You totally can afford for our Professional-Cloud-Architect Preparation engine. And we give some discounts from time to time, so you can buy at a more favorable price.

Google Certified Professional - Cloud Architect (GCP) Sample Questions (Q256-Q261):

NEW QUESTION # 256

You are using Cloud Shell and need to install a custom utility for use in a few weeks. Where can you store the file so it is in the default execution path and persists across sessions?

- A. Cloud Storage
- **B. ~/bin**
- C. /usr/local/bin
- D. /google/scripts

Answer: B

NEW QUESTION # 257

You have an application deployed on Google Kubernetes Engine using a Deployment named echo-deployment. The deployment is exposed using a Service called echo-service. You need to perform an update to the application with minimal downtime to the application. What should you do?

- A. Update the service yaml file with the new container image. Use `kubectl delete service/echo-service` and `kubectl create -f <yaml-file>`
- **B. Use the rolling update functionality of the Instance Group behind the Kubernetes cluster**
- C. Use `kubectl set image deployment/echo-deployment <new-image>`
- D. Update the deployment yaml file with the new container image. Use `kubectl delete deployment/echo-deployment` and `kubectl create -f <yaml-file>`

Answer: B

Explanation:

Explanation/Reference: <https://cloud.google.com/kubernetes-engine/docs/how-to/updating-apps>

NEW QUESTION # 258

For this question, refer to the TerraEarth case study. A new architecture that writes all incoming data to BigQuery has been introduced. You notice that the data is dirty, and want to ensure data quality on an automated daily basis while managing cost. What should you do?

- **A. Use Cloud Dataprep and configure the BigQuery tables as the source. Schedule a daily job to clean the data.**
- B. Set up a streaming Cloud Dataflow job, receiving data by the ingestion process. Clean the data in a Cloud Dataflow pipeline.
- C. Create a Cloud Function that reads data from BigQuery and cleans it. Trigger it. Trigger the Cloud Function from a Compute Engine instance.
- D. Create a SQL statement on the data in BigQuery, and save it as a view. Run the view daily, and save the result to a new table.

Answer: A

NEW QUESTION # 259

A small number of API requests to your microservices-based application take a very long time. You know that each request to the API can traverse many services. You want to know which service takes the longest in those cases. What should you do?

- A. Send custom metrics for each of your requests to Stackdriver Monitoring
- B. Set timeouts on your application so that you can fail requests faster
- **C. Instrument your application with Stackdriver Trace in order to break down the request latencies at each microservice**
- D. Use Stackdriver Monitoring to look for insights that show when your API latencies are high

Answer: C

Explanation:

NEW QUESTION # 260

Your company is running a stateless application on a Compute Engine instance. The application is used heavily during regular business hours and lightly outside of business hours. Users are reporting that the application is slow during peak hours. You need to optimize the application's performance. What should you do?

- A. Create a snapshot of the existing disk. Create a custom image from the snapshot. Create an autoscaled managed instance group from the custom image.
- B. Create an instance template from the existing disk. Create a custom image from the instance template. Create an autoscaled managed instance group from the custom image.
- C. Create a snapshot of the existing disk. Create an instance template from the snapshot. Create an autoscaled managed instance group from the instance template.
- **D. Create a custom image from the existing disk. Create an instance template from the custom image. Create an autoscaled managed instance group from the instance template.**

Answer: D

NEW QUESTION # 261

.....

Our Professional-Cloud-Architect training materials provide 3 versions to the client and they include the PDF version, PC version, APP online version. Each version's using method and functions are different but the questions and answers of our Professional-Cloud-Architect study materials is the same. The client can decide which Professional-Cloud-Architect version to choose according their hobbies and their practical conditions. For instance, the PDF version is convenient for reading and supports the printing of our Professional-Cloud-Architect Study Materials. If client uses the PDF version of Professional-Cloud-Architect learning questions, you can also put on notes on it.
