P.S. Free & New 300-425 dumps are available on Google Drive shared by Exam4Labs: <https://drive.google.com/open?id=1kY9Wr9F-d3zk4Xe5ITuUfalFMGO2MOXp>

In order to make the exam easier for every candidate, Exam4Labs compiled such a study materials that allows making you test and review history performance, and then you can find your obstacles and overcome them. In addition, once you have used this type of 300-425 Exam Question online for one time, next time you can practice in an offline environment. It must be highest efficiently 300-425 exam tool to help you pass the exam.

Cisco 300-425 exam is intended for wireless network engineers, network administrators, and network architects who want to advance their career in the field of wireless networking. 300-425 exam is part of the CCNP Enterprise certification track, which is a professional-level certification that demonstrates the candidate's expertise in enterprise networking solutions. Passing the 300-425 exam along with the core exam (350-401) and one concentration exam is required to earn the CCNP Enterprise certification. 300-425 Exam consists of 60-70 multiple-choice and simulation questions and has a duration of 90 minutes.

The Cisco 300-425 exam consists of 60-70 multiple-choice questions that must be completed within 90 minutes. It is conducted by Pearson VUE, a leading provider of computer-based testing and assessment services. To pass the exam, candidates must score at least 750 out of 1000 points. 300-425 exam fee is \$300, and it can be taken at any Pearson VUE testing center worldwide.

