Salesforce Certified MuleSoft Platform Integration Architect Sample Questions (Q165-Q170):

NEW QUESTION # 165

An organization is designing an integration solution to replicate financial transaction data from a legacy system into a data warehouse (DWH).

The DWH must contain a daily snapshot of financial transactions, to be delivered as a CSV file. Daily transaction volume exceeds tens of millions of records, with significant spikes in volume during popular shopping periods.

What is the most appropriate integration style for an integration solution that meets the organization's current requirements?

- A. Batch-triggered data integration
- B. Splitter-Aggregator Integration Pattern
- C. Microservice architecture
- D. Event-driven architecture

Answer: A

NEW QUESTION # 166

An organization is trying to invoke REST APIs as part of its integration with external systems, which requires OAuth 2.0 tokens for authorization.

How should authorization tokens be acquired in a Mule application?

- A. Write custom Java code for handling authorization tokens
- B. Use HTTP Connector's Authentication Feature
- C. Configure OAuth 2.0 in Client Management in Anypoint Platform
- D. Implement Scheduler-based flow for retrieving/saving OAuth 2.0 tokens in Object Store

Answer: B

NEW QUESTION # 167

Additional nodes are being added to an existing customer-hosted Mule runtime cluster to improve performance. Mule applications deployed to this cluster are invoked by API clients through a load balancer.

What is also required to carry out this change?

- A. New firewall rules must be configured to accommodate communication between API clients and the new nodes
- B. API impleme
- C. A new load balancer entry must be configured to allow traffic to the new nodes
- D. External monitoring tools or log aggregators must be configured to recognize the new nodes

Answer: D

NEW QUESTION # 168

An organization's release engineer wants to override secure properties in a CloudHub production environment. Properties can be updated in the Properties tab in Runtime Manager, but the password is not being hidden even after the application is restarted or redeployed.

What could be the reason?

- A. The secureProperties key in the mule-artifact.json file does not list properties
- B. Properties do not exist in the prod properties file
- C. Properties need to be prefixed with a secure keyword when entered in the Properties tab
- D. In a secure-prod.yaml file properties are not marked secure

Answer: A

NEW QUESTION # 169

When designing Mule applications, what is a common feature of core connectors? (Choose Two)

- A. They always enable transaction management.
- B. They support both synchronous and asynchronous communication.
- C. They can interact with different types of systems and APIs.
- D. They require custom coding for error handling.

Answer: B,C

NEW QUESTION # 170

.....

It is our company that can provide you with special and individual service which includes our Mule-Arch-202 preparation quiz and good after-sale services. Our experts will check whether there is an update every day, so you needn't worry about the accuracy of Mule-Arch-202 Study Materials. If there is an update system, we will send them to the customer automatically. As is known to all, our Mule-Arch-202 simulating materials are high pass-rate in this field, that's why we are so famous.
