It provides a solid foundation for individuals who want to pursue advanced certifications in cloud computing. AZ-900 exam is also a great way to validate your knowledge and skills in cloud computing and Microsoft Azure services.
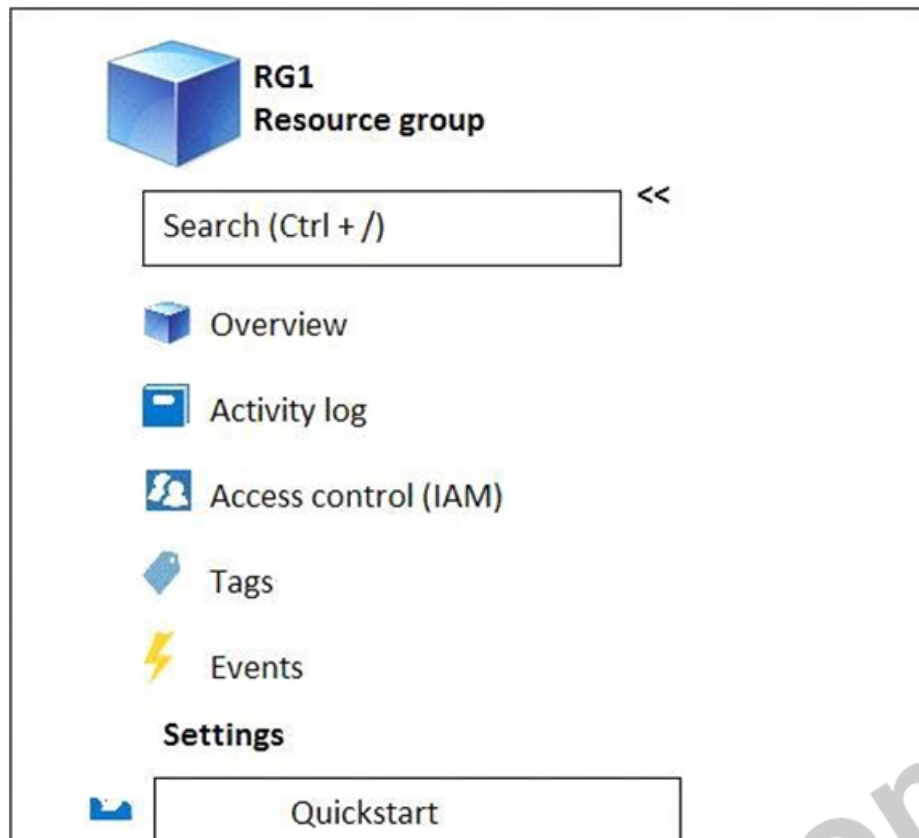

# Microsoft Azure Fundamentals Sample Questions (Q481-Q486):

NEW QUESTION # 481
You create a resource group named RG1 in Azure Resource Manager.
You need to prevent the deletion of the resources in RG1.
Which setting should you use? To answer, select the appropriate setting in the answer area.

Resource costs

Deployments

Policies

Properties

Locks

Automation script

Monitoring

Insights(preview)

Alerts

Metrics

Diagnostic settings
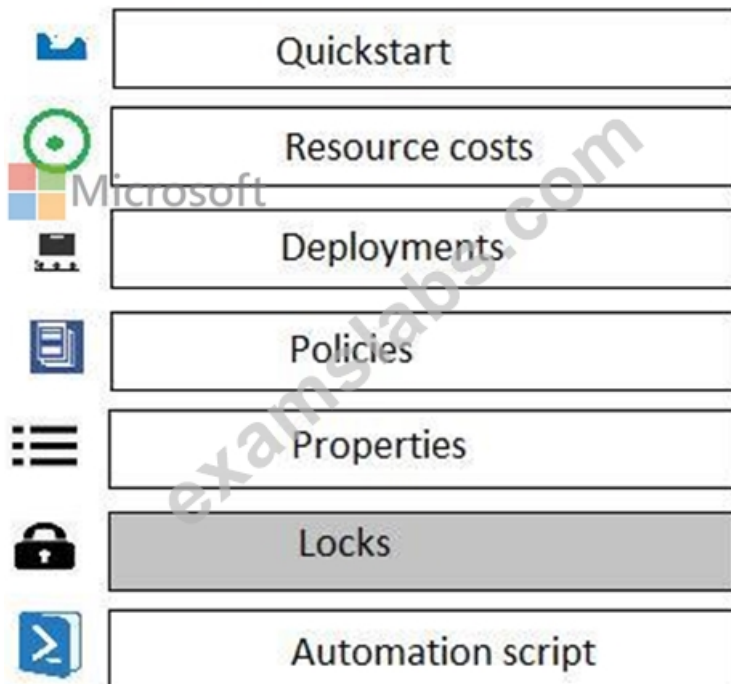

Advisor recommendations

Support + troubleshooting

New support request

Answer:

Explanation:

Explanation

Settings

	Quickstart
	Resource costs
	Deployments
	Policies
	Properties
	Locks
	Automation script

You can configure a lock on a resource group to prevent the accidental deletion.

As an administrator, you may need to lock a subscription, resource group, or resource to prevent other users in your organization from accidentally deleting or modifying critical resources. You can set the lock level to CanNotDelete or ReadOnly. In the portal, the locks are called Delete and Read-only respectively.

CanNotDelete means authorized users can still read and modify a resource, but they can't delete the resource.

ReadOnly means authorized users can read a resource, but they can't delete or update the resource.

Applying this lock is similar to restricting all authorized users to the permissions granted by the Reader role.

NEW QUESTION # 484
Match the Azure service to the correct description.
Instructions: To answer, drag the appropriate Azure service from the column on the left to its description on the right. Each service may be used once, more than once, or not at all NOTE: Each correct match is worth one point.

Services		Answer Area	
Azure Functions		Service	Provide operating system virtualization
Azure App Service		Service	Provide portable environment for virtualized applications
Azure virtual machines		Service	Used to build, deploy, and scale web apps
Azure Container Instances		Service	Provide a platform for serverless code

Answer:

Explanation:

Services		Answer Area	
Azure Functions		Azure Functions	Provide operating system virtualization
Azure App Service		Azure App Service	Provide portable environment for virtualized applications
Azure virtual machines		Azure virtual machines	Used to build, deploy, and scale web apps
Azure Container Instances		Azure Container Instances	Provide a platform for serverless code

Answer Area

Azure Functions	Provide operating system virtualization
Azure App Service	Provide portable environment for virtualized applications
Azure virtual machines	Used to build, deploy, and scale web apps
Azure Container Instances	Provide a platform for serverless code

NEW QUESTION # 485

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Microsoft SQL Server 2019 installed on an Azure virtual machine is an example of platform as a service (PaaS).	○	○
Azure SQL Database is an example of platform as a service (PaaS).	○	○
Azure Cosmos DB is an example of software as a service (SaaS).	○	○

Answer:

Explanation:

Statements	Yes	No
Microsoft SQL Server 2019 installed on an Azure virtual machine is an example of platform as a service (PaaS).	○	◉
Azure SQL Database is an example of platform as a service (PaaS).	◉	○
Azure Cosmos DB is an example of software as a service (SaaS).	○	◉

Explanation:

Answer Area

Statements	Yes	No
Microsoft SQL Server 2019 installed on an Azure virtual machine is an example of platform as a service (PaaS).	○	◉
Azure SQL Database is an example of platform as a service (PaaS).	◉	○
Azure Cosmos DB is an example of software as a service (SaaS).	○	◉
