## Free Valid Salesforce Mule-Dev-301 Questions Updates and Free Demos

You can also use the Salesforce Certified MuleSoft Developer II PDF format using smartphones, tablets, and laptops. Since the PDF format of real dumps questions is portable, you can access it from any place in free time. The Salesforce Certified MuleSoft Developer II web-based practice exam can be easily taken from every browser and operating system without installing additional software. The desktop Salesforce Certified MuleSoft Developer II practice exam software comes with all specs of the Salesforce Mule-Dev-301 web-based version but it works offline only on Windows computer or laptop.

## Salesforce Certified MuleSoft Developer II Sample Questions (Q52-Q57):

**NEW QUESTION # 52**

Refer to the exhibit.

```

client-id-required:
  headers:
    client_id:
      type: string
    client_secret:
      type: string

protocols:
- HTTPS
- HTTP

types:
  Customers: !include datatypes/Customers-request.raml

/customers:
  is: [client-id-required]
  put:
    body:
      application/json:
        type: Customers
        example: !include examples/Customers-request.json
    responses:
      200:
        description: Successfull
        body:
          application/json:
            example: !include examples/Customers-response.json
      400:
        description: Bad request
        body:
          application/json:
            example: !include examples/postErrorCode403.json
      404:
        description: Resource not found
        body:
          application/json:
            example:
              !include examples/postErrorCode404.json
      500:
        description: Internal server error
        body:
          application/json:
            example:
              !include examples/postErrorCode500.json
      501:
        description: Not implemented
        body:
          application/json:
            example:
              !include examples/postErrorCode501.json

```

A developer generates the base scaffolding for an API in Anypoint Studio.

Which HTTP status code is returned while testing using the API Kit console if no values are entered in client-secret?

- A. HTTP status code:500
- **B. HTTP status code:403**
- C. HTTP status code:400
- D. HTTP status code:200

**Answer: B**

Explanation:

Based on the code snippet and schema.json file below, when testing using the API Kit console if no values are entered in client-secret, HTTP status code 403 (FORBIDDEN) is returned. This is because client-secret is defined as a required header parameter in schema.json file, which means that it must be present in every request. If no values are entered in client-secret, then it is equivalent to omitting this header parameter, which violates the schema and causes APIKit Router to return HTTP status code 403. Reference: <https://docs.mulesoft.com/apikit/4.x/apikit-4-headers>

**NEW QUESTION # 53**

An organization uses CloudHub to deploy all of its applications.

How can a common-global-handler flow be configured so that it can be reused across all of the organization's deployed applications?

- A. Create a common-global-error-handler flow in all Mule Applications Refer to it flow-ref wherever needed.
- **B. Create a Mule Plugin project**
- C. Create a Mule plugin project  
Create a common-global-error-handler flow inside the plugin project.  
Use this plugin as a dependency in all Mute applications.  
Import that configuration file in Mute applications.

**Answer: B**

Explanation:

Create a common-global-error-handler flow inside the plugin project.

Use this plugin as a dependency in all Mule applications

D.

Create a Mule daman project.

Create a common-global-error-handler flow inside the domain project.

Use this domain project as a dependency.

Explanation:

To configure a common-global-handler flow that can be reused across all of the organization's deployed applications, the developer should create a Mule Plugin project, create a common-global-error-handler flow inside the plugin project, and use this plugin as a dependency in all Mule applications. This way, the developer can import the common-global-error-handler flow in any application that needs it and avoid duplicating the error handling logic. Reference: <https://docs.mulesoft.com/mule-runtime/4.3/error-handling#global-error-handler>

#### NEW QUESTION # 54

Which command is used to convert a JKS keystore to PKCS12?

- **A. Keytool-importkeystore -srckeystore keystore.p12-srcstoretype JKS -destkeystore keystore.p12 -deststoretype PKCS12**
- B. Keytool-importkeystore -srckeystore keystore jks-srcstoretype JKS -destkeystore keystore.p13 -deststoretype PKCS12
- C. Keytool-importkeystore -srckeystore keystore p12-srcstoretype PKCS12 -destkeystore keystore.jks -deststoretype JKS
- D. Keytool-importkeystore -srckeystore keystore jks-srcstoretype PKCS12 -destkeystore keystore.p12 -deststoretype JKS

**Answer: A**

Explanation:

To convert a JKS keystore to PKCS12, the developer needs to use the keytool-importkeystore command with the following options: -srckeystore keystore.jks -srcstoretype JKS -destkeystore keystore.p12 -deststoretype PKCS12. This command imports all entries from a source JKS keystore (keystore.jks) into a destination PKCS12 keystore (keystore.p12). Reference: <https://docs.oracle.com/en/java/javase/11/tools/keytool.html#GUID-5990A2E4-78E3-47B7-AE75-6D1826259549>

#### NEW QUESTION # 55

A system API that communicates to an underlying MySQL database is deploying to CloudHub. The DevOps team requires a readiness endpoint to monitor all system APIs.

