Get Excellent JN0-336 Exam and Pass Exam in First Attempt

You can take advantage of several perks if you buy BraindumpsPass's bundle package of Juniper JN0-336 dumps. The bundle package is cost-effective and includes all three formats of Security, Specialist (JNCIS-SEC) exam preparation material Juniper JN0-336 PDF Dumps Questions Answers, and Juniper JN0-336 Practice Test software (online and offline). Juniper JN0-336 Dumps are worth trying while preparing for the exam. You will be sure of what Juniper JN0-336 exam questions will be asked in the exam.

Juniper Security, Specialist (JNCIS-SEC) Sample Questions (Q56-Q61):

NEW QUESTION # 56

You need to deploy an SRX Series device in your virtual environment. In this scenario, what are two benefits of using a CSRX? (Choose two.)

- A. The cSRX has low memory requirements.
- B. The cSRX supports firewall, NAT, IPS, and UTM services.
- C. The cSRX supports Layer 2 and Layer 3 deployments.
- D. The cSRX default configuration contains three default zones: trust, untrust, and management.

Answer: A,B

Explanation:

Two benefits of using a cSRX in your virtual environment are:

The cSRX supports firewall, NAT, IPS, and UTM services: The cSRX is a containerized version of the SRX Series firewall that runs as a Docker container on Linux hosts. It provides the same features and functionality as the SRX Series physical firewalls, such as firewall, NAT, IPS, and UTM services. The cSRX can protect your virtual workloads and applications from various threats and attacks.

The cSRX has low memory requirements: The cSRX is designed to be lightweight and efficient, with low memory and CPU requirements. The cSRX can run on as little as 1 GB of RAM and 1 vCPU, making it suitable for resource-constrained environments. Reference: = cSRX Overview, cSRX Container Firewall Datasheet

NEW QUESTION # 57

Click the Exhibit button.

```
user@host> show chassis cluster status redundancy-group 1
Cluster: 1, Redundancy-Group: 1
Device name      Priority  Status      Preempt  Manual  failover
node0             0        Secondary   No       No
node1            200      Primary     No       No
```

Which two statements describe the output shown in the exhibit? (Choose two.)

- A. Node 0 is controlling traffic for redundancy group 1.
- B. Node 1 is controlling traffic for redundancy group 1.
- C. Redundancy group 1 was administratively failed over.
- D. Redundancy group 1 experienced an operational failure.

