FCP_FCT_AD-7.4 Exam Torrent & FCP_FCT_AD-7.4 Actual Test & FCP_FCT_AD-7.4 Pass Rate

It is known to us that the FCP_FCT_AD-7.4 exam has been increasingly significant for modern people in this highly competitive word, because the FCP_FCT_AD-7.4 test certification can certify whether you have the competitive advantage in the global labor market or have the ability to handle the job in a certain area, especial when we enter into a newly computer era. Therefore our FCP_FCT_AD-7.4 practice torrent is tailor-designed for these learning groups, thus helping them pass the FCP_FCT_AD-7.4 exam in a more productive and efficient way and achieve success in their workplace.

All candidates want to get Fortinet authentication in a very short time, this has developed into an inevitable trend. Each of them is eager to have a strong proof to highlight their abilities, so they have the opportunity to change their current status. It is not easy to qualify for a qualifying exam in such a short period of time. Our company's FCP_FCT_AD-7.4 Study Guide is very good at helping customers pass the exam and obtain FCP_FCT_AD-7.4 certificate in a short time, and now you can free download the demo of our FCP_FCT_AD-7.4 exam torrent from our website. You will love our FCP_FCT_AD-7.4 exam prep for sure.

>> Valid Test FCP_FCT_AD-7.4 Braindumps <<

Dumps FCP_FCT_AD-7.4 Free, FCP_FCT_AD-7.4 High Passing Score

Users who use our FCP_FCT_AD-7.4 study materials already have an advantage over those who don't prepare for the exam. Our study materials can let users the most closed to the actual test environment simulation training, let the user valuable practice effectively on FCP_FCT_AD-7.4 study materials, thus through the day-to-day practice, for users to develop the confidence to pass the exam. For examination, the power is part of pass the exam but also need the candidate has a strong heart to bear ability, so our FCP_FCT_AD-7.4 Study Materials through continuous simulation testing, let users less fear when the real test, better play out their usual test levels, can even let them photographed, the final pass exam.

Fortinet FCP - FortiClient EMS 7.4 Administrator Sample Questions (Q67-Q72):

NEW QUESTION # 67
Which two statements about ZTNA destinations are true? (Choose two.)

- A. FortiClient ZTNA destinations provides access through TCP forwarding.
- B. FortiClient ZTNA destination encryption is disabled by default.
- C. FortiClient ZTNA destinations do not support a wildcard FQDN.
- D. FortiClient ZTNA destination authentication is enabled by default.
- E. FottiClient ZTNA destinations use an existing VPN tunnel to create a secure connection.

Answer: B,C

NEW QUESTION # 68

Refer to the exhibit.

The zero trust network access (ZTNA) serial number on endpoint br-pc-1 is in a disabled state.
What is causing the problem? (Choose one answer)

- A. The ZTNA destinations endpoint profile is disabled.
- B. The ZTNA is disabled due to FortiClient disconnected from FortiClient EMS.
- C. The ZTNA certificate has been revoked by administrator.
- D. The ZTNA feature is not installed on FortiClient.

