Download Cisco 200-201 Exam Questions and Start Your Preparation journey Today

Therefore, make the most of this opportunity of getting these superb exam questions for the Understanding Cisco Cybersecurity Operations Fundamentals certification exam. We guarantee you that our top-rated Cisco 200-201 Practice Exam (PDF, desktop practice test software, and web-based practice exam) will enable you to pass the 200-201 certification exam on the very first go.

Cisco Understanding Cisco Cybersecurity Operations Fundamentals Sample Questions (Q227-Q232):

NEW QUESTION # 227

Drag and drop the elements from the left into the correct order for incident handling on the right.

Answer:

Explanation:

NEW QUESTION # 228

Refer to the exhibit.

Which application-level protocol is being targeted?

- A. HTTP
- B. FTP
- C. HTTPS
- D. TCP

Answer: A

NEW QUESTION # 229

Refer to the exhibit.

What is occurring in this network?

- A. MAC address table overflow
- B. MAC flooding attack
- C. ARP cache poisoning
- D. DNS cache poisoning

Answer: B

Explanation:

The exhibit shows a network diagram with a switch, a router, and two hosts. The switch has a MAC address table that maps the MAC addresses of the connected devices to the corresponding ports. A MAC flooding attack is a type of attack that aims to overload the switch's MAC address table by sending a large number of frames with spoofed source MAC addresses. This causes the switch to enter a fail-open mode, where it broadcasts all incoming frames to all ports, effectively turning it into a hub. This allows the attacker to sniff the traffic between the hosts and the router, or launch other attacks such as ARP spoofing or man-in-the-middle.

NEW QUESTION # 230

A security analyst reviews the firewall and observes the large number of frequent events. The analyst starts the packet capture with the Wireshark and identifies that TCP port reuse was detected incorrectly as a TCP split-handshake attack by the firewall. How must an impact from this event be categorized?

- A. true positive
- B. true negative
- C. false negative
- D. false positive

Answer: A

NEW QUESTION # 231

A company receptionist received a threatening call referencing stealing assets and did not take any action assuming it was a social engineering attempt. Within 48 hours, multiple assets were breached, affecting the confidentiality of sensitive information. What is the threat actor in this incident?

- A. company assets that are threatened
- B. victims of the attack
- C. customer assets that are threatened
- D. perpetrators of the attack

Answer: D

Explanation:

In this scenario, the threat actor refers to the individuals or entities responsible for the attack that resulted in a breach of assets and sensitive information. The receptionist received a threatening call but did not take action, leading to an actual breach within 48 hours. References: The explanation is inferred from general cybersecurity knowledge as specific details are not provided in the Cisco Cybersecurity documents linked.

NEW QUESTION # 232

We offer a money-back guarantee if you fail despite proper preparation and using our product (conditions are mentioned on our guarantee page). This feature gives you the peace of mind to confidently prepare for your Cisco 200-201 Certification Exam. Our Cisco 200-201 exam dumps are available for instant download right after purchase, allowing you to start your Cisco 200-201 preparation immediately.
