

Huawei H12-811_V2.0 Exam Dumps - Excellent Tips To Pass Exam

Our H12-811_V2.0 practice prep boosts varied functions to be convenient for you to master the H12-811_V2.0 training materials and get a good preparation for the exam and they include the self-learning function, the self-assessment function, the function to stimulate the exam and the timing function. We provide 24-hours online on H12-811_V2.0 Guide prep customer service and the long-distance professional personnel assistance to for the client. If clients have any problems about our study materialise and we will solve the client's H12-811_V2.0 problems as quickly as we can.

Huawei H12-811_V2.0 Exam Overview:

Certification Vendor:	Huawei
Exam Name:	HCIA-Datcom V2.0
Exam Number:	H12-811_V2.0
Certificate Validity Period:	3 years
Passing Score:	600/1000
Exam Format:	Single-answer Question, Multiple-answer Question, True or False, Short Response Item, Drag and Drop Item
Exam Duration:	90 minutes
Exam Price:	200 USD
Related Certifications:	HCIP-Datcom HCIE-Datcom
Real Exam Qty:	60
Available Languages:	English
Recommended Training:	Huawei HCIA-Datcom Training Course
Exam Registration:	Pearson VUE Registration Huawei Official Certification
Sample Questions:	Huawei H12-811_V2.0 Sample Questions
Exam Way:	Online proctored or onsite at Pearson VUE test centers
Pre Condition:	No mandatory prerequisites
Official Syllabus URL:	https://e.huawei.com/en/training/certification/exam/h12-811_v2.0

H12-811_V2.0 Latest Dumps Pdf & Useful H12-811_V2.0 Dumps

The committed team of the Itcertmaster is always striving hard to resolve any confusion among its users. The similarity between our Huawei H12-811_V2.0 exam questions and the real Huawei H12-811_V2.0 certification exam will amaze you. The similarity

between the Itcertmaster H12-811_V2.0 pdf questions and the actual H12-811_V2.0 certification exam will help you succeed in obtaining the highly desired HCIA-Datcom V2.0 (H12-811_V2.0) certification on the first go. You will notice the above features in the Huawei H12-811_V2.0 Web-based format too. There is no need to go through time-taking installations or agitating plugins to use this format.

Huawei H12-811_V2.0 Exam Syllabus Topics:

Topic	Details
Topic 1	• Typical Campus Networking Solution: Covers end-to-end campus network design scenarios, integrating switching, routing, security, and wireless technologies into a unified solution.
Topic 2	• Data Center Network Basics: Covers the architecture and key technologies used in modern data center networks including virtualization and high-availability design concepts.
Topic 3	• Ethernet Technology Basics: Covers Ethernet standards, switching principles, VLANs, and Layer 2 protocols used in enterprise network environments.
Topic 4	• IP Technology Basics: Covers IPv4 • IPv6 addressing, subnetting, routing fundamentals, and common routing protocols such as OSPF, RIP, and static routing.
Topic 5	• Data Communication Network Basics: Covers foundational concepts of data communication networks including network types, reference models (OSI • TCP-IP), and basic device roles.
Topic 6	• WLAN Technology Basics: Covers wireless LAN standards, components such as APs and ACs, WLAN architecture, and basic configuration principles.

Huawei HCIA-Datcom V2.0 Sample Questions (Q85-Q90):

NEW QUESTION # 85

R1 has the following configurations:

```
[R1] radius-server template 1
[R1-radius-1] radius-server authentication 10.1.6.6 1812
[R1-radius-1] radius-server accounting 10.1.6.6 1813
[R1-radius-1] radius-server shared-key cipher YsHsjx_202206139
[R1-radius-1] quit
[R1] aaa
[R1-aaa] authentication-scheme auth1
[R1-aaa-authen-auth1] authentication-mode radius
[R1-aaa-authen-auth1] quit
[R1-aaa] accounting-scheme acc1
[R1-aaa-accounting-acc1] accounting-mode radius
[R1-aaa-accounting-acc1] quit
[R1-aaa] domain huawei.com
[R1-aaa-domain-huawei.com] authentication-scheme auth1
[R1-aaa-domain-huawei.com] accounting-scheme acc1
[R1-aaa-domain-huawei.com] radius-server 1
[R1-aaa-domain-huawei.com] quit
[R1-aaa] quit
```

Which of the following statements is true?

