

PEGACPLSA23V1 Interactive Questions | Latest PEGACPLSA23V1 Test Report

BTW, DOWNLOAD part of Exam-Killer PEGACPLSA23V1 dumps from Cloud Storage: <https://drive.google.com/open?id=1UnPeNDD-LuodA05jfxLo-QIPr1dN0ey9>

Exam-Killer offers actual and updated PEGACPLSA23V1 Dumps after seeing the students struggling to prepare quickly for the test. We have made this product after consulting with a lot of professionals so the students can be successful. Exam-Killer has hired a team of professionals who work on a daily basis without caring about themselves to update the Pegasystems PEGACPLSA23V1 practice material.

Pegasystems PEGACPLSA23V1 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> • Deployment and Testing Design: Follow best practices for production deployment. Plan and build CI • CD pipelines. Design testing strategies and use automation to maintain quality. Track and assess release performance effectively.
Topic 2	<ul style="list-style-type: none"> • Security Design: Choose the right authentication and access models based on the situation. Configure access groups, roles, and role hierarchies. Understand rule-level security. Spot and prevent security threats. Apply best practices to secure applications and use event logging for monitoring.
Topic 3	<ul style="list-style-type: none"> • Data Model Design: Understand how data relationships work. Build new data models or extend existing ones. Use data pages and virtualization to manage information. Design reusable and reliable data structures. Learn dynamic class referencing and polymorphism. Extend and benefit from Pega's industry foundation models.
Topic 4	<ul style="list-style-type: none"> • Application Design Extended: Manage work assignment and routing, and use features like Get Next Work. Explore different ways to allocate tasks. Handle mid-case flow changes and fix issues using problem flows. Implement background processing, job schedulers, queue processors, and asynchronous integrations. Understand how to use stream services, data flows, and datasets in Pega Infinity.
Topic 5	<ul style="list-style-type: none"> • Application Design: Learn how Microjourneys guide app design. Understand case structure, Pega Express methods, and best practices. Create case hierarchies, and use rulesets, classes, and specialisation wisely. Apply layered design for scalable solutions.
Topic 6	<ul style="list-style-type: none"> • Pega Platform Design Extended: Use App Studio for app development. Understand features of Prediction Studio and Admin Studio. Reuse relevant components efficiently. Grasp the basics of UX design, DX API, and Constellation. Design accessible and user-friendly experiences.

- Reporting Design: Create reports that meet business needs and support performance. Troubleshoot reporting issues. Write queries, use SQL functions, and combine data through joins, subreports, and associations.

First-class PEGACPLSA23V1 Preparation Materials: Certified Pega Lead System Architecture (LSA) Exam 23, Deliver You the High-quality Exam Dumps

We have a professional team to collect the first-hand information for the PEGACPLSA23V1 study materials. We can ensure you that what you receive is the latest version for the PEGACPLSA23V1 exam dumps. We are strict with quality and answers of exam dumps. Besides, we offer you free update for one year, and you can get the latest information about PEGACPLSA23V1 Exam Dumps. We also have online and offline chat service stuff to answer all the questions. If you have any questions about PEGACPLSA23V1 exam materials, just contact us, we will give you reply as soon as we can.

Pegasystems Certified Pega Lead System Architecture (LSA) Exam 23 Sample Questions (Q15-Q20):

NEW QUESTION # 15

A purchase order application allows users in their work group to read and write purchase request cases. When the total amount exceeds USD 10,000 however, only the work group manager can read and write the case.

Select two configuration that satisfy the requirement (choose two)

- A. Add a privilege to the case type class that is conditionally granted when the purchase request amount is less than USD 10,000.
- B. Use a reads access control policy with a condition that verifies the amount is less than USD 10,000.
- C. Configure the worklist to only display purchase requests greater than USD 10,000 for the work group manager.
- D. Configure conditional access in Access Manager to read and write a purchase request case when the amount is less than USD 10,000.

