

Latest SDS Reliable Test Objectives & Free Demo Valid SDS Exam Notes: Senior Data Scientist

DOWNLOAD the newest Actualtests4sure SDS PDF dumps from Cloud Storage for free: https://drive.google.com/open?id=1R_q4r6Px-r-kA9rcbqatUq3WjmUmTtW

If you are craving for getting promotion in your company, you must master some special skills which no one can surpass you. To suit your demands, our company has launched the Senior Data Scientist SDS exam materials especially for office workers. For on one hand, they are busy with their work, they have to get the DASCA SDS Certification by the little spread time.

Persistence and proficiency made our experts dedicated in this line over so many years. Their passing rates are over 98 and more, which is quite riveting outcomes. After using our SDS practice materials, you will have instinctive intuition to conquer all problems and difficulties in your review. We are sure you can seep great deal of knowledge from our SDS practice materials in preference to other materials obviously. These SDS practice materials have variant kinds including PDF, app and software versions.

>> SDS Reliable Test Objectives <<

Valid SDS Exam Notes & Latest SDS Study Guide

To enhance your career path with the SDS certification, you need to use the valid and latest SDS exam guide to assist you for success. Here the Actualtests4sure will give you the study material you want. The validity and reliability of SDS practice dumps are confirmed by our experts. So you can rest assured to choose our DASCA SDS training vce. What's more, we will give some

promotion on our SDS pdf cram, so that you can get the most valid and cost effective SDS prep material.

DASCA Senior Data Scientist Sample Questions (Q51-Q56):

NEW QUESTION # 51

Which of the following is an example of graphical model?

- A. Markov Random Fields
- B. Bayesian Networks
- C. Geographical Networks
- D. Both A and C
- **E. Both A and B**

Answer: E

Explanation:

Graphical models are probabilistic models that represent variables and dependencies using graphs:

Markov Random Fields (Option A): Undirected graphical models that capture joint distributions over variables with neighborhood dependencies.

Bayesian Networks (Option B): Directed acyclic graphical models that encode conditional dependencies between random variables.

Geographical Networks (Option C): While they are graphs, they are not probabilistic graphical models used in statistics/ML.

Thus, the correct answer is Option D (Both A and B).

Reference:

DASCA Data Scientist Knowledge Framework (DSKF) - Analytics: Graphical Models (Bayesian Networks & Markov Random Fields).

NEW QUESTION # 52

Which of the following is NOT a cluster management tool?

- A. Apache Mesos
- B. Apache Ambari
- **C. Apache Hadoop**
- D. Zettaset Orchestrator

Answer: C

Explanation:

Cluster management tools help in orchestrating and monitoring large-scale distributed computing environments.

Zettaset Orchestrator (A): Commercial tool for Hadoop cluster management.

Apache Mesos (B): A cluster manager that abstracts CPU, memory, and storage to enable fault-tolerant distributed systems.

Apache Ambari (C): An open-source tool for provisioning, managing, and monitoring Hadoop clusters.

Apache Hadoop (D): Not a cluster management tool. Hadoop is a framework for distributed storage and processing (HDFS + MapReduce), not a management tool.

Thus, the correct answer is Option D (Apache Hadoop).

Reference:

DASCA Data Scientist Knowledge Framework (DSKF) - Big Data Ecosystem: Hadoop Tools & Cluster Management.

NEW QUESTION # 53

Which of the following is an SLAs specification in case of Internet Service Provider (ISP)?

- A. Mean Time Between Failures (MTBF)
- **B. All of the above**
- C. Turnaround Time (TAT)
- D. Mean Time To Recovery (MTTR)

Answer: B

Explanation:

Service Level Agreements (SLAs) define performance commitments between service providers (like ISPs) and customers. Key

SLA metrics include:

MTBF (Option A): Measures reliability by defining the expected average time between service failures.

MTTR (Option B): Measures availability by defining how quickly service can be restored after a failure.

TAT (Option C): Measures responsiveness in resolving customer requests or incidents.

All three are standard SLA performance specifications. Hence, the correct answer is Option D (All of the above).

Reference:

DASCA Data Scientist Knowledge Framework (DSKF) - Data Engineering and IT Practices: SLAs and Performance Metrics.

NEW QUESTION # 54

Spark is written in:

- A. C++
- B. C
- C. Python
- D. Java
- E. **Scala**

Answer: E

Explanation:

Apache Spark is an open-source distributed computing framework widely used for big data processing and machine learning pipelines.

The core implementation of Spark is written in Scala (Option A), which runs on the JVM (Java Virtual Machine).

Spark also provides APIs for Java, Python (PySpark), R, and SQL, but its native language is Scala.

Options C (C) and D (C++) are incorrect; Spark is not written in these languages.

Python (Option E) is a supported API, but Spark itself is not written in Python.

Thus, the correct answer is Scala (Option A).

Reference:

DASCA Data Scientist Knowledge Framework (DSKF) - Programming Tools for Big Data & Distributed Computing.

NEW QUESTION # 55

Business Intelligence (BI) is:

- A. Both B and C
- B. BI focuses on reporting on the future state of the business
- C. BI focuses on "What happened?"
- D. **Both A and B**
- E. BI focuses on descriptive analytics

Answer: D

Explanation:

Business Intelligence (BI) is primarily focused on descriptive analytics and reporting - understanding historical and current business performance.

Option A (Descriptive analytics): Correct. BI uses dashboards, reports, and OLAP tools to summarize what has occurred in the past.

Option B ("What happened?"): Correct. BI answers retrospective questions by analyzing transactional and operational data.

Option C (Future state): Incorrect. Predicting future business outcomes falls under predictive analytics or advanced analytics, not BI.

Thus, the correct answer is Option D (Both A and B).
