Our Microsoft Power Platform Developer Web-Based Practice Exam is compatible with all major browsers, including Chrome, Internet Explorer, Firefox, Opera, and Safari. No specific plugins are required to take this Microsoft Power Platform Developer practice test. It mimics a real PL-400 test atmosphere, giving you a true exam experience. This Microsoft Power Platform Developer (PL-400) practice exam helps you become acquainted with the exam format and enhances your test-taking abilities.

The Microsoft Power Platform Developer certification exam is aimed at developers, IT professionals, and consultants who work with Microsoft Power Platform. PL-400 exam covers various topics, including Power Apps, Power Automate, Power BI, Common Data Service, and Dynamics 365. Microsoft Power Platform Developer certification exam is a great way to enhance your skills and knowledge in the Power Platform and demonstrate your proficiency to potential employers.

The PL-400 Exam is intended for developers who have experience working with Power Platform technologies and have a good understanding of the Microsoft ecosystem. Candidates who take the exam must have a solid understanding of the Power Platform's architecture, as well as the ability to create, configure, and deploy Power Apps, Power BI reports, and Power Automate workflows.

Minimum Microsoft PL-400 Pass Score - PL-400 PDF VCE

All the contents in PL-400 training materials have three versions of APP, PC, and PDF. Buying PL-400 exam torrent is equivalent to purchasing three books at the same time. That is other materials on the market that cannot satisfy you. If you buy a paper version of the material, it is difficult for you to create a test environment that is the same as the real test when you take a mock test, but PL-400 exam questions provide you with a mock test system with timing and scoring functions, so that you will have the same feeling with that when you are sitting in the examination room. And if you buy the electronic version of the materials, it is difficult to draw marks on them, but PL-400 Exam Questions provide you with a PDF version, so that you can print out the information, not only conducive to your mark, but also conducive to your memory of important knowledge. At the same time, any version of PL-400 training materials will not limit the number of downloads simultaneous online users. You can study according to your personal habits and time schedules regardless of where and when.

Microsoft Power Platform Developer Sample Questions (Q282-Q287):

NEW QUESTION # 282

A company has a development environment and a production environment. The production environment has several third-party managed and unmanaged solutions that made changes to the Contact main form.

You create a new solution in the development environment. You add the Contact entity and the Contact main form to the solution. You create a custom field on the Contact entity.

What happens when you perform these actions and import the solution into the production environment? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

NEW QUESTION # 284

You work for a staffing company that helps employees fill temporary jobs. Available temporary jobs are categorized and listed on a secure area of the company's website.

The company wants to eliminate manual work that relates to job and candidate management. The company plans to invite employers with available jobs and job candidates to view jobs by sending personalized invitations. The company identifies the following requirements:

Human resources team members from the staffing company must be able to access the jobs listing and post available positions.

Employers seeking temporary employees must also be able to access the jobs listing and post available positions.

Approved job candidates must be notified about new positions for which they are qualified.

Approved job candidate must have an option to accept a job assignment directly from a notification.

You need to perform a gap analysis against the features and capabilities of the Power Platform.

Which features should you implement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

NEW QUESTION # 285

A company is creating a new system based on Dynamics 365 Sales.

The company has the following requirements for their claim process:

* Approval process must be the same for all claim applications.

* Claim applications must go through approvers at each stage.

* Fields must be shown or hidden, based on the requirements in the approval process.

You need to design the data model for the claim process using out-of-the-box components whenever possible.

Which features should you implement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Box 1: Workflow

You configure the approval processes in a workflow.

Box 2: Business process flow

By integrating your approvals feature with Power Automate, you can implement features such as these:

* Automatically generate and send request-for-approval emails to approvers.

* Include active approve and reject buttons in request-for-approval emails.

* Easy customization of the approval steps, using a framework that most administrators will be able to understand and adjust for themselves.

Box 3: JavaScript

In Dynamics 365, you can hide and show fields using JavaScript. This is useful if you have business logic that determines if fields are displayed or not to the user.