Answer: B,C

NEW QUESTION # 16

Which three of the following options are flow-related assignment properties that can be used to identify assignments for cases in flight? (Choose Three)

- A. pyLockInterval
- B. UrgencyAdjust
- C. pxTaskName
- D. pyInterestPageClass
- E. pxTaskName

Answer: C,D,E

NEW QUESTION # 17

The ABC trip planner company offers a variety of services, for example, hotel bookings, flight bookings, and train bookings, all on a single platform. All the services offered have their invoice processing managed by a dedicated team of accounting specialists from the XYZ financial accounting organization. Every booking made by a customer creates a "Booking" case, which manages the booking of the required service. An

"Invoice" case is also created for the verification and validation of all payments to the various stakeholders involved. For security reasons, the Invoice case contains limited information and cannot be a child case of Booking. Both are siblings that update each other. Which one of the following is the best possible solution to implement this requirement?

- A. Have a data object that connects both the sibling cases. Use a Job Scheduler that runs every one minute to query records from the data object and update the sibling case as required. Use system context to gain access to the sibling case.
- **B. Have a data object that connects both the sibling cases. Use a queue processor (Dedicated/Standard) to process the record for status updates. Update the security context while queuing with the appropriate access group to gain access to the sibling case.**
- C. Have a data object that connects both the sibling cases. Use a Job Scheduler that runs every one minute to query records from the data object and update the sibling case as required.
- D. Have a data object that connects both the sibling cases. Use a queue processor (Dedicated/Standard) to process the record for status updates. Use the current operator access group context while queuing to update the case.

Answer: B

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Pega's asynchronous processing capabilities, as taught in Pega Academy's Lead System Architect Mission and the Pega Certified Lead System Architect Study Guide, include queue processors for efficient, event-driven processing of tasks. For sibling cases needing to update each other without a parent-child relationship, a queue processor is ideal for handling updates asynchronously while addressing security constraints.

* Option A (Incorrect): Using a Job Scheduler to poll every minute is inefficient and resource-intensive, as it may process unnecessary updates. Additionally, using system context for case access bypasses security controls, which is not recommended for sensitive financial data, per the Security Design module.

* Option B (Incorrect): Similar to Option A, a Job Scheduler polling every minute is suboptimal for real-time updates. It also lacks mention of security context, which is critical given the requirement for secure access to sibling cases, as noted in the Asynchronous Processing guidelines.

* Option C (Correct): Using a queue processor (Dedicated or Standard) to process updates via a data object connecting the sibling cases is optimal. Queue processors handle event-driven updates efficiently, and updating the security context with the appropriate access group ensures secure access to the Invoice case. This aligns with Pega's best practices for asynchronous processing and security, as outlined in the Queue Processor module.

* Option D (Incorrect): Using the current operator's access group for queuing risks insufficient permissions, as the operator may not have access to the Invoice case. Explicitly setting the security context (as in Option C) is necessary for secure cross-case updates, per the Security Design guidelines.

:

Pega Academy: Lead System Architect Mission (covers queue processors and security context).

Pega Community: Queue Processor Configuration (details on event-driven processing).

Pega Certified Lead System Architect Study Guide (v23): Section on Work Delegation and Asynchronous Processing (emphasizes queue processors for case updates).

NEW QUESTION # 18

In which scenarios should you use circumstance, class, ruleset, and application specialization?

(Select all that apply)

- **A. Circumstance: When customizing a specific case type for a unique business scenario.**
- B. Ruleset: When defining user interface elements for a single application.
- **C. Class: When creating a reusable data model for multiple case types.**
- D. Application specialization: When extending the functionality of an existing Pega product.

Answer: A,C

NEW QUESTION # 19

You are configuring authentication for a Pega web mashup implementation.

How do you ensure the host system origin is trusted?

- **A. in the application definition, specify the protocol, host, and port**
- B. in the content security policy record specify the website as allowed
- C. in the authentication service JNDI binding parameters, specify the protocol, host, and port.
- D. in the authentication service specify the IACAAuthVerification activity

Answer: A

NEW QUESTION # 20

.....

As a market leader, our company is able to attract quality staffs, it actively seeks out those who are energetic, persistent, and professional to various PEGACPLSA23V1 certificate and good communicator. And we strongly believe that the key of our company's success is its people, skills, knowledge and experience. Over 50% of the account executives and directors have been with the Group for more than ten years. The successful selection, development and PEGACPLSA23V1 training of personnel are critical to our company's ability to provide a high pass rate of PEGACPLSA23V1 exam questions for you to pass the PEGACPLSA23V1 exam
