MikroTik Certified Network Associate Exam Sample Questions (Q177-Q182):

NEW QUESTION # 177

What is the address range of a Class B network address in binary?

- A. 110xxxxx
- B. 10xxxxxx
- C. 0xxxxxxx
- D. 01xxxxxx

Answer: A

NEW QUESTION # 178

You would like to allow multiple logins with one user name on a HotSpot server. How should this be configured?

- A. Set "Shared Users" option at /ip HotSpot
- B. It's not possible
- C. Set "only-one=no" at /ip HotSpot
- D. Set "Shared Users" option at /ip HotSpot user profile

Answer: D

Explanation:

MikroTik HotSpot user management allows defining how many simultaneous sessions a single username can support. This is done via the "Shared Users" option in the user profile configuration, not in the general HotSpot or interface settings.

MTCNA Course Material - HotSpot Section:

"Shared Users in user-profile allows multiple concurrent logins using the same username/password combination. Default is 1. If set to 3, then three sessions can be active simultaneously." Rene Meneses MTCNA Study Guide - HotSpot Configuration:

"The shared-users parameter in /ip hotspot user profile allows multiple concurrent sessions for the same user.

This is commonly used in shared environments like hotels or cafes."

Terry Combs MTCNA Notes - HotSpot Profiles:

"Shared-users is set per profile, not per user. If you want three devices to log in with the same account, set shared-users=3 in the profile assigned to that user." Option A is correct.

Option B is false - it is definitely possible.

Option C is incorrect - /ip hotspot does not contain this parameter.

Option D is invalid - "only-one" is not a known parameter in HotSpot configuration.

NEW QUESTION # 179

Mark all correct answers.

- A. Default-Forwarding could be enabled for a specific clients by wireless access-list
- B. /ip firewall filter allows to deny authentication to AP
- C. The only way to prevent wireless clients connections - disable wireless interface
- D. Wireless access-list could allow and deny connect to your AP

Answer: D

NEW QUESTION # 180

What is the correct action for a NAT rule on a router that should intercept SMTP traffic and send it over to a specified mail server?

- A. redirect
- B. dst-nat
- C. passthrough
- D. tarpit

Answer: A

NEW QUESTION # 181

What protocol does ping use?

- A. ARP
- B. TCP
- C. UDP
- D. ICMP

Answer: D

NEW QUESTION # 182
