Believe it or not, our TDA-C01 study materials are powerful and useful, which can solve all your pressures about reviewing the TDA-C01 Exam. You can try our free demo of our TDA-C01 practice engine before buying. The demos are free and part of the exam questions and answers.

## Tableau Certified Data Analyst Sample Questions (Q94-Q99):

### NEW QUESTION # 94

You have a dashboard that is configured for desktop browsers.

You want to customize a layout for mobile users.

Which option should you select first? (Click the appropriate Option in the Answer Area.)

**Answer:**

Explanation:

Explanation:

□

To customize a layout for mobile users, you should select the Device Preview option first. This option will allow you to see how your dashboard will look on different types of devices, such as phones, tablets, or desktops. You can also choose different models and orientations to preview different screen sizes and resolutions. From the Device Preview mode, you can add, edit, or delete device layouts for each device type.

You can also adjust the size, position, and formatting of the dashboard elements for each device layout. References:

### NEW QUESTION # 95

You have the following dataset that contain null values in the Profits field.

You want the data to appear as shown in the following table.

Which two formulas achieve the goal? Choose two.

- A. ISNULL ([Profits])
- B. 2N ([Profits])
- C. IF [Profits] != null then [Profits] END
- D. IFNULL([Profits],0)
- E. IFNULL [(profits) ,0)

**Answer: B,E**

Explanation:

The IFNULL function is a logical function that returns the first argument if it is not null, and the second argument if it is null. In this case, the first argument is [Profits], which is the field that contains null values. The second argument is 0, which is the value that you want to replace null values with. The function will return [Profits] if it is not null, and 0 if it is null.

The IF statement is a logical statement that returns a value or performs an action if a condition is true, and optionally returns another value or performs another action if the condition is false. In this case, the condition is [Profits] != null, which means that [Profits] is not null. The statement will return [Profits] if the condition is true, and nothing if the condition is false. The END keyword marks the end of the statement.

The other options are not correct for this scenario. The ZN function is a logical function that returns zero if a value or expression is null, and returns the value or expression itself if it is not null. However, it only works with numeric values or expressions, and [Profits] may not be numeric in this case. The ISNULL function is a logical function that returns TRUE if a value or expression is null, and FALSE otherwise. It does not replace null values with another value. Reference: [https://help.tableau.com/current/pro/desktop/en-us/functions\\_functions\\_logical.htm#IFNULL](https://help.tableau.com/current/pro/desktop/en-us/functions_functions_logical.htm#IFNULL) [https://help.tableau.com/current/pro/desktop/en-us/functions\\_functions\\_logical.htm#IF](https://help.tableau.com/current/pro/desktop/en-us/functions_functions_logical.htm#IF) [https://help.tableau.com/current/pro/desktop/en-us/functions\\_functions\\_logical.htm#ZN](https://help.tableau.com/current/pro/desktop/en-us/functions_functions_logical.htm#ZN)

[https://help.tableau.com/current/pro/desktop/en-us/functions\\_functions\\_logical.htm#ISNULL](https://help.tableau.com/current/pro/desktop/en-us/functions_functions_logical.htm#ISNULL) Explanation:

The two formulas that will make the data appear as shown in the second table are:

### NEW QUESTION # 96

A Data Analyst has a data source that contains data for every city in the United States. The following is a sample of the data.

The analyst needs to use the City dimension to create a dynamic filter that shows the cities that have a population greater than 1 million.

Which type of filter should the analyst use?

- A. Condition
- B. Top
- C. Range
- D. Special

**Answer: A**

### NEW QUESTION # 97

A Data Analyst has created a Tableau Prep flow that is ready to be used. The output will be used by a colleague to build a dashboard on Tableau Cloud or Tableau Server.

Where should the analyst output the data to?

- A. Salesforce Data Cloud

- B. CRM Analytics
- C. A published data source
- D. A Tableau data extract file

**Answer: C**

### NEW QUESTION # 98

You have the following calculated fields in a worksheet.

[Calc1] = DATEADD ('year', -1, TODAY ())

[Calc2] = DATETRUNC ('month', DATEADD ('year', -1, TODAY ()))

You want to calculate the month to date value of the prior year.

How should you complete the formula? (Drag the appropriate Options to the Answer Area and drop into the correct locations.)

**Answer:**

Explanation:

Reference:

Finding the Month-to-Date Values for the Prior Year

[DATEADD Function]

[DATETRUNC Function]

### NEW QUESTION # 99

.....

Many people may have different ways and focus of study to pass TDA-C01 exam in the different time intervals, but we will find that in real life, can take quite a long time to learn TDA-C01 learning questions to be extremely difficult. You may be taken up with all kind of affairs, and sometimes you have to put down something and deal with the other matters for the latter is more urgent and need to be done immediately. With the help of our TDA-C01 training guide, your dream won't be delayed anymore.
