시험준비에 가장 좋은 1z0-1057-25시험대비 최신 덤프모음집 최신버전 덤프 데모문제 다운로드

Oracle 1z0-1057-25 덤프의 PDF 버전과 Software 버전의 내용은 동일합니다. PDF버전은 프린트 가능한 버전으로서 단독구매하셔도 됩니다. Software 버전은 테스트용으로 PDF 버전 공부를 마친후 시험전에 실력테스트 가능합니다.

Software 버전은 PDF버전의 보조용이기에 단독 판매하지 않습니다. 소프트웨어버전까지 필요하신 분은 PDF버전을 구입하실때 공동구매하셔야 합니다.

최신 Project Financials Management Cloud 1z0-1057-25 무료샘플문제 (Q105-Q110):

질문 # 105

You are implementing Project Portfolio Management (PPM) for a professional services firm. The firm rents multiple buildings for its operations. At the end of each month, they review the rent expense for the month and want to allocate the rental cost to all the projects and tasks that are executed by associates in each of the buildings. The source amounts must be proportionally allocated to the tasks based on the raw costs of the tasks from the previous month. Considering that all these costs are in General Ledger, what three allocation setups should you complete in PPM? (Choose three.)

- A. Define allocation basis by using Actual Amounts with a period-to-date amount class.
- B. Allocate rental costs once each accounting period by using the "spread evenly" allocation method.
- C. Allocate to all eligible tasks and prorate the allocation by the total actual raw cost accrued for each task during the previous accounting period.
- D. Define allocation basis by using Actual Amounts with a project-to-date amount class.
- E. Allocate rental costs once each accounting period by using the "full" allocation method.

정답: A,C,E

설명:

To allocate the rental cost to the projects and tasks based on the raw costs of the tasks from the previous month, you need to do the following:

- * Allocate rental costs once each accounting period by using the "full" allocation method. This method allocates the entire source amount to the target tasks in one run.
- * Allocate to all eligible tasks and prorate the allocation by the total actual raw cost accrued for each task during the previous accounting period. This ensures that the source amount is proportionally allocated to the tasks based on their relative raw costs.
- * Define allocation basis by using Actual Amounts with a period-to-date amount class. This allows you to use the actual raw costs of the tasks as the basis for allocation and to use the amounts from the previous accounting period. Reference: <https://docs.oracle.com/en/cloud/saas/project-portfolio-management/20c/oapfin/manage-project-costs.html#OAPFM2355951>

질문 # 106

Stigma Consulting wants to implement the program management capability to coordinate and track their strategic programs. Which three components are required to configure the program options as part of implementing the program management capability? (Choose three.)

- A. Calculation Methods
- B. Accounting Methods
- C. Calendar
- D. Currencies
- E. Derivation Methods

정답: A,C,E

설명:

Program management is a capability that allows you to coordinate and track multiple related projects and tasks as part of a strategic program. To configure the program options as part of implementing the program management capability, you need to define three components:

- * Calendar: This component allows you to specify the calendar that is used to calculate the dates and durations for the program and its projects and tasks.
 - * Calculation Methods: This component allows you to specify the methods that are used to calculate the progress, performance, and variance measures for the program and its projects and tasks based on various sources and formulas.
 - * Derivation Methods: This component allows you to specify the methods that are used to derive the attributes and values for the program and its projects and tasks based on various rules and conditions.
- Currencies and Accounting Methods are not components that are required to configure the program options. Currencies are used to define the currency conversion rates and rules for the program and its projects and tasks. Accounting Methods are used to define the subledger accounting rules and options for the program and its projects and tasks. Reference:

질문 # 107

Your organization has created an Enterprise Project Structure (EPS) and your executives review the overall project labor demand by using the EPS. Identify two correct statements about the periodic project labor demand. (Choose two.)

- A. Labor Demand FTE is calculated as Quarterly Allocation hours divided by Quarterly FTE hours, if a quarter is used as the basis for viewing labor demand.
- B. Labor Demand FTE is calculated as Yearly Allocation hours divided by Yearly FTE hours, if a year is used as the basis for viewing labor demand.
- C. Labor Demand FTE is calculated as Project Allocation hours divided by Project FTE hours, if project duration is used as the basis for viewing labor demand.
- D. Labor Demand FTE is calculated as Monthly Allocation hours divided by Monthly FTE hours, if a period is used as the basis for viewing labor demand.

