2026 Latest ActualCollection SDS PDF Dumps and SDS Exam Engine Free Share: <https://drive.google.com/open?id=1TeyTCdydYXAkJt-qlORZva6ez82CcGuT>

After the user has purchased our SDS learning materials, we will discover in the course of use that our product design is extremely scientific and reasonable. Details determine success or failure, so our every detail is strictly controlled. For example, our learning material's Windows Software page is clearly, our SDS Learning material interface is simple and beautiful. There are no additional ads to disturb the user to use the Senior Data Scientist qualification question. Once you have submitted your practice time, SDS study tool system will automatically complete your operation.

If you want to constantly improve yourself and realize your value, if you are not satisfied with your current state of work, if you still spend a lot of time studying and waiting for SDS qualification examination, then you need our SDS material, which can help solve all of the above problems. I can guarantee that our study materials will be your best choice. Our SDS Study Materials have three different versions, including the PDF version, the software version and the online version, to meet the different needs, our products have many advantages, I will introduce you to the main characteristics of our SDS research materials.

In this age of advanced network, there are many ways to prepare DASCA SDS certification exam. ActualCollection provides the most reliable training questions and answers to help you pass DASCA SDS Certification Exam. ActualCollection have a variety of DASCA certification exam questions, we will meet you all about IT certification.

## DASCA Senior Data Scientist Sample Questions (Q30-Q35):

### NEW QUESTION # 30

HDFS supports which quotas?

- A. Both A and B
- B. Name quotas
- C. None of the above
- D. Space quotas

**Answer: A**

Explanation:

HDFS (Hadoop Distributed File System) provides quota management to control and monitor resource usage across directories: Name Quotas (Option A): Limits the number of files and directories that can be created in a given HDFS directory. Helps prevent excessive metadata growth.

Space Quotas (Option B): Limits the total disk space consumed by files within a directory. Helps in capacity planning and avoiding storage overuse.

Since HDFS supports both types, the correct answer is Option C (Both A and B).

### NEW QUESTION # 31

The DevOps movement is an outgrowth of which of the following software development methodologies?

- A. Waterfall
- B. Promise-based algorithms
- C. Test-driven development and model-driven development
- **D. Agile**

**Answer: D**

Explanation:

The DevOps movement evolved as a natural extension of the Agile methodology.

Agile (Option A): Agile emphasizes iterative development, collaboration, and flexibility. While Agile improved software development speed, it created challenges in integrating development with IT operations.

DevOps emerged to address this by bringing operations into the Agile cycle - enabling continuous integration, delivery, and deployment.

Waterfall (Option B): Incorrect. Waterfall is a rigid, sequential methodology, fundamentally opposite to the DevOps philosophy.

Promise-based algorithms (Option C): Not a methodology - irrelevant here.

Test-driven development and model-driven development (Option D): While these practices support DevOps, they are not the origin of the movement.

Thus, the DevOps movement is an outgrowth of Agile methodology.

### NEW QUESTION # 32

Designing an algorithm to play chess is usually an example of which type of machine learning?

- A. Clustering
- B. Pattern density
- C. Supervised learning
- **D. Reinforcement learning**

**Answer: D**

Explanation:

Chess-playing algorithms are a classic application of Reinforcement Learning (RL) in machine learning.

In RL, an agent (chess program) interacts with an environment (chessboard/game state).

It learns optimal strategies (policies) by trial and error, guided by reward signals (e.g., winning the game, capturing pieces).

Famous examples include DeepMind's AlphaZero and earlier systems like IBM's Deep Blue, which incorporated reinforcement principles along with heuristics.

Option B (Pattern density): Not a recognized ML paradigm.

Option C (Supervised learning): While supervised ML can be used to predict moves from labeled games, chess strategy learning is best modeled as reinforcement learning.

Option D (Clustering): Not applicable; clustering is unsupervised grouping of data.

Thus, chess-playing algorithms are best categorized as Reinforcement Learning # Option A.

### NEW QUESTION # 33

What is DevOps?

- A. Software Development
- **B. All**
- C. Software Operations

- D. Quality Assurance

**Answer: B**

Explanation:

DevOps is not just about coding (development) or system administration (operations). It is a holistic cultural and technical practice that unifies:

Software Development (Option A): Writing and building applications.

Software Operations (Option B): Deploying, monitoring, and maintaining systems in production.

Quality Assurance (Option C): Ensuring the reliability, security, and performance of applications through testing and automation.

Thus, DevOps encompasses all three dimensions, making the correct answer Option D (All).

### NEW QUESTION # 34

Data wrangling is the process of getting the data from

- A. Both A and B
- B. None of the above
- **C. Its raw format into something suitable for more conventional analytics**
- D. Its modified meaning format into something suitable for more conventional analytics

**Answer: C**

Explanation:

Data wrangling (also called data munging) refers to transforming raw, messy, or unstructured data into a clean and structured format suitable for analysis.

Option A: Correct. Raw data often contains missing values, duplicates, or irregular formats. Wrangling prepares it for conventional analytics and machine learning.

Option B: Incorrect. Wrangling does not involve "modified meaning"; it focuses on cleaning, structuring, and integrating.

Option C: Incorrect, since only A is correct.

Option D: Incorrect, because wrangling is explicitly described in A.

Thus, the correct answer is Option A.

### NEW QUESTION # 35

.....

If you are still study hard to prepare the DASCA SDS Exam, you're wrong. Of course, with studying hard, you can pass the exam. But may not be able to achieve the desired effect. Now this is the age of the Internet, there are a lot of shortcut to success.

ActualCollection's DASCA SDS exam training materials is a good training materials. It is targeted, and guarantee that you can pass the exam. This training material is not only have reasonable price, and will save you a lot of time. You can use the rest of your time to do more things. So that you can achieve a multiplier effect.