Answer: A

Explanation:
Based on theFortiClient EMS 7.2/7.4 Study Guidesand the visual evidence provided in the exhibit, here is the verified breakdown of why theZTNA Serial Numberis showing asDisabled:
1. Analysis of the Exhibit
* Operating System:The endpoint is runningLinux (Ubuntu 22.04.3 LTS).
* Connection Status:The endpoint status isOnlineandManaged by EMS. This immediately eliminates Option C, as the device is actively communicating with the EMS server.
* Features List:At the bottom right of the "Features" column, it explicitly states"ZTNA installed". This eliminatesOption A, confirming the software component is present on the endpoint.
* ZTNA Serial Number Field:The field is highlighted in red and shows"Disabled".
2. Identifying the Root Cause (Option B)
In the FortiClient EMS curriculum regardingZTNA (Zero Trust Network Access), the ZTNA Serial Number (also known as the ZTNA Tagging or Client Certificate UID) is generated and activated based on the assigned Endpoint Profile.
* Profile Dependency:For FortiClient to generate a ZTNA serial number/certificate and participate in ZTNA, the administrator must enable and configure theZTNA Destinations(or ZTNA Connection) profile within the EMS.
* Disabled State:If theZTNA Destinationsfeature is disabled in the profile assigned to that specific endpoint (or if the endpoint is assigned the "Default" profile where ZTNA is not configured), the
"ZTNA Serial Number"status on the EMS dashboard will reflect asDisabled.
* Linux Specifics:In FortiClient for Linux, ZTNA support is available but requires the profile to be explicitly pushed and active. If the profile is toggled off in the EMS GUI underEndpoint Profiles > ZTNA Destinations, the serial number functionality is suspended.
3. Why Other Options are Incorrect
* A. The ZTNA feature is not installed:The exhibit clearly shows "ZTNA installed" under the Features list.
* C. FortiClient disconnected from EMS:The exhibit shows the status as "Online" and "Managed by EMS" with a green checkmark.
* D. The ZTNA certificate has been revoked:If a certificate is revoked, the status typically shows as
"Revoked" or "Expired," or the serial number would still be present but marked as untrusted. A
"Disabled" state indicates the feature itself is turned off at the policy/profile level.

NEW QUESTION # 69
Refer to the exhibit.

Based on The settings shown in The exhibit, which statement about FortiClient behaviour is Hue?

- A. FortiClient scans infected files when the user copies files to the Resources folder.
- B. FortiClient quarantines infected ties and reviews later, after scanning them.
- C. FortiClient blocks and deletes infected files after scanning them.
- D. FortiClient copies infected files to the Resources folder without scanning them.

Answer: A

Explanation:
Based on the settings shown in the exhibit, FortiClient is configured to scan files as they are downloaded or copied to the system. This means that if a user copies files to the "Resources" folder, which is not listed under exclusions, FortiClient will scan these files for infections. The exclusion path mentioned in the settings, "C:
\Users\Administrator\Desktop\Resources", indicates that any files copied to this specific folder will not be scanned, but since the question implies that the "Resources" folder is not the same as the excluded path, FortiClient will indeed scan the files for infections.

NEW QUESTION # 70
Refer to the exhibit.

Based on the settings shown in the exhibit what action will FortiClient take when it detects that a user is trying to download an infected file?

- A. Allows the infected file to download without scan
- B. Quarantines the infected files and logs all access attempts
- C. Blocks the infected files as it is downloading
- D. Sends the infected file to FortiGuard for analysis

Answer: A

Explanation:
Block Malicious Website has nothing to do with infected files. Since Realtime Protection is OFF, it will be allowed without being scanned.
Based on the settings shown in the exhibit:
* Realtime Protection:OFF
* Dynamic Threat Detection:OFF
* Block malicious websites:ON
* Threats Detected:75
The "Realtime Protection" setting is crucial for preventing infected files from being downloaded and executed. Since "Realtime Protection" is OFF, FortiClient will not actively scan files being downloaded. The setting "Block malicious websites" is intended to prevent access to known malicious websites but does not scan files for infections.
Therefore, when a user tries to download an infected file, FortiClient will allow the file to download without scanning it due to the Realtime Protection being OFF.

NEW QUESTION # 71

An administrator is required to maintain a software vulnerability on the endpoints, without showing the feature on the FortiClient. What must the administrator do to achieve this requirement?

- A. Click the hide icon on the vulnerability scan profile assigned to endpoint
- B. Disable select the vulnerability scan feature in the deployment package
- C. Select the vulnerability scan feature in the deployment package, but disable the feature on the endpoint profile
- D. Use the default endpoint profile

Answer: A

Explanation:
* Requirement Analysis:
* The administrator needs to maintain a software vulnerability scan on endpoints without showing the feature on FortiClient.
* Evaluating Options:
* Disabling the feature in the deployment package or endpoint profile would remove the functionality entirely, which is not desired.
* Using the default endpoint profile may not meet the specific requirement of hiding the feature.
* Clicking the hide icon on the vulnerability scan profile assigned to the endpoint will keep the feature active but hidden from the user's view.
* Conclusion:
* The correct action is to click the hide icon on the vulnerability scan profile assigned to the endpoint (C).
