Some people worry that our aim is not to HPE Campus Access Switching Expert Written Exam guide torrent but to sell their privacy information to the third party to cause serious consequences. But we promise to you our privacy protection is very strict and we won't sell the client's privacy to others for our own benefits. Our aim to sell the HPE7-A06 test torrent to the client is to help them pass the exam and not to seek illegal benefits. For that time is extremely important for the learners, everybody hopes that they can get the efficient learning. So clients can use our HPE7-A06 Test Torrent immediately as the great merit of our product. When you begin to use, you can enjoy the various functions and benefits of our product such as it can simulate the exam and boost the timing function.

## HPE Campus Access Switching Expert Written Exam Sample Questions (Q30-Q35):

### NEW QUESTION # 30

Drag and Drop Question

Match the AOS-CX switch BGP keepalive and holddown timers to the default.

|            |            |            |             | Answer Area     |                      |
|------------|------------|------------|-------------|-----------------|----------------------|
| 15 seconds | 45 seconds | 60 seconds | 180 seconds | keepalive timer | <input type="text"/> |
| 5 minutes  | 15 minutes |            |             | holddown timer  | <input type="text"/> |

Answer:

Explanation:

|            |            |                                                                                   |                    |                 |             |
|------------|------------|-----------------------------------------------------------------------------------|--------------------|-----------------|-------------|
| 15 seconds | 45 seconds |  | <b>Answer Area</b> | keepalive timer | 60 seconds  |
| 5 minutes  | 15 minutes |                                                                                   |                    | holddown timer  | 180 seconds |

Explanation:

Keepalive timer: 60 seconds (interval for sending keepalive messages).

Holddown (Hold) timer: 180 seconds (maximum time to wait before declaring a neighbor down if no keepalives are received).

### NEW QUESTION # 31

Drag and Drop Question

Match the BGP connection states to the conditions that could have caused that state.

|             |                    |                                                                            |  |
|-------------|--------------------|----------------------------------------------------------------------------|--|
| active      | <b>Answer Area</b> | The last keepalive is less than 3 times the negotiated holddown timer.     |  |
| connect     |                    | The router has not received a response. The neighbor might be unreachable. |  |
| established |                    | The router is waiting for an initial response from the neighbor.           |  |
| idle        |                    | The router starts listening for a connection.                              |  |

**Answer:**

Explanation:

|  |                    |                                                                            |             |
|--|--------------------|----------------------------------------------------------------------------|-------------|
|  | <b>Answer Area</b> | The last keepalive is less than 3 times the negotiated holddown timer.     | established |
|  |                    | The router has not received a response. The neighbor might be unreachable. | active      |
|  |                    | The router is waiting for an initial response from the neighbor.           | connect     |
|  |                    | The router starts listening for a connection.                              | idle        |

### NEW QUESTION # 32

Refer to the exhibit.

```

R-1# show ip ospf neighbors
VRF : default                                Process : 1
=====

Total Number of Neighbors : 1

Neighbor ID      Priority   State             Nbr Address       Interface
-----
10.0.0.2          0         2-WAY/DROther     10.255.1.1        1/1/1

R-2# show ip ospf neighbors vrf acme
VRF : acme                                    Process : 1
=====

Total Number of Neighbors : 1

Neighbor ID      Priority   State             Nbr Address       Interface
-----
10.255.1.0        0         2-WAY/DROther     10.255.1.0        1/1/1

```

R1 has not learned OSPF routes from a directly connected neighboring router. Based on the exhibit's show command output, which statement describes a misconfiguration that would cause the router's neighbor state to remain stuck at 2-WAY/DROther?

- A. The other router's directly connected interface is not attached to the default VRF.
- **B. Both router's OSPF priority are set to 0.**
- C. There is an L2 interface MTU mismatch.
- D. There is a hello timer mismatch.

**Answer: B**

Explanation:

Both routers show OSPF priority 0, so neither can be elected DR/BDR on this broadcast segment. Without a DR/BDR, adjacencies remain at 2-WAY/DROther and routes aren't exchanged.

### NEW QUESTION # 33

A Python developer was able to read but could not modify the VLAN database on an AOS-CX switch through the REST API. Which settings should the developer check first? (Choose two.)

- A. SSH settings
- **B. REST API settings**
- **C. HTTPS settings**
- D. cookie settings
- E. SNMP settings

**Answer: B,C**

Explanation:

HTTPS settings → Required because the AOS-CX REST API runs over HTTPS. If HTTPS is not enabled, write operations will fail.

REST API settings → Must be checked to ensure that the REST API write mode (read/write vs. read-only) is enabled.

### NEW QUESTION # 34

You are configuring an SSID that is using PSK as a security mechanism. Why should you use WPA3-Personal with WPA3 Transition Mode disabled?

- **A. WPA3-Personal with Transition Mode disabled is mandatory for 6 GHz-enabled networks.**
- B. WPA3-Personal with Transition Mode disabled is optional for 6 GHz-enabled networks as there is a built-in fallback to 5 GHz mode with WPA2.

- C. WPA3-Personal with Transition Mode disabled should be used to prevent legacy clients from connecting to the network.
- D. WPA3-Personal with Transition Mode disabled is mandatory for 5 GHz-enabled networks.

**Answer: A**

Explanation:

For Wi-Fi 6E (6 GHz) networks, WPA3-Personal (SAE) is mandatory, and WPA3 Transition Mode (which allows WPA2 clients) is not permitted. This ensures stronger security and prevents weaker WPA2 connections in the 6 GHz band.

## NEW QUESTION # 35

.....

In line with the concept that providing the best service to the clients, our company has forged a dedicated service team and a mature and considerate service system. We not only provide the free trials before the clients purchase our HPE7-A06 training materials but also the consultation service after the sale. We provide multiple functions to help the clients get a systematical and targeted learning of our HPE7-A06 Certification guide. So the clients can trust our HPE7-A06 exam materials without doubt.
