## Huawei HCIA-Datacom V1.0 Sample Questions (Q343-Q348):

### NEW QUESTION # 343

Which statement about ASPF and Server-map is correct? (Multiple choice)

- A. Only ASPF will generate the Server-map table
- B. After the channel is established, the message is still forwarded according to the Server-map
- C. The server-map entry will be deleted after a certain aging time because there is no packet match. This mechanism ensures that the relatively loose channel such as the Server-map entry can be deleted in time; it also ensures the security of the network. When a new data connection is subsequently initiated, the establishment of a Server-map entry will be re-triggered
- D. Server-map is usually only used to check the first message, and the message after the channel is established is still forwarded according to the session table
