#### NEW QUESTION # 162

You are creating an annual report in Microsoft Word.  
In Tableau Desktop, you build a chart in a worksheet.  
You want to create an image of the chart that you can add to the annual report.  
What are two ways to create the image? Choose two.

- A. From the Worksheet menu, use the Copy option.
- B. From the File menu, use the Export As Version option.
- C. From the Dashboard menu, use the Copy Image option.
- D. From the Dashboard menu, use the Export Image option.
- E. From the Worksheet menu, use the Export option.

**Answer: A,E**

Explanation:

To create an image of the chart that you can add to the annual report, you can use either the Export option or the Copy option from the Worksheet menu. The Export option will allow you to save the image as a file in a specified location, name, and format. The Copy option will allow you to copy the image to the clipboard and paste it into another application, such as Microsoft Word. Both options will let you choose which elements to include in the image, such as title, caption, legend, etc. References:

#### NEW QUESTION # 164

You have two data sources that use the same schema. One data source contains order data from 2019 and the other data source contains order data from 2020.

You have a worksheet that shows the orders from 2019.

You need to configure the worksheet to show the orders from 2020 without reloading the data.

Which option should you select?

**Answer:**

Explanation:

Explanation:

Replace Data Source

Replace Data Source is a feature that allows you to replace one data source with another one that has the same or similar fields and structure. It updates all the worksheets that use the original data source with the new one, without reloading the data. In this case, you want to replace the data source that contains order data from 2019 with the one that contains order data from 2020.

To replace the data source, you need to do the following steps:

\* Go to the Data Source tab at the bottom of the workbook to see the data source page. You will see a table that shows the fields and values from the original data source.

\* Click on the drop-down arrow next to the data source name at the top of the page and select Replace Data Source from the menu. This will open a dialog box that allows you to replace your data source with another one.

\* Select the data source that contains order data from 2020 from the list of available data sources and click OK. This will replace your original data source with the new one and update your worksheet accordingly. You may need to fix any broken fields or calculations that result from the replacement.