정답: A,B

설명:

Reference https://docs.oracle.com/cloud/faq10/projects_gs/OAPEM/OAPEM1461017.htm#OAPEM1313472

Project Labor Demand: How It's Calculated

Project executives want to track the labor demand in projects in their organization. The Project Hierarchy Viewer provides project executives a hierarchical view of the enterprise project structure (EPS) along with the labor demand in terms of full-time equivalent (FTE).

Settings That Affect Project Labor Demand

Project application administrators must do the following to set up how project labor demand is calculated:

- * Organize projects into hierarchical groups on the Manage Enterprise Project Structure page.
- * Change the quarterly FTE hours for the organization on the Define Project Management Implementation Options page, if different from 520 hours.

Note: You can choose to view labor demand annually instead of quarterly. The Project Hierarchy Viewer uses the current date to determine which year or quarter to display.

How Project Labor Demand Is Calculated

The Project Hierarchy Viewer calculates project labor demand in the following manner:

- * Spreads the allocation hours from the Manage Project Resources page evenly over the days that the resources are allocated to the project.
- * Divides the quarterly project allocation hours by the quarterly FTE hours to get the labor demand.
- * Rolls up the quarterly and annual labor demand up the hierarchy.

질문 # 108

Your organization has a requirement to send notifications to the owners of the associated tasks when the status of a deliverable is set to Complete. You have been asked to evaluate generate public events for project deliverable status changes feature to manage this requirement.

Which two statements are true about this feature? (Choose two.)

- A. The public event is generated when a deliverable is created or deleted.
- B. The public event is not generated when a deliverable is created or deleted.
- C. The public event is generated when the progress status for a deliverable changes.
- D. The public event is not generated when the priority of a deliverable changes.

정답: B,C

설명:

The generate public events for project deliverable status changes feature is a feature that allows you to send notifications or trigger actions when the progress status of a deliverable changes from one value to another.

For example, when the status of a deliverable is set to Complete, you can send a notification to the owners of the associated tasks or update the status of the tasks accordingly. Two statements that are true about this feature are:

- * The public event is not generated when a deliverable is created or deleted. This feature only generates events when the progress status of a deliverable changes, not when a deliverable is added or removed from a project or task.
- * The public event is generated when the progress status for a deliverable changes. This feature generates events when the progress

status of a deliverable changes from one value to another, such as from Not Started to In Progress, or from In Progress to Complete. You can define rules and actions for each progress status change using Business Process Management (BPM) Worklist. The public event is also not generated when the priority of a deliverable changes, as this feature only generates events when the progress status of a deliverable changes. Reference: <https://docs.oracle.com/en/cloud/saas/project-portfolio-management/20c/oapfm/manage-project-execution.html#OAPFM2356211>

질문 # 109

Which three can be tracked as Status tracking for Project Invoice Approval Notifications? (Choose three.)

- A. Person assigned for approval
- B. Date-wise updates to the document
- C. Persons with whom it is still pending approval
- D. Pre-approval activities
- E. Prior actions

정답: A,C,E

설명:

Status tracking is a feature that allows you to track the progress and history of project invoice approval notifications. Status tracking provides information such as who approved or rejected the invoice, when and why they took the action, who is currently assigned to approve or reject the invoice, etc. Three of the information that can be tracked as status tracking for project invoice approval notifications are:

* Person assigned for approval: This shows the name of the person who is currently assigned to approve or reject the invoice notification.

* Prior actions: This shows the list of actions that have been taken on the invoice notification by previous approvers or rejectors, such as approve, reject, request information, etc.

* Persons with whom it is still pending approval: This shows the list of persons who are still in the approval chain for the invoice notification and have not taken any action yet. Pre-approval activities and date-wise updates to the document are not information that can be tracked as status tracking for project invoice approval notifications. Pre-approval activities are tasks that need to be performed before submitting an invoice for approval, such as validating or transferring the invoice. Date-wise updates to the document are changes that are made to the invoice document after it has been submitted for approval, such as adjusting or reversing the invoice.