Marvelous Test 300-425 Dumps Demo & Leader in Qualification Exams &

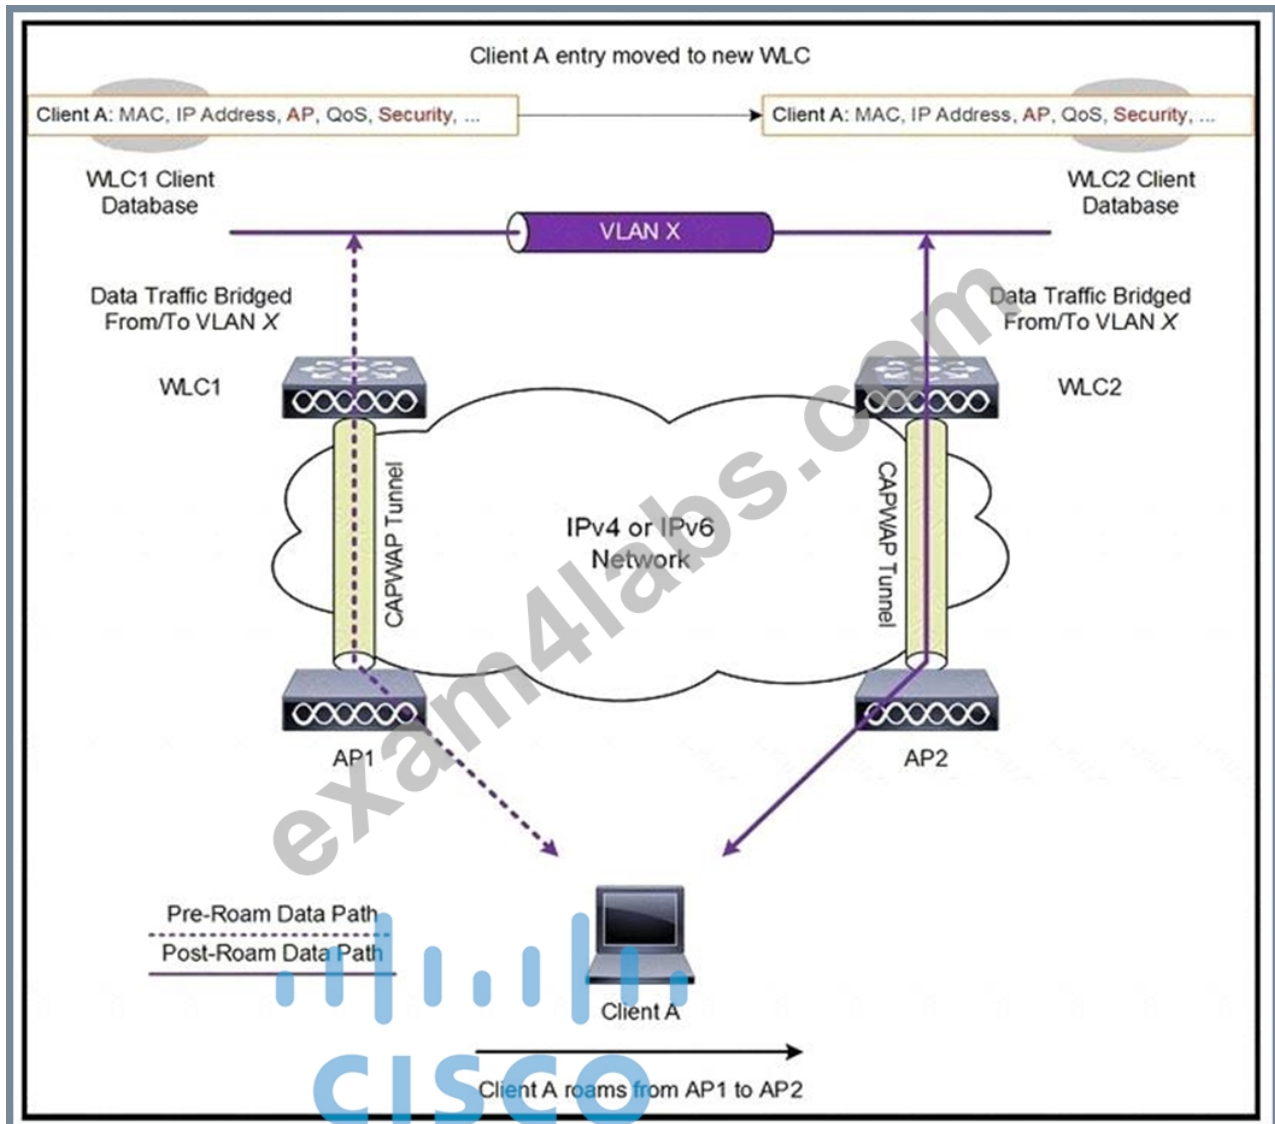

100% Pass-Rate 300-425: Designing Cisco Enterprise Wireless Networks

Our website offer standard 300-425 practice questions that will play a big part in the certification exam. Valid 300-425 exam answers and questions are fully guaranteed and enough for you to clear test easily. Free demo of 300-425 Dumps PDF allowing you to try before you buy and one-year free update will be allowed after purchased. Please feel free to contact us if you have any questions about our dumps files.

Cisco Designing Cisco Enterprise Wireless Networks Sample Questions (Q110-Q115):

NEW QUESTION # 110

Refer to the exhibit.

A client roams between two APs that are registered to two different controllers, where each controller has an interface in the client subnet. Both controllers are running AireOS. Which scenario explains the client roaming behavior?

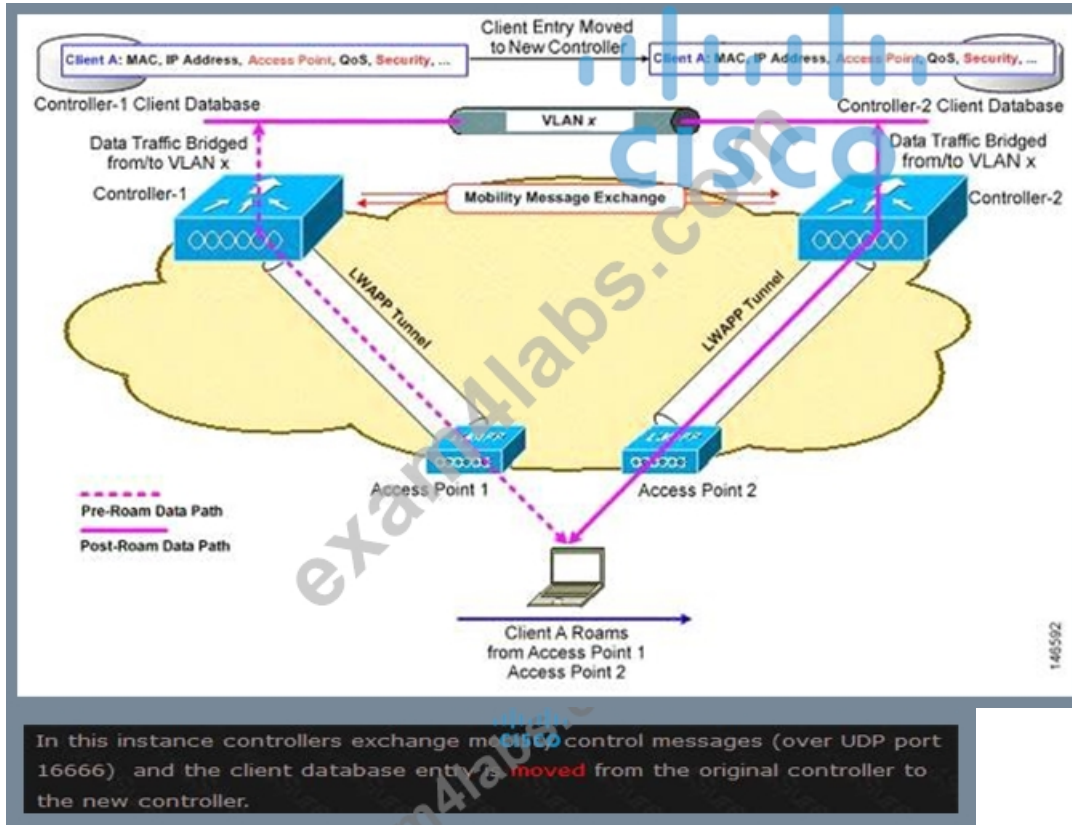

- A. Controllers do not exchange mobility control messages (over UDP port 16666) and the client database entry is not moved from the original controller to the new controller.
- B. Controllers exchange mobility control messages (over UDP port 16666) and the client database entry is tunneled from the original controller to the new controller.
- C. Controllers exchange mobility control messages (over UDP port 16666) and the client database entry is moved from the original controller to the new controller.
- D. Controllers exchange mobility control messages (over UDP port 16666) and a new client session is started with the new controller.

