

Databricks-Certified-Data-Engineer-Professional Valid Test Topics - Databricks-Certified-Data-Engineer-Professional Reliable Exam Cost

The Databricks-Certified-Data-Engineer-Professional exam questions are being offered in three different formats. The names of these formats are Databricks Certified Data Engineer Professional Exam (Databricks-Certified-Data-Engineer-Professional) desktop practice test software, web-based practice test software, and PDF dumps file. The Databricks desktop practice test software and web-based practice test software both give you real-time Databricks Databricks-Certified-Data-Engineer-Professional Exam environment for quick and complete exam preparation.

As the authoritative provider of Databricks-Certified-Data-Engineer-Professional actual exam, we always pursue high pass rate compared with our peers to gain more attention from those potential customers. We guarantee that if you follow the guidance of our Databricks-Certified-Data-Engineer-Professional learning materials, you will pass the exam without a doubt and get a certificate. Our Databricks-Certified-Data-Engineer-Professional Exam Practice is carefully compiled after many years of practical effort and is adaptable to the needs of the Databricks-Certified-Data-Engineer-Professional exam.

Databricks-Certified-Data-Engineer-Professional Reliable Exam Cost | New Databricks-Certified-Data-Engineer-Professional Real Test

We believe that the best brands of Databricks-Certified-Data-Engineer-Professional study materials are those that go beyond expectations. They don't just do the job – they go deeper and become the fabric of our lives. Therefore, our company as the famous brand, even though we have been very successful in providing Databricks-Certified-Data-Engineer-Professional practice guide we have never satisfied with the status quo, and always be willing to constantly update the contents of our Databricks-Certified-Data-Engineer-Professional Exam Torrent in order to keeps latest information about Databricks-Certified-Data-Engineer-Professional exam. With our Databricks-Certified-Data-Engineer-Professional exam questions, you can pass the Databricks-Certified-Data-Engineer-Professional exam and get the dreaming certification.

Databricks Certified Data Engineer Professional Exam Sample Questions (Q238-Q243):

NEW QUESTION # 238

The data engineering team maintains a table of aggregate statistics through batch nightly updates. This includes total sales for the previous day alongside totals and averages for a variety of time periods including the 7 previous days, year-to-date, and quarter-to-date. This table is named `store_sales_summary` and the schema is as follows:

The table `daily_store_sales` contains all the information needed to update `store_sales_summary`.

The schema for this table is:

```
store_id INT, sales_date DATE, total_sales FLOAT
```

Get Latest & Actual Certified-Data-Engineer-Professional Exam's Question and Answers from If `daily_store_sales` is implemented as a Type 1 table and the `total_sales` column might be adjusted after manual data auditing, which approach is the safest to generate

accurate reports in the store_sales_summary table?

- A. Use Structured Streaming to subscribe to the change data feed for daily_store_sales and apply changes to the aggregates in the store_sales_summary table with each update.
- B. Implement the appropriate aggregate logic as a batch read against the daily_store_sales table and append new rows nightly to the store_sales_summary table.
- **C. Implement the appropriate aggregate logic as a batch read against the daily_store_sales table and overwrite the store_sales_summary table with each Update.**
- D. Implement the appropriate aggregate logic as a batch read against the daily_store_sales table and use upsert logic to update results in the store_sales_summary table.
- E. Implement the appropriate aggregate logic as a Structured Streaming read against the daily_store_sales table and use upsert logic to update results in the store_sales_summary table.

Answer: C

NEW QUESTION # 239

The Databricks CLI is used to trigger a run of an existing job by passing the job_id parameter. The response that the job run request has been submitted successfully includes a field run_id.

Get Latest & Actual Certified-Data-Engineer-Professional Exam's Question and Answers from Which statement describes what the number alongside this field represents?

- **A. The globally unique ID of the newly triggered run.**
- B. The job_id and number of times the job has been are concatenated and returned.
- C. The job_id is returned in this field.
- D. The number of times the job definition has been run in the workspace.
- E. The total number of jobs that have been run in the workspace.

Answer: A

Explanation:

When triggering a job run using the Databricks CLI, the run_id field in the response represents a globally unique identifier for that particular run of the job. This run_id is distinct from the job_id.

