on different conditions. The ISTRUE(isCustomer) and NOT(ISTRUE (isCustomer)) functions are used to evaluate the Boolean variable in the Condition syntax. The other options are either missing the Conditional Step property, using incorrect comparison operators, or using an IF statement instead of separate Calculation Steps.

NEW QUESTION # 67

.....

You may find that there are a lot of buttons on the website which are the links to the information that you want to know about our Plat-Dev-210 exam braindumps. Also the useful small buttons can give you a lot of help on our Plat-Dev-210 study guide. Some buttons are used for hide or display answers. What is more, there are extra place for you to make notes below every question of the Plat-Dev-210 practice quiz. Don't you think it is quite amazing? Just come and have a try!