Answer: C

Explanation:

When a client roams between two access points (APs) that are registered to different controllers with interfaces in the same client subnet, the controllers will exchange mobility control messages over UDP port 16666. This is in accordance with the Designing Cisco Enterprise Wireless Networks (ENWLSD) guidelines.

The purpose of these messages is to ensure seamless roaming, where the client's session and authentication state are transferred from one controller to another without requiring re-authentication or re-association by the client. The mobility control messages facilitate the coordinated transfer of the client database entry from the original controller to the new one, maintaining a consistent experience for the user.

NEW QUESTION # 111

A network administrator at a large university with multiple campuses uses Cisco 9800 WLCs to manage their wireless network. Recently, the university deployed a new mobility group to improve seamless roaming for users across different campuses. To validate that everything is functioning correctly, which action should the administrator take to identify the reason why the data path is active but the control path is down?

- A. Use the show wireless mobility ap-list command on the WLC to ensure the proper addition of access points in the mobility tunnel.
- B. Inspect the mobility tunnels by running a capture on the virtual interface, verifying that data and control paths are established and active.
- C. Inspect show wireless management trustpoint and show crypto pki trustpoints commands to verify the certificate information.
- D. Check the mobility status and statistics on the WLC CLI using the show wireless mobility peer Ip command and verify that the state is UP for all mobility peers.

Answer: D

NEW QUESTION # 112

A customer has two Cisco 550B WLCs that manage all the access points in their network and provide N+1 redundancy and load balancing. The primary Cisco WLC has 60 licenses and the secondary Cisco WLC has 40. The customer wants to convert the N+1 model to an HA model and provide SSO. Configuration must be performed during a maintenance window. After performing all the configurations on both controllers, the config redundancy unit secondary command is issued on the secondary Cisco WLC and it fails.

Which parameter needs to be in place to complete the configuration?

- A. The secondary Cisco WLC needs a minimum of 50 base licenses
- B. A cable in the RP port
- C. The primary Cisco WLC is already set as the secondary unit.
- D. SSO needs to be enabled

Answer: A

Explanation:

If you want to convert any existing WLC as a Standby WLC, do so using the config redundancy unit secondary command in the CLI. This CLI command will only work if the WLC which is intended to work as Standby has some number of permanent license count. This condition is only valid for the 5508 WLC, where a minimum of 50 AP Permanent licenses are needed to be converted to Standby. There is no restriction for other WLCs such as the 5520, WiSM2, 7500, and 8500.

https://www.cisco.com/c/en/us/td/docs/wireless/controller/technotes/8-7/High_Availability_DG.html

NEW QUESTION # 113

An engineer has successfully configured high availability and SSO using two Cisco 5508 Wireless LAN Controllers. The engineer can access the Active Primary WLC, but the Secondary Standby WLC is not accessible. Which two methods allow access to the standby unit? (Choose two.)

- A. SSH to the service port interface
- B. SSH to the management interface of the primary WLC
- C. SSH to the redundancy management interface of the primary WLC
- D. SSH to the virtual interface of the secondary WLC
- E. via the console connection

Answer: A,E

Explanation:

In a high availability setup with Cisco 5508 Wireless LAN Controllers, the standby controller can be accessed via the console connection and the service port interface. The console provides direct access, while the service port interface allows for network-based access to the standby unit for management purposes.

Once SSO is enabled, the Standby WLC can be accessed via console connection or via SSH on the service port and on the redundant management interface.

NEW QUESTION # 114

An engineer is designing a wireless network that will support many different types of wireless clients. When conducting the survey, which client must be used to ensure a consistent experience for all of the wireless clients?

- A. the client that is used least by the company
- B. the client that has the highest RF properties
- C. the client with the worst RF characteristics
- D. the client that is used most by the company

Answer: D

NEW QUESTION # 115

.....

There may be a lot of people feel that the preparation process for 300-425 exams is hard and boring, and hard work does not necessarily mean good results, which is an important reason why many people are afraid of examinations. Today, our 300-425 Exam Materials will radically change this. High question hit rate makes you no longer aimless when preparing for the exam, so you just should review according to the content of our 300-425 study guide prepared for you.
