Scrum Professional Scrum Master I Sample Questions (Q127-Q132):

NEW QUESTION # 127
Scrum is a methodology that tells in detail how to build software incrementally.

- A. True
- B. False

Answer: B

Explanation:
According to the Scrum Guide1, Scrum is not a process, technique, or definitive method. Rather, it is a framework within which you can employ various processes and techniques. Scrum makes clear the relative efficacy of your product management and work techniques so that you can continuously improve the product, the team, and the working environment.

NEW QUESTION # 128
What happens if the Development Team cannot complete its work by the end of the Sprint?

- A. The Sprint length holds and the Development Team continuously learns what is actually possible to do within a Sprint of this length.
- B. The Sprint is extended temporarily. Lessons are taken to ensure it doesn't happen again.
- C. The Sprint is extended and future Sprints use this new duration.

Answer: A

NEW QUESTION # 129
A Scrum Master is working with a Development Team that has members in different physical locations. The Development Team meets in a variety of meeting rooms and has much to do logistically (for example, set up conference calls) before the Daily Scrum. What action should the Scrum Master take?

- A. Allow the Development Team to self-manage and determine for itself what to do.
- B. Inform management and ask them to solve it.
- C. Set up the meeting and tell the Development Team that is how it will be done.
- D. Ask the Development Team members to alternate who is responsible for meeting setup.

Answer: A

NEW QUESTION # 130
Which statement best describes Scrum?

- A. A complete methodology that defines how to develop software.

- B. A framework within which complex products in complex environments are developed.
- C. A defined and predictive process that confirms to the principles of Scientific Management.
- D. A cookbook that defines best practices for software development.

Answer: B

NEW QUESTION # 131
What are two responsibilities of testers in a Scrum Team?
(choose the best two answers)

- A. Verifying the work of programmers.
- B. Scrum has no "tester" role.
- C. Finding bugs.
- D. Tracking quality metrics.
- E. The Developers are responsible for quality.

Answer: B,E

Explanation:
https://scrumguides.org/docs/scrumguide/v2020/2020-Scrum-Guide-US.pdf
Scrum is a framework for developing, delivering, and sustaining complex products. Scrum has three roles: the Product Owner, the Scrum Master, and the Developers. The Developers are the people in the Scrum Team who are committed to creating any aspect of a usable Increment in each Sprint. The Developers are not limited by titles such as programmer, designer, tester, architect, engineer, etc. The Developers are responsible for all aspects of quality, including finding and fixing bugs, tracking quality metrics, and verifying the work of other Developers. Therefore, Scrum has no "tester" role, and the Developers are responsible for quality.

NEW QUESTION # 132
......
