Our Platform-App-Builder Practice Tests teach you time management so you can pass the Salesforce Certified Platform App Builder (Platform-App-Builder) certification exam.

Salesforce Certified Platform App Builder Sample Questions (Q207-Q212):

NEW QUESTION # 207

Ursa Major Solar has a lookup relationship between a custom Galaxy__c object and a custom Star__c object. An app builder wants to create a roll-up summary field that counts the total number of Star__c records related to each Galaxy__c record. How would the current configuration impact the ability to achieve the desired result?

- A. The roll-up summary can be achieved by creating a formula field on the Star__c object.
- B. A roll-up summary field will need to be created on the Galaxy__c object with a field filter that select all related Star__c records
- C. The roll-up summary can be achieved by creating a formula field on the Galaxy__c object.
- D. The lookup relationship will need to be converted to a master-detail relationship before a roll-up summary field can be created.

Answer: D

Explanation:

Explanation

The lookup relationship will need to be converted to a master-detail relationship before a roll-up summary field can be created. This is correct because roll-up summary fields are only available on the master object in a master-detail relationship, and a lookup relationship does not establish a parent-child hierarchy between the objects

NEW QUESTION # 208

What is a true statement in regards to creating custom report types?

- A. The detail object in a Master-Detail relationship cannot be added as a secondary object on a custom report type.
- **B. Once a report type is saved with a standard or custom primary object, the primary object cannot be changed for that report type.**
- C. Any object can be chosen unless the object is not visible to the person creating the report type through security settings.
- D. When the primary object is a custom object and is deleted, then the report type and any reports created from it must be deleted manually.

Answer: B

NEW QUESTION # 209

Due to the complexity of the Universal Containers sandbox release schedule and requirements, it is advised that change sets are used as often as possible to migrate from one environment to another.

Which three common items can an app builder move when using a change set?

Choose 3 answers

- A. Standard fields
- **B. Custom object**
- **C. Apex class**
- **D. Custom field**
- E. Web-to-lead

Answer: B,C,D

Explanation:

Explanation

The common items that can be moved using a change set are custom object, Apex class, and custom field.

These are metadata components that can be deployed from one environment to another using change sets.

Web-to-lead and standard fields are not metadata components that can be moved using change sets.

NEW QUESTION # 210

What is true statement regarding master - detail relationship? Choose 3 answers

- A. A master - detail relationship cannot be converted to a look-up relationship
- **B. A master-detail relationship cannot be created if the custom object on the detail side already contains data.**
- **C. Master-detail relationship can convert to a look -up relationship if no roll-up summary field exist on the master object**
- D. Standard objects can be on the detail side of the custom object in a master-detail relationship
- **E. Deleting a master record in a master detail relationship deletes all related detail records**

Answer: B,C,E

NEW QUESTION # 211

An app builder wants to create a formula field on an Account to include data from related Contacts but is unable to find the relationship in the formula editor.

What is a limitation of formulas that could be causing the issue?

- A. More than 5,000 characters in the formula.
- B. Unable to reference the child records.
- C. A master-detail relationship should be created.
- D. Formula field limit reached on the Account object.

Answer: D

NEW QUESTION # 212

.....
