Adobe AD0-E725 Questions Latest AD0-E725 Dumps PDF [2026]

Our AD0-E725 study materials are compiled and verified by the first-rate experts in the industry domestically and they are linked closely with the real exam. Our products' contents cover the entire syllabus of the exam and refer to the past years' exam papers. Our test bank provides all the questions which may appear in the real exam and all the important information about the exam. You can use the practice test software to test whether you have mastered the AD0-E725 Study Materials and the function of stimulating the exam to be familiar with the real exam's pace, atmosphere and environment. So our AD0-E725 study materials are real-exam-based and convenient for the clients to prepare for the exam.

Adobe AD0-E725 Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> External Integrations: This section of the exam measures the skills of Integration Specialists and focuses on connecting Adobe Commerce with external SaaS services. It encompasses the skills needed to customize data flows, utilize Adobe App Builder for extensibility, and implement Adobe I/O events and webhooks to create automated and connected business processes.
Topic 2	<ul style="list-style-type: none"> Cloud: This section of the exam measures the skills of Cloud Architects and covers the deployment and management of Adobe Commerce on cloud infrastructure. It requires explaining the fundamental cloud architecture, performing setup and configuration tasks, and utilizing the Adobe Commerce Cloud CLI tool to manage the environment effectively.
Topic 3	<ul style="list-style-type: none"> Section 1: Architecture: This section of the exam measures the skills of Backend Developers and covers the core structural concepts of Adobe Commerce. It involves demonstrating effective cache implementation, understanding key code components like plugins and observers, and managing multi-site configurations on a single instance. The domain also includes explaining the use of Git patches, critical security features, the CRON scheduling system, and how indexing functions within the platform.
Topic 4	<ul style="list-style-type: none"> Customizations: This section of the exam measures the skills of Solutions Engineers and involves modifying and extending platform functionality. This includes customizing core areas like the product catalog, checkout process, and admin panel, as well as manipulating data entities, customizing APIs, working with message queues, and writing integration tests to ensure code quality and functionality.

Adobe Commerce Developer Expert Sample Questions (Q42-Q47):

NEW QUESTION # 42

An Adobe Commerce Expert is tasked with configuring different pricing for products across a multi-site installation. Each website requires independent control of its prices while using the same catalog data.

What is the minimum store hierarchy structure required to achieve this?

- A. Multiple stores and a single store view for each store
- B. One website, one store, and multiple store views
- C. Multiple websites, each with one store and at least one store view**

Answer: C

Explanation:

In Adobe Commerce, product prices are scoped at the website level. To allow different prices per site while sharing the same catalog, you must create multiple websites, each with its own store and store view(s).

A (multiple stores, single website) # shares the same price configuration.

B (multiple store views) # only useful for localization (translations), but pricing is still shared.

C is correct because each website maintains independent pricing.

NEW QUESTION # 43

A client is setting up an Adobe Commerce B2B store and wants to start offering a Payment on Account option for their customers when placing orders.

How should the Developer achieve this?

- A. Create and implement a new Payment Method to provide credit accounts to customers.
- B. Install and activate the native Adobe Commerce module which activates payment.**
- C. Repurpose the native Cash on Delivery method.

Answer: B

Explanation:

Adobe Commerce B2B includes a native "Payment on Account" module, which is part of the B2B suite. This module allows customers with company accounts to place orders on account (credit).

A (repurpose COD) is a hack and not recommended.

C (create new payment method) is unnecessary since Adobe Commerce already includes this B2B feature.

B is correct: simply enable the native B2B Payment on Account module.

NEW QUESTION # 44

A client expresses disappointment with the underreported engagement and revenue metrics reported by Product Recommendations. Which limitation or consideration of this service should be communicated to the client?

- A. Product Recommendations does not support insightful engagement and revenue metrics; an additional service contract is required for this feature.
- B. Product Recommendations requires the purchase of an additional license to enable real-time reporting.
- **C. Ad blockers and privacy settings can prevent Product Recommendations from capturing shopper behavior.**

Answer: C

Explanation:

Product Recommendations relies on capturing shopper behavior (page views, clicks, add-to-cart events) via JavaScript trackers. If users have ad blockers or restrictive privacy settings enabled, this data may not be captured, leading to underreported metrics.

A is false: Product Recommendations does not require extra licenses for reporting.

C is false: The service already supports engagement and revenue metrics; no additional contract required.

NEW QUESTION # 45

An Adobe Commerce Developer is implementing asynchronous communication with a third-party system using RabbitMQ. The XML files used must be able to configure a local queue and consume messages published by the third-party system.

Which files should the Developer use?

- A. communication.xml, queue_topology.xml, and queue_publisher.xml
- B. communication.xml, queue_topology.xml, and queue_consumer.xml
- C. queue_topology.xml and queue_publisher.xml
- **D. queue_topology.xml and queue_consumer.xml**

Answer: D

NEW QUESTION # 46

A Developer needs to replicate a recent issue that occurred in the staging environment so it can be tested locally. The Developer decides to dump the staging database and import it into the local setup.

Which command should the Developer use to do this?

- A. magento-cloud snapshot:db-dump
- B. vendor/bin/ece-tools db-snapshot
- **C. vendor/bin/ece-tools db-dump**

Answer: C

Explanation:

The correct way to dump a database from an Adobe Commerce Cloud environment is with the vendor/bin/ece-tools db-dump command.

A (db-snapshot) is not a valid ece-tools command.

B is incorrect: magento-cloud snapshot commands are for managing whole environment snapshots, not direct DB dumps.

C is correct: ece-tools db-dump provides the database export for staging/local replication.