Which strategy should be used to implement this endpoint?

- A. Create a dedicated endpoint that responds with the API status only
- B. Use an existing resource endpoint of the API
- C. Create a dedicated endpoint that responds with the API status and health of the server
- **D. Create a dedicated endpoint that responds with the API status and reachability of the underlying systems**

**Answer: D**

Explanation:

To implement a readiness endpoint to monitor all system APIs, the developer should create a dedicated endpoint that responds with the API status and reachability of the underlying systems. This way, the DevOps team can check if the system API is ready to receive requests and if it can communicate with its backend systems without errors. Reference: <https://docs.mulesoft.com/mule-runtime/4.3/deployment-strategies#readiness-probes>

#### NEW QUESTION # 56

Which statement is true about using mutual TLS to secure an application?

- A. Mutual TLS authenticates the identity of the server before the identity of the client
- B. Mutual TLS requires a hardware security module to be used
- C. Mutual TLS ensures only authorized end users are allowed to access an endpoint
- D. Mutual TLS increases the encryption strength versus server-side TLS alone

**Answer: A**

Explanation:

Mutual TLS (mTLS) is an extension of TLS that requires both parties (client and server) to present their certificates to each other during the handshake process. This way, both parties can verify each other's identity and establish a secure connection. The authentication of the server happens before the authentication of the client, as the server sends its certificate first and then requests the client's certificate. Reference: <https://docs.mulesoft.com/mule-runtime/4.3/tls-configuration#mutual-authentication>

#### NEW QUESTION # 57

.....

In order to help you more Dumpexams the Salesforce Mule-Dev-301 exam eliminate tension of the candidates on the Internet. Mule-Dev-301 study materials including the official Salesforce Mule-Dev-301 certification training courses, Salesforce Mule-Dev-301 self-paced training guide, Mule-Dev-301 exam Dumpexams and practice, Mule-Dev-301 Online Exam Mule-Dev-301 study guide. Mule-Dev-301 simulation training package designed by Dumpexams can help you effortlessly pass the exam. Do not spend too much time and money, as long as you have Dumpexams learning materials you will easily pass the exam.

**Exam Mule-Dev-301 Reviews:** <https://www.dumpexams.com/Mule-Dev-301-real-answers.html>

And there is no exaggeration that our pass rate for our Mule-Dev-301 study guide is 98% to 100% which is proved and tested by our loyal customers, Planning to take Mule-Dev-301 certification exams, Our Salesforce Mule-Dev-301 exam dumps PDF can help you prepare casually and pass exam easily, If you are concerned about the test, however, you can choose Dumpexams's Salesforce Mule-Dev-301 exam training materials, Mule-Dev-301 exam braindumps of us will help you to use the least time to pass the exam.

The test questions cover the practical questions Mule-Dev-301 in the test Salesforce certification and these possible questions help you explore varied types of questions which may Exam Mule-Dev-301 Reviews appear in the test and the approaches you should adapt to answer the questions.

## Free PDF Hot Mule-Dev-301 Spot Questions & Leader in Qualification Exams & Well-Prepared Mule-Dev-301: Salesforce Certified MuleSoft Developer II

Secure Account Access Organizations choosing to adopt Exam Mule-Dev-301 Reviews cloud data storage solutions should implement strong security controls to protect access to stored data, And there is no exaggeration that our pass rate for our Mule-Dev-301 Study Guide is 98% to 100% which is proved and tested by our loyal customers.

Planning to take Mule-Dev-301 certification exams, Our Salesforce Mule-Dev-301 exam dumps PDF can help you prepare casually and pass exam easily, If you are concerned about the test, however, you can choose Dumpexams's Salesforce Mule-Dev-301 exam training materials.

Mule-Dev-301 exam braindumps of us will help you to use the least time to pass the exam.
