Microsoft PL-600 Questions - Reduce your Chances of Failure in Exam

Remember that this is a crucial part of your career, and you must keep pace with the changing time to achieve something substantial in terms of a certification or a degree. So do avail yourself of this chance to get help from our exceptional Microsoft Power Platform Solution Architect (PL-600) dumps to grab the most competitive Microsoft PL-600 certificate. Pass4Test has formulated the Microsoft Power Platform Solution Architect (PL-600) product in three versions. You will find their specifications below to understand them better.

The PL-600 Certification Exam is an excellent opportunity for IT professionals to validate their knowledge and skills in the Power Platform. It is also an excellent way to demonstrate to potential employers that you have the expertise required to build and manage custom solutions using the platform. Microsoft Power Platform Solution Architect certification exam covers a range of topics related to the Power Platform, including designing and developing solutions, data modeling, and app integrations.

Microsoft Power Platform Solution Architect Sample Questions (Q151-Q156):

NEW QUESTION # 151

You are designing a Power Platform solution for a company. The company issues each employee a tablet device. The company wants to simplify the opportunity management processes and automate when possible. The company identifies the following requirements:

Users must have a visual guide to know which data to enter in each step of the opportunity management process.

The system must automatically assign the opportunity to a manager for approval once all data is entered.

The system must notify an assignee each time an opportunity is assigned to them by using push notifications.

When a user selects a push notification, the associated opportunity must display.

You need to recommend the Power Platform components that will meet their requirements.

Which three Power Platform components should you recommend? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Power Automate desktop flows
- **B. Power Automate cloud flows**
- **C. Power Apps mobile apps**
- D. Power Virtual Agents chatbots
- **E. Business process flows**

Answer: B,C,E

Explanation:

A: Use business process flows to define a set of steps for people to follow to take them to a desired outcome. These steps provide a visual indicator that tells people where they are in the business process.

B: Push notifications are used in Power Apps mobile to engage app users and help them prioritize key tasks. In Power Apps, you can create notifications for Power Apps mobile by using the Power Apps Notification connector. You can send notifications to any app that you create in Power Apps.

E: Create a cloud flow when you want your automation to be triggered either automatically, instantly, or via a schedule.

NEW QUESTION # 152

A company uses Microsoft Dataverse to store patient Information-Patient information is managed using Dataverse forms. The company must enforce the following rules to manage data quality:

* Show or hide tabs in the main form based on the column value selected.

* Add a discount code automatically when a new patient row is added.

You need to recommend a solution.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

□ Explanation:

□

NEW QUESTION # 153

You are evaluating a solution design for a model-driven app that will have a large number of complex forms.

Many of the forms take up to 10 seconds to load.

You need to recommend solution to speed up loading times for the forms.

Which two solutions should you recommend? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Move scripts into the OnLoad event.
- **B. Consolidate and reduce scripts.**
- **C. Remove unnecessary fields.**
- D. Use synchronous JavaScript requests.

Answer: B,C

Explanation:

D: Controls that require extra data beyond the primary record produce the most strain on form responsiveness and loading speed. These controls fetch data over the network and often involve a waiting period (seen as progress indicators) because it can take time to transmit the data.

Keep only the most frequently used of these controls on the default tab.

Incorrect Answers:

B: Use asynchronous network requests when requesting data. Request data asynchronously rather than synchronously when extra

data is necessary for customizations.

C: Moving scripts to the Onload event would slow down the loading of the form.

NEW QUESTION # 154

An animal welfare organization wants to track the movement of wolf packs in a region. Cameras at specific locations capture images when motion is detected within the camera sensor range. Staff upload the images manually to a shared drive and then analyze the images.

The organization wants to automate image capture and analysis. The organization has the following requirements:

Save captured images in an appropriate location.

Analyze saved images by using an image recognition process.

Display data in real-time dashboards.

You need to recommend the correct technology for the requirements.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

<https://docs.microsoft.com/en-us/powerapps/maker/model-driven-apps/use-power-bi>

NEW QUESTION # 155

A company plans to integrate Microsoft Power Platform with existing systems, including Microsoft Dynamics 365 Omni channel for Customer Service.

You need to recommend a solution for each requirement.

Which components should you recommend for the requirements?

To answer, drag the appropriate solutions to the correct requirements. Each solution may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Answer:
