NEW QUESTION # 111

Which role can configure the parameters of the demand workbench that is provided with the base system?

- A. All roles.
- B. business_stakeholder.
- C. it_project_manager.
- D. it_pps_admin.

Answer: D

Explanation:

Explanation

According to the Demand Workbench document, the role that can configure the parameters of the demand workbench that is provided with the base system is it_pps_admin. This role grants access to the Project Portfolio Suite application and allows the user to configure the demand workbench settings, such as the axes, the quadrants, the bubble size, and the color. The other options are not correct, as they are not roles that can configure the parameters of the demand workbench. The all roles option is too broad and does not specify a particular role. The business_stakeholder role grants access to the Business Stakeholder Portal and allows the user to view and submit demands. The it_project_manager role grants access to the Project Portfolio Management application and allows the user to create and update projects.

NEW QUESTION # 112

Under the Preferences tab on the Demand form, you have the option to:

Choose 2 answers

- A. close a demand on creation of a project
- B. Add a risk score
- C. Add a financial benefit
- D. Close a demand on closure of a project

Answer: A,D

NEW QUESTION # 113

To set up a group for selection in a resource plan, the group record needs to include which role?

- A. resource_manager
- B. pps_resource
- C. it_project_user

- D. itil

Answer: B

Explanation:

Explanation

According to the Assigning Resource Roles document, to set up a group for selection in a resource plan, the group record needs to include the pps_resource role. This role grants access to the Resource Management application and allows the group members to view and update their resource allocations. The other options are not correct, as they are not required for a group to be selected in a resource plan. The it_project_user role grants access to the Project Portfolio Management application and allows the user to create and update projects. The itil role grants access to the ITIL application and allows the user to manage incidents, problems, and changes. The resource_manager role grants access to the Resource Management application and allows the user to manage resource plans and allocations.
