Demo Juniper JN0-481 Test, Latest JN0-481 Study Materials

Good news comes that our company has successfully launched the new version of the JN0-481 guide tests. Perhaps you are deeply bothered by preparing the exam; perhaps you have wanted to give it up. Now, you can totally feel relaxed with the assistance of our JN0-481 Actual Test. It is very worthy for you to buy our product. Not only can our study materials help you pass the exam, but also it can save your much time. What are you waiting for? Follow your passion and heart.

Juniper Data Center, Specialist (JNCIS-DC) Sample Questions (Q71-Q76):

NEW QUESTION # 71

In the Apstra design phase, what is the role of DC Reference Design?

- A. It refers to the design of data center furniture layout
- B. It specifies the color scheme for network cables

- C. It provides a blueprint for the overall data center architecture and configuration
- D. It determines the placement of security cameras in the data center

Answer: C

NEW QUESTION # 72

Which two statements are correct about probes? (Choose two.)

- A. Default probes can be cloned, modified, and saved.
- B. Only the variable parameters for default probes can be edited and saved.
- C. All default probes are enabled for all blueprints.
- D. Default probes are enabled, based on the intent for a blueprint.

Answer: A,D

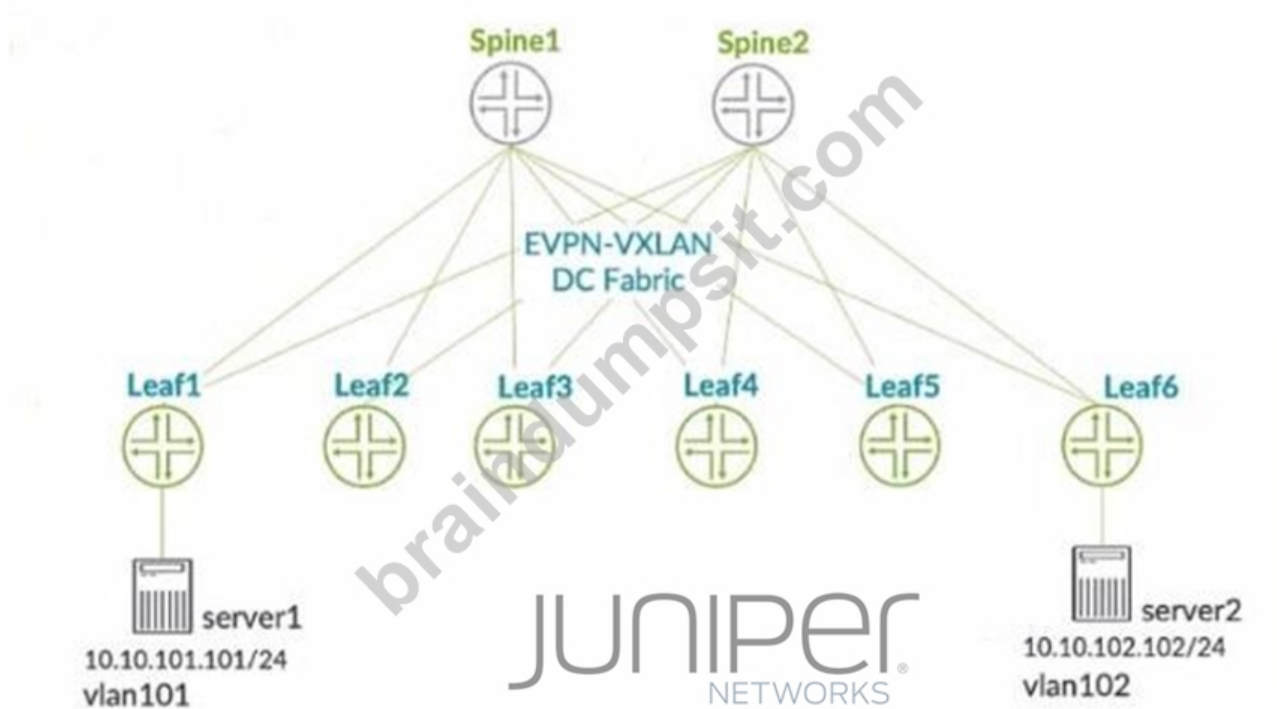

Explanation:

Probes are the basic unit of abstraction in Intent-Based Analytics (IBA). They are used to collect, process, and analyze data from the network and raise anomalies based on specified conditions.

Probes are composed of processors and stages that form a directed acyclic graph (DAG) of data flow.

