

TestkingPass's Exam Questions Help You Get Microsoft AZ-800 Certification with Ease

EDUSUM.COM
Get complete detail on AZ-800 exam guide to crack Microsoft Administering Windows Server Hybrid Core Infrastructure. You can collect all information on AZ-800 tutorial, practice test, books, study material, exam questions, and syllabus. Firm your knowledge on Microsoft Administering Windows Server Hybrid Core Infrastructure and get ready to crack AZ-800 certification. Explore all information on AZ-800 exam with number of questions, passing percentage and time duration to complete test.

P.S. Free 2026 Microsoft AZ-800 dumps are available on Google Drive shared by TestkingPass: <https://drive.google.com/open?id=1vOvLCEgpgVQDSJOZevA0wO19o1rgAPd4>

The Administering Windows Server Hybrid Core Infrastructure (AZ-800) practice exam software in desktop and web-based versions has a lot of premium features. One of which is the customization of Administering Windows Server Hybrid Core Infrastructure (AZ-800) practice exams. The AZ-800 Practice Tests are specially made for the customers so that they can practice unlimited times and improve day by day and pass Microsoft AZ-800 certification exam with good grades.

It is not easy to qualify for a qualifying exam in such a short period of time. Our company's AZ-800 learning material is very good at helping customers pass the exam and obtain a certificate in a short time, and now I'm going to show you our AZ-800 Learning materials. Our products mainly include the following major features. This is a wise choice, after using our AZ-800 Training Materials, you will realize your dream of a promotion because you deserve these reports and your efforts will be your best proof.

AZ-800 Online Exam - Valid AZ-800 Test Sims

With limited time for your preparation, many exam candidates can speed up your pace of making progress. Our AZ-800 practice materials will remedy your faults of knowledge understanding. Many customers get manifest improvement and lighten their load. As we know, some people failed the exam before, and lost confidence in this agonizing exam before purchasing AZ-800 Training Materials. We are here divide grieves with you. You can abandon the time-consuming thought from now on. In contrast, they will inspire your potential without obscure content to feel. After getting our AZ-800 exam prep, you will not live under great stress during

the exam period.

The AZ-800 Exam covers a range of topics, including managing Azure resources, implementing and managing hybrid identities, managing hybrid networking, and implementing and managing hybrid storage solutions. Candidates are required to have a good understanding of Windows Server administration, Azure services, and hybrid infrastructure to pass the exam. Administering Windows Server Hybrid Core Infrastructure certification is ideal for IT professionals who want to enhance their skills in managing hybrid environments and gain recognition for their expertise in administering Windows Server core infrastructure.

Skills measured

- The English language version of this exam will be updated on August 3, 2022. Download the study guide in the preceding “Tip” box for more details about the skills measured on this exam.
- Manage Windows Servers and workloads in a hybrid environment (10-15%)
- Deploy and manage Active Directory Domain Services (AD DS) in on-premises and cloud environments (30-35%)
- Manage storage and file services (15-20%)

Microsoft Administering Windows Server Hybrid Core Infrastructure Sample Questions (Q150-Q155):

NEW QUESTION # 150

Your network contains an Active Directory Domain Services (AD DS) domain. The domain contains two servers named Server1 and Server2 and the users shown in the following table.

Name	Member of
User1	Contoso\Administrators
User2	Contoso\Remote Management Users
User3	Server2\Administrators
User4	Server2\Remote Management Users

Which users can establish a PowerShell remoting session from Server1 to Server2?

- A. User3 and User4 only
- **B. User1, User2, User3, and User4**
- C. User1, User3, and User4 only
- D. User1 and User3 only
- E. User2 and User4 only

Answer: B

NEW QUESTION # 151

You need to configure Azure File Sync to meet the file sharing requirements. What should you do? To answer, select the appropriate options in the answer area. NOTE Each correct selection is worth one point.

Answer Area

Minimum number of sync groups to create:

1
2
3
4

Minimum number of Storage Sync Services to create:

1
2
3
4

Minimum number of Storage Sync Services to create:

1
2
3
4

Answer:

Explanation:

Answer Area

Microsoft

Minimum number of sync groups to create:

Minimum number of Storage Sync Services to create:

Minimum number of Storage Sync Services to create:

<https://docs.microsoft.com/en-us/azure/storage/file-sync/file-sync-planning>

NEW QUESTION # 152

Your network contains an Active Directory Domain Services (AD DS) domain- The domain contains 10 servers that run Windows Server. The servers have static IP addresses.

You plan to use DHCP to assign IP addresses to the servers.

You need to ensure that each server always receives the same IP address.

Which type of identifier should you use to create a DHCP reservation for each server?

- A. universally unique identifier (UUID)
- B. fully qualified domain name (FQDN)
- C. MAC address
- D. NetBIOS name

Answer: C

Explanation:

Reference:

<https://docs.microsoft.com/en-us/powershell/module/dhcpserver/add-dhcpserverv4reservation?view=windowsserver2022-ps>

NEW QUESTION # 153

Your network contains an on-premises Active Directory Domain Services (AD DS) domain. The domain contains a user named User1 and the servers shown in the following table.

Name	Operating system
Server1	Windows Server 2016
Server2	Windows Server 2022
Backup1	Windows Server 2019

User1 is a member of the Protected Users security group.

User1 performs the following actions:

- From Server1, establishes a remote PowerShell session on Server2
- From the PowerShell session on Server2, attempts to access a resource on Backup1 The request to access the resource on Backup1 is denied.

You need to ensure that User1 can access the resources on Backup1 by using the PowerShell session on Server2. The solution must follow the principle of least privilege and minimize administrative effort.

What should you configure?

- A. PSSessionConfiguration by using RunAs
- B. CredSSP
- C. resource-based Kerberos constrained delegation
- D. Kerberos delegation (unconstrained)

Answer: C

Explanation:

This scenario requires double-hop authentication from Server1 to Server2 via PowerShell, then from Server2 to Backup1 for resource access. Resource-based Kerberos constrained delegation is the most appropriate solution as it follows the principle of least privilege by configuring delegation at the resource level (Backup1) and minimizes administrative effort without requiring domain

admin rights.

NEW QUESTION # 154

Which groups can you add to Group3 and Group5? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Group3:	
	Group6 only
	Group1 and Group2 only
	Group1 and Group4 only
	Group1, Group2, Group4, and Group5 only
	Group1, Group2, Group4, Groups, and Group6

Group5:	
	Group1 only
	Group4 only
	Group6 only
	Group2 and Group4 only
	Group4 and Group6 only

Answer:

Explanation:

Group3:	
	Group6 only
	Group1 and Group2 only
	Group1 and Group4 only
	Group1, Group2, Group4, and Group5 only
	Group1, Group2, Group4, Groups, and Group6

Group5:	
	Group1 only
	Group4 only
	Group6 only
	Group2 and Group4 only
	Group4 and Group6 only
