300-740 Examinations Actual Questions - Real 300-740 Questions

People need to increase their level by getting the Cisco 300-740 certification. If you take an example of the present scenario in this competitive world, you will find people struggling to meet their ends just because they are surviving on low-scale salaries. Even if they are thinking about changing their jobs, people who are ready with a better skill set or have prepared themselves with Cisco 300-740 Certification grab the chance.

Cisco Designing and Implementing Secure Cloud Access for Users and Endpoints Sample Questions (Q23-Q28):

NEW QUESTION # 23

Implementing endpoint posture policies is crucial for:

- A. Ensuring devices comply with security standards before accessing the network
- B. Decreasing network traffic
- C. Allowing all devices to access network resources without checks
- D. Making the network accessible without a password

Answer: A

NEW QUESTION # 24

The use of a reverse proxy in cloud security is important for:

- A. Simplifying the network by removing the need for firewalls
- B. Directly exposing application servers to the internet
- C. Providing an additional layer of abstraction and control to ensure the security of backend servers
- D. Only logging HTTP/HTTPS traffic

Answer: C

NEW QUESTION # 25

What role does the security operations toolset play in the SAFE architectural framework?

- A. To manage security across different secure domains and places in the network
- B. To encrypt all network traffic
- C. To ensure compliance with physical security standards
- D. It is not part of the SAFE framework

Answer: A

NEW QUESTION # 26

Cisco Secure Workload is particularly effective for:

- A. Enforcing security policies dynamically based on workload behavior
- B. Reducing visibility into workload communications
- C. Ignoring changes in the threat landscape
- D. Implementing microsegmentation to protect against lateral movement

Answer: A,D

NEW QUESTION # 27

Refer to the exhibit. An engineer must configure the Cisco ASA firewall to allow the client with IP address 10.1.0.6 to access the Salesforce login page at <https://www.salesforce.com>. The indicated configuration was applied to the firewall and public DNS 4.4.4.4 is used for name resolution; however, the client still cannot access the URL. What should be done to meet the requirements?

- A. Remove rule 7
- B. Remove rule 3
- C. Move rule 5 to the top
- D. Move rule 6 to the top

Answer: B

Explanation:

Rule 3 denies all DNS traffic from the subnet 10.1.0.0/30, which includes the client at 10.1.0.6. Since DNS resolution is required to resolve www.salesforce.com, this DNS deny rule is preventing the client from obtaining the IP address needed for HTTPS connection. Removing Rule 3 allows DNS traffic from the client, while Rule 4 permits it specifically for the 4.4.4.4 DNS server. As per SCAZT Section 3: Network and Cloud Security (Pages 70-73), DNS resolution must be allowed before HTTPS connectivity is attempted. Rule priority and traffic dependency should always be considered in firewall design. Reference: Designing and Implementing Secure Cloud Access for Users and Endpoints (SCAZT), Section 3, Pages 70-73

NEW QUESTION # 28

.....

Our 300-740 quiz torrent boost 3 versions and they include PDF version, PC version, App online version. Different version boosts different functions and using method. For example, the PDF version is convenient for the download and printing our 300-740 exam torrent and is easy and suitable for browsing learning. And the PC version of 300-740 Quiz torrent can stimulate the real exam's scenarios, is stalled on the Windows operating system. You can use it any time to test your own Exam stimulation tests scores and whether you have mastered our 300-740 exam torrent.