- A. When a terminal initiates an authentication request, R1 needs to first establish a TCP connection with the server whose IP address is 10.1.6.6.
- B. The user cannot obtain authorization information after being authenticated because the IP address of the authorization server is not configured in the RADIUS server template.
- C. RADIUS does not support accounting. Even if an accounting server is specified in the RADIUS server template, accounting cannot be performed when terminals access the network.

- D. When a terminal uses the user name hcia-datacom@huawei.com to initiate authentication, RADIUS authentication is used.

Answer: D

Explanation:

Option D is correct. The AAA configuration binds the domain huawei.com to the authentication scheme auth1, which uses RADIUS as the authentication mode, and to the accounting scheme acc1, which also uses RADIUS. Therefore, when a user logs in with a user name in the format hcia-datacom@huawei.com, the device parses the suffix @huawei.com, matches the domain, and applies the configured RADIUS authentication method.

NEW QUESTION # 86

Which of the following information is displayed when an entered command is incomplete on the Versatile Routing Platform (VRP)?

- A. Error: Incomplete command found at 'A' position
- B. Error: Ambiguous command found at 'A' position
- C. Error: Wrong parameter found at 'A' position
- D. Error: Too many parameters found at 'A' position

Answer: A

Explanation:

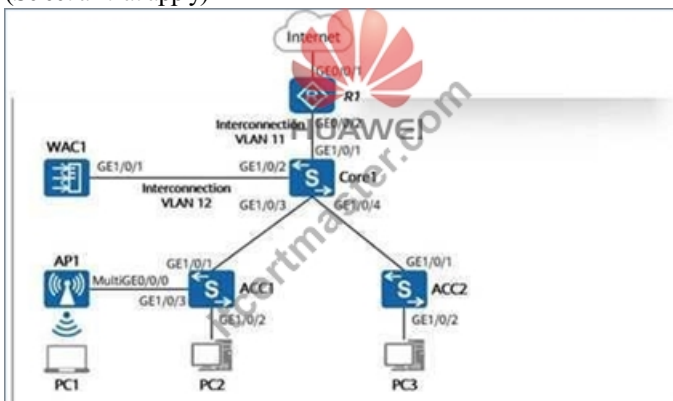

When a command entered on Huawei's Versatile Routing Platform (VRP) is incomplete, VRP generates an error message indicating that the command is incomplete at a specific position (designated by 'A'). This message helps administrators identify where additional parameters are needed to complete the command syntax. Other error messages indicate issues such as excess parameters or ambiguous commands.

NEW QUESTION # 87

On the campus network shown in the figure below, the core switch Core1 functions as a Layer 3 gateway and as a DHCP server to dynamically assign IP addresses to AP1, PC1, PC2, and PC3.

The network below Core1 is a Layer 2 network. WAC1 and R1 are connected to Core1 at Layer

3. AP1 goes online through VLAN 100. The wireless service VLAN is VLAN 101, and the wired service VLANs for PC2 and PC3 are VLAN 102 and VLAN 103, respectively. Additionally, the direct forwarding mode is used for wireless traffic forwarding. If no additional VLANs are allowed on device interfaces, which of the following VLANs must be allowed on GE1/0/1 of ACC1? (Select all that apply)

- A. VLAN 101
- B. VLAN 200
- C. VLAN 100
- D. VLAN 102

Answer: A,C,D

Explanation:

According to the original topology and service-planning question, the required VLANs are VLAN 100, VLAN 101, and VLAN 102, so options A, B, and C are correct. In HCIA-Datacom campus design questions, VLAN planning is usually based on service separation, such as user services, voice services, wireless services, management services, or specific departmental segmentation.

Each service type is assigned an appropriate VLAN so that broadcast domains are separated and policies can be applied more effectively.

NEW QUESTION # 88

Which of the following port states are included in Rapid Spanning Tree Protocol (RSTP)?

- A. Discarding
- B. Forwarding
- C. Learning
- D. Listening

Answer: A,B,C

Explanation:

RSTP (Rapid Spanning Tree Protocol) combines the Blocking, Listening, and Disabled states into Discarding, reducing the number of states to Discarding, Learning, and Forwarding. RSTP does not use a separate Listening state, as in standard STP.

NEW QUESTION # 89

Which of the following is the default value of the Router Dead Interval field in OSPF Hello packets on a broadcast network?

- A. 30 seconds
- B. 20 seconds
- C. 40 seconds
- D. 10 seconds

Answer: C

Explanation:

The default Router Dead Interval in OSPF is 40 seconds for broadcast and point-to-point networks. This interval defines the time period a router waits to receive hello packets before declaring a neighbor as down.