Answer: A,B

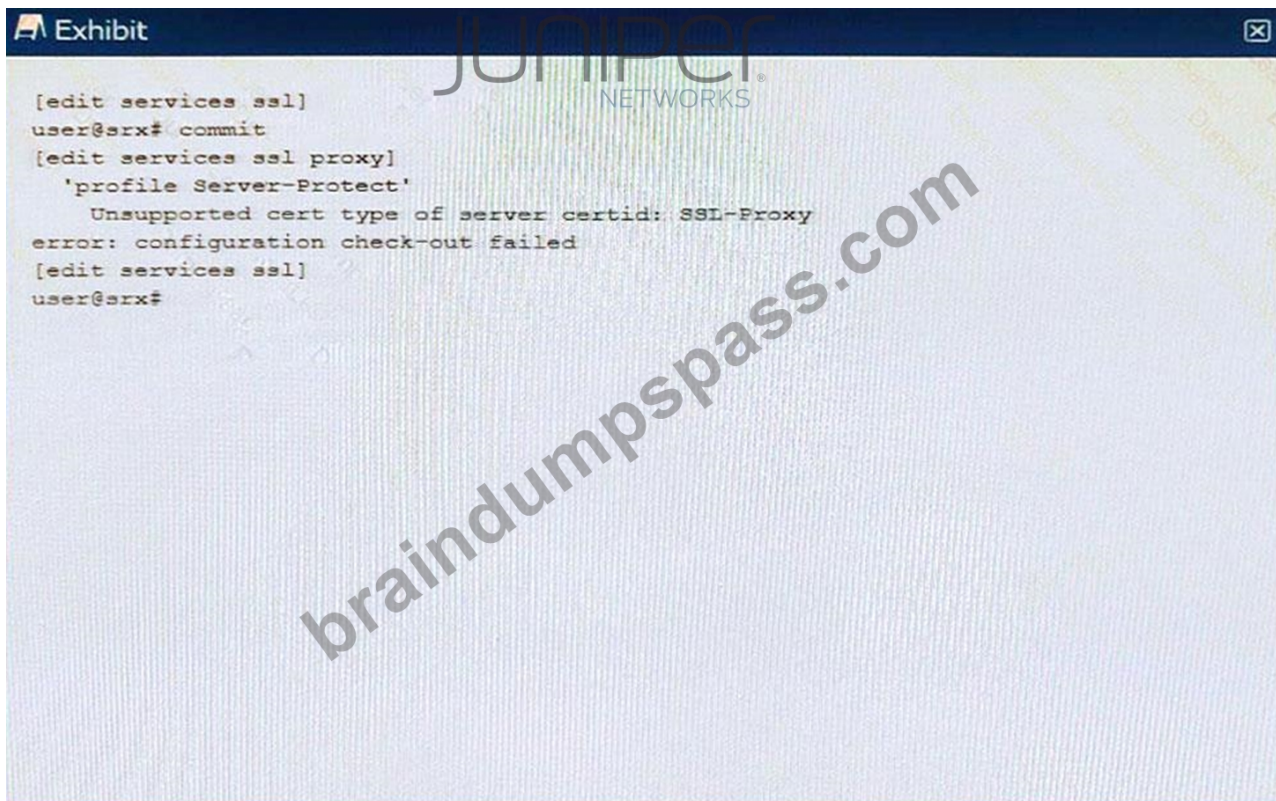

Explanation:

The output indicates that node1 has a priority of 200 and is marked as "Primary," which means it is currently the active node controlling traffic for redundancy group 1. The "Primary" status designates that this node is handling the traffic for the specified redundancy group.

According to the exhibit, node0 is listed with a priority of 0 and is marked as "Secondary." This status indicates that node0 is currently not controlling traffic for redundancy group 1, serving instead in a standby role ready to take over should node1 fail or become unavailable.

NEW QUESTION # 58

Exhibit

When trying to set up a server protection SSL proxy, you receive the error shown. What are two reasons for this error? (Choose two.)

- A. The SSL proxy certificate ID is for a forwarding proxy.
- B. The SSL proxy certificate ID does not exist.
- C. The SSL proxy certificate ID does not have the correct renegotiation option set.
- D. The SSL proxy certificate ID is part of a blocklist.

Answer: B,C

Explanation:

The error message shown in the exhibit regarding the SSL proxy setup indicates an issue with the type of server certificate being used. The error explicitly states, "Unsupported cert type of server certid." Here are two plausible reasons for this error based on the options provided:

Option B. The SSL proxy certificate ID does not have the correct renegotiation option set.

This option points to a configuration issue related to the properties or capabilities of the certificate, such as renegotiation, which if not set correctly according to the expected requirements of the SSL proxy, might lead to the certificate being unsupported. Renegotiation settings are critical in ensuring secure connections, and mismatches in configuration can result in errors.

Option D. The SSL proxy certificate ID does not exist.

If the certificate ID being referred to in the SSL proxy profile does not exist in the device's certificate store or is incorrectly referenced, the system will be unable to apply the configuration, leading to an error during the commit operation. This situation would typically result in an error indicating that the system can't find or recognize the specified certificate ID.

NEW QUESTION # 59

Which two statements are correct about App Track? (Choose two.)

- A. App Track collects traffic flow information including byte, packet, and duration statistics.
- B. App Track can only be configured in the main logical system on an SRX Series device.
- C. App Track identifies and blocks traffic flows that might be malicious regardless of the ports being used.
- D. App Track can be configured for any defined logical system on an SRX Series device.

Answer: A,D

Explanation:

AppTrack is a feature that allows you to monitor and analyze the application traffic on your SRX Series device. It can be configured

for any defined logical system, which is a virtual router or switch within a physical device. AppTrack collects statistics such as bytes, packets, and duration for each application flow and displays them in reports or logs. AppTrack does not identify or block malicious traffic, that is the function of AppSecure or IDP/IPS. Reference: = JNCIS-SEC Certification, Open Learning - Security, Specialist (JNCIS-SEC), Application Security Theory

NEW QUESTION # 60

You are deploying a new SRX Series device and you need to log denied traffic.

In this scenario, which two policy parameters are required to accomplish this task? (Choose two.)

- A. count
- B. session-init
- C. deny
- D. session-close

Answer: C,D

NEW QUESTION # 61

.....

Our company is a professional certification exam materials provider, we have occupied in the field for years, and therefore we have abundant experiences. In addition, JN0-336 exam torrent is high quality and accuracy, for a professional team are collecting and researching the latest information for the exam. We also pass guarantee and money back guarantee for JN0-336 Exam Materials, if you fail to pass the exam, we will give you full refund, and the money will be returned to your payment account. We have online and offline service, and if you have any questions for JN0-336 exam braindumps, you can consult us.