While the job_id identifies the job definition and is constant across all runs of that job, the run_id is unique to each execution and is used to track and query the status of that specific job run within the Databricks environment. This distinction allows users to manage and reference individual executions of a job directly.

NEW QUESTION # 240

The data governance team has instituted a requirement that all tables containing Personal Identifiable Information (PII) must be clearly annotated. This includes adding column comments, table comments, and setting the custom table property "contains_pii" = true.

The following SQL DDL statement is executed to create a new table:

Get Latest & Actual Certified-Data-Engineer-Professional Exam's Question and Answers from

Which command allows manual confirmation that these three requirements have been met?

- A. DESCRIBE DETAIL dev.pii test
- B. SHOW TABLES dev
- **C. DESCRIBE EXTENDED dev.pii test**
- D. DESCRIBE HISTORY dev.pii test
- E. SHOW TBLPROPERTIES dev.pii test

Answer: C

Explanation:

This is the correct answer because it allows manual confirmation that these three requirements have been met. The requirements are that all tables containing Personal Identifiable Information (PII) must be clearly annotated, which includes adding column comments, table comments, and setting the custom table property "contains_pii" = true. The DESCRIBE EXTENDED command is used to display detailed information about a table, such as its schema, location, properties, and comments. By using this command on the dev.pii_test table, one can verify that the table has been created with the correct column comments, table comment, and custom table property as specified in the SQL DDL statement.

NEW QUESTION # 241

A data engineer, User A, has promoted a new pipeline to production by using the REST API to programmatically create several jobs. A DevOps engineer, User B, has configured an external orchestration tool to trigger job runs through the REST API. Both users authorized the REST API calls using their personal access tokens.

Which statement describes the contents of the workspace audit logs concerning these events?

- A. Because User B last configured the jobs, their identity will be associated with both the job creation events and the job run events.
- B. Because the REST API was used for job creation and triggering runs, a Service Principal will be automatically used to identify these events.
- **C. Because these events are managed separately, User A will have their identity associated with the job creation events and User B will have their identity associated with the job run events.**
- D. Because the REST API was used for job creation and triggering runs, user identity will not be captured in the audit logs.
- E. Because User A created the jobs, their identity will be associated with both the job creation Get Latest & Actual Certified-Data-Engineer-Professional Exam's Question and Answers from events and the job run events.

Answer: C

Explanation:

The events are that a data engineer, User A, has promoted a new pipeline to production by using the REST API to programmatically create several jobs, and a DevOps engineer, User B, has configured an external orchestration tool to trigger job runs through the REST API. Both users authorized the REST API calls using their personal access tokens. The workspace audit logs are logs that record user activities in a Databricks workspace, such as creating, updating, or deleting objects like clusters, jobs, notebooks, or tables. The workspace audit logs also capture the identity of the user who performed each activity, as well as the time and details of the activity.

Because these events are managed separately, User A will have their identity associated with the job creation events and User B will have their identity associated with the job run events in the workspace audit logs.

NEW QUESTION # 242

A distributed team of data analysts share computing resources on an interactive cluster with autoscaling configured. In order to better manage costs and query throughput, the workspace administrator is hoping to evaluate whether cluster upscaling is caused by many concurrent users or resource-intensive queries.

In which location can one review the timeline for cluster resizing events?

- A. Driver's log file
- B. Workspace audit logs
- **C. Cluster Event Log**
- D. Ganglia
- E. Executor's log file

Answer: C

NEW QUESTION # 243

.....

In order to gain more competitive advantage in the interview, more and more people have been eager to obtain the Databricks-Certified-Data-Engineer-Professional certification. They believe that passing certification is a manifestation of their ability, and they have been convinced that obtaining a Databricks-Certified-Data-Engineer-Professional certification can help them find a better job. However, many people in real life are daunted, because it is not easy to obtain. Our Databricks-Certified-Data-Engineer-Professional Study Tool can help you obtain the Databricks-Certified-Data-Engineer-Professional certification and own a powerful weapon for your interview. Our Databricks-Certified-Data-Engineer-Professional qualification test will help you gain recognition with true talents and better adapted to society. Now, I would like to give you a brief introduction in order to make you deepen your impression of our Databricks-Certified-Data-Engineer-Professional test guides.
