Salesforce Certified Platform Data Architect Sample Questions (Q223-Q228):

NEW QUESTION # 223

Universal Containers wants to automatically archive all inactive Account data that is older than 3 years. The information does not need to remain accessible within the application. Which two methods should be recommended to meet this requirement? Choose 2

answer

- A. Use the Force.com Workbench to export the data.
- **B. Schedule jobs to export and delete using an ETL tool.**
- C. Schedule a weekly export file from the Salesforce UI.
- **D. Schedule jobs to export and delete using the Data Loader.**

Answer: B,D

Explanation:

Both C and D are valid methods to automatically archive and delete inactive Account data that is older than 3 years. You can use an ETL tool or the Data Loader to schedule jobs to export and delete data based on certain criteria.

NEW QUESTION # 224

NTO has decided to franchise its brand. Upon implementation, 1000 franchisees will be able to access BTO's product information and track large customer sales and opportunities through a portal. The Franchisees will also be able to run monthly and quarterly sales reports and projections as well as view the reports in dashboards. Which licenses does NTO need to provide these features to the Franchisees?

- A. Salesforce Sales Cloud license
- B. Customer Community license
- **C. Partner Community license**
- D. Lightning Platform license

Answer: C

Explanation:

The best license to provide these features to the franchisees is the Partner Community license.

Partner Community licenses are designed for external users who collaborate with your sales team on deals, such as resellers, distributors, or brokers. Partner Community users can access standard CRM objects, such as accounts, contacts, leads, opportunities, campaigns, and reports.

They can also access custom objects and run dashboards. Salesforce Sales Cloud license is not a good option because it is intended for internal users who need full access to standard CRM and custom apps. Lightning Platform license is not a good option because it is intended for users who need access to custom apps but not to standard CRM functionality. Customer Community license is not a good option because it is intended for external users who need access to customer support features, such as cases and knowledge articles, but not to sales features

NEW QUESTION # 225

Universal Containers is experiencing frequent and persistent group membership locking issues that severely restricts its ability to manage manual and a automated updates at the same time.

What should a data architect do in order to restore the issue?

- A. Enable defer sharing calculation
- B. Enable implicit sharing
- C. Enable parallel sharing rule calculation.
- **D. Enable granular locking**

Answer: D

Explanation:

Enabling granular locking allows concurrent sharing rule calculations and group membership updates to run without locking each other. This can help resolve the group membership locking issues that UC is experiencing.

NEW QUESTION # 226

Universal Containers has deployed Salesforce for case management. The company is having difficulty understanding what percentage of cases are resolved from the initial call to their support organization. What first step is recommended to implement a reporting solution to measure the support reps case closure rates?

- A. Create a report on Case analytic snapshots.
- B. Install AppExchange packages for available reports.
- C. Create Contact and Opportunity Reports and Dashboards.
- **D. Enable field history tracking on the Case object.**

Answer: D

Explanation:

Enabling field history tracking on the Case object is the first step to implement a reporting solution to measure the support reps case closure rates. Field history tracking allows you to track changes to certain fields on the Case object, such as Status, Owner, or Priority. You can then create reports based on the field history data to analyze how long it took to close a case, how many times the case owner changed, or how many cases were escalated.

NEW QUESTION # 227

Universal Containers wishes to maintain Lead data from Leads even after they are deleted and cleared from the Recycle Bin. What approach should be implemented to achieve this solution?

- **A. Query Salesforce with the queryAll API method or using the ALL ROWS SOQL keywords.**
- B. Send data to a Data Warehouse and mark Leads as deleted in that system.
- C. Use a Converted Lead report to display data on Leads that have been deleted.
- D. Use a Lead standard report and filter on the IsDeleted standard field.

Answer: A

Explanation:

According to the exam guide, one of the objectives is to "describe how to use queryAll() or ALL ROWS keywords to access deleted records in Apex and SOQL". This implies that option C is the correct way to access deleted records in Salesforce. Option D is not correct because sending data to a data warehouse does not maintain the data in Salesforce. Options A and B are not correct because they do not apply to deleted records.

NEW QUESTION # 228

.....

You can choose the most suitable and convenient one for you. The web-based Plat-Arch-201 practice exam is compatible with all operating systems. It is a browser-based Salesforce Plat-Arch-201 Practice Exam that works on all major browsers. This means that you won't have to worry about installing any complicated software or plug-ins.