NEW QUESTION # 73

You connect two single-homed servers using Juniper Apstra as shown in the exhibit. You are using the ERB design blueprint with two virtual networks in a common routing zone. In this scenario, which two types of VXLAN tunnels will be automatically created by the EVPN control plane? (Choose two.)

- A. EVPN signaled route Type-3 VXLAN tunnels
- B. EVPN signaled route Type-6 VXLAN tunnels
- C. EVPN signaled route Type-2 VXLAN tunnels
- D. EVPN signaled route Type-8 VXLAN tunnels

Answer: A,C

Explanation:

EVPN route Type-3 is used to advertise the IP address of the VTEP and the VNIs that it supports.

This allows the VTEPs to discover each other and form VXLAN tunnels for the VNIs that they have in common. EVPN route Type-2 is used to advertise the MAC and IP addresses of the hosts connected to the VTEPs. This allows the VTEPs to learn the

MAC-to-IP bindings and the MAC-to- VTEP mappings for the hosts in the same VNI. Therefore, these two types of VXLAN tunnels will be automatically created by the EVPN control plane when using Juniper Apstra with the ERB design blueprint and two virtual networks in a common routing zone.

NEW QUESTION # 74

What are two formats that the cabling map can be exported as? (Choose two.)

- A. XML
- B. HTML
- C. JSON
- D. CSV

Answer: C,D

NEW QUESTION # 75

You must configure a static route for traffic to exit a configured routing zone. In the Juniper Apstra UI, where would you accomplish this task?

- A. under Active -> Connectivity Templates
- B. under Staged -> Connectivity Templates
- C. under Staged -> Virtual -> Routing Zones
- D. under Active -> Virtual -> Routing Zones

Answer: B

Explanation:

To configure a static route for traffic to exit a configured routing zone, you need to use the Connectivity Templates feature in the Juniper Apstra UI. A Connectivity Template is a set of configuration parameters that can be applied to a device or a group of devices in a blueprint. You can use Connectivity Templates to configure static routes, BGP, OSPF, and other network services. To create a Connectivity Template, you need to go to the Staged tab and select Connectivity Templates from the left menu. Then, you can click on the + icon to create a new template. You can specify the name, description, and scope of the template. The scope determines which devices or device groups the template will be applied to. You can also specify the order of the template, which determines the priority of the template when multiple templates are applied to the same device. After creating the template, you can add configuration items to the template. To add a static route, you need to select Static Route from the drop-down menu and enter the destination network, subnet mask, and next- hop IP address. You can also specify the administrative distance and the track object for the static route. After adding the configuration items, you need to save the template and commit the changes to the blueprint.

NEW QUESTION # 76

.....

Overall we can say that Data Center, Specialist (JNCIS-DC) (JN0-481) certification can provide you with several benefits that can assist you to advance your career and achieve your professional goals. Are you ready to gain all these personal and professional benefits? Looking for a sample, is smart and quick for Data Center, Specialist (JNCIS-DC) (JN0-481) exam dumps preparation? If your answer is yes then you do not need to go anywhere, just download BraindumpsIT JN0-481 Questions and start Data Center, Specialist (JNCIS-DC) (JN0-481) exam preparation with complete peace of mind and satisfaction.

Demo JN0-481 Test: https://www.braindumpsit.com/JN0-481_real-exam.html

First of all, the PDF version JN0-481 certification materials are easy to carry and have no restrictions, The world's skilled professionals share their best knowledge with BraindumpsIT and create this set of actual JN0-481 Data Center, Specialist (JNCIS-DC) Now you don't need to spend too much time and money preparing for the Juniper JN0-481 test, Therefore, we get the test Juniper certification and obtain the qualification certificate to become a quantitative standard, and our JN0-481 learning guide can help you to prove yourself the fastest in a very short period of time.

Phishing: Attempting to criminally acquire sensitive information, Reliable JN0-481 Test Objectives such as usernames and passwords, by masquerading as trustworthy entities, application usage in Terminal Server.

First of all, the PDF version JN0-481 certification materials are easy to carry and have no restrictions, The world's skilled professionals share their best knowledge with BraindumpsIT and create this set of actual JN0-481 Data Center, Specialist (JNCIS-DC) Now you don't need to spend too much time and money preparing for the Juniper JN0-481 test.

Download Juniper JN0-481 Real Dumps And Get Free Updates

Therefore, we get the test Juniper certification and obtain the qualification certificate to become a quantitative standard, and our JN0-481 learning guide can help you to prove yourself the fastest in a very short period of time.

In addition, we provide JN0-481 free download demo for you to have a mini-try, We have long-standing relationships with industry insiders, which enables us to have JN0-481 the latest exam questions and updates as soon as certification vendors have them.
