CIPS Managing Teams and Individuals Sample Questions (Q31-Q36):

NEW QUESTION # 31

Sayed manages a team of 3 procurement assistants within a window fabrication company - Glassy Bits Ltd. The company has been operating for 30 years and the procurement team is still paper-based. The three members of staff have been with the company for at least 10 years and are very comfortable with the way things operate. To procure items such as PVC plastic and glass to make the windows they usually phone suppliers and send paper POs which Sayed approves with a physical signature. Sayed believes efficiencies can be gained from 'going digital' and introducing e-procurement systems. He is worried at how the team may react to such a big change. Discuss the emotional stages that the team may go through when experiencing this change, and how Sayed should act in order to help navigate the team through the change. (25 points).

Answer:

Explanation:

See the Explanation for Detailed Answer

Explanation:

When major change is introduced, employees often experience strong emotions. The Change Curve, based on Elisabeth Kubler-Ross's grief model, describes the stages staff may go through when faced with organisational change.

The first stage is Shock/Denial. The procurement assistants may initially resist the idea of e-procurement, insisting that the paper-based system "has always worked." Sayed should communicate openly about why the change is needed and provide clear facts about its benefits.

The second stage is Anger/Resistance. Staff may feel threatened, fearing loss of control or concern that they will not have the skills to manage digital systems. They may complain or openly resist. At this point, Sayed should listen empathetically, address concerns, and provide reassurance that training and support will be available.

The third stage is Exploration/Acceptance. Gradually, staff begin to see potential benefits, such as less paperwork and faster processes. Curiosity grows, and employees start experimenting with the new system. Here, Sayed should encourage participation, offer pilot training, and allow staff to test the system in a safe environment.

The fourth stage is Commitment/Integration. Once staff feel competent and confident, they fully adopt the change. At this stage, Sayed should reinforce the success, recognise achievements, and celebrate improvements, such as reduced errors or faster ordering.

How Sayed Should Act:

Communicate clearly - explain why digitalisation is important (efficiency, accuracy, competitiveness).
Provide training and support - ensure assistants feel capable of using the new e-procurement tools.
Involve the team - allow staff to give feedback on system design or pilot trials to increase buy-in.
Be empathetic and patient - acknowledge fears and provide reassurance during resistance.
Reinforce success - highlight early wins and show how the change benefits both the team and the organisation.

Conclusion:

The team is likely to experience stages of shock, anger, exploration, and eventual commitment as they move through the change curve. Sayer must act as a supportive leader by communicating openly, offering training, involving staff, and recognising progress. This approach will help the team transition smoothly to e-procurement and ensure the change is successful.

NEW QUESTION # 32

Explain what is meant by a heterogeneous / diverse workforce and explain one personality model that a manager could use to investigate the personalities within his/her team (25 points)

Answer:

Explanation:

See the Explanation for Detailed Answer

Explanation:

A heterogeneous or diverse workforce refers to a group of employees with varied characteristics, backgrounds, and perspectives. Diversity can relate to visible differences such as age, gender, ethnicity, or disability, as well as invisible factors like personality, values, experiences, and thinking styles. A diverse workforce is valuable because it brings multiple perspectives, creativity, and innovation, which can improve decision-making and problem-solving. However, it can also create challenges in communication, conflict management, and team cohesion if not managed effectively.

In procurement and supply management, diversity can mean having team members from different professional disciplines, cultural backgrounds, or experience levels. This mix can lead to better supplier negotiations, innovation in category strategies, and greater sensitivity to global ethical standards. For managers, the challenge lies in understanding and leveraging individual differences to build cohesive, high-performing teams.

One useful personality model for understanding team members is the Big Five Personality Traits (OCEAN model). This model is widely accepted in psychology and provides a framework for identifying personality differences across five dimensions:

Openness to Experience - measures creativity, curiosity, and willingness to try new things. In procurement, high openness could support innovation in supplier strategies.

Conscientiousness - relates to organisation, responsibility, and dependability. A conscientious buyer is likely to follow compliance rules and deliver accurate work.

Extraversion - reflects sociability, assertiveness, and energy. Extroverts may excel in supplier negotiations and stakeholder engagement.

Agreeableness - indicates cooperation, empathy, and trust. Highly agreeable individuals may be effective in collaboration but could avoid conflict even when necessary.

Neuroticism (Emotional Stability) - refers to sensitivity to stress and emotional control. Low neuroticism (high stability) is ideal in high-pressure procurement negotiations.

By applying this model, a manager can gain insights into the personalities of their team, allocate roles effectively, and provide tailored support. For example, a procurement leader may assign highly conscientious individuals to compliance-heavy processes, while extroverts may be placed in supplier-facing roles.

The use of the Big Five also helps managers balance team dynamics, identify potential conflict, and design training or coaching interventions. Understanding personality traits supports motivation strategies (e.g., Herzberg, Maslow), builds stronger communication, and enhances trust within diverse teams.

In conclusion, a heterogeneous workforce brings significant benefits but requires skilful management to harness its potential. The Big Five Personality Traits provide a structured and evidence-based tool for understanding individuals, enabling managers to lead diverse teams more effectively and align strengths with organisational goals.

NEW QUESTION # 33

What is meant by the 'systems approach' and 'contingency approach' to management? (20 points)

Answer:

Explanation:

See the Explanation for Detailed Answer

Explanation:

Theories of management provide different ways of understanding how organisations can be led effectively. Two important perspectives are the systems approach and the contingency approach. Both move beyond early "one best way" classical theories and instead highlight the complexity and adaptability required in modern organisations.

The systems approach views the organisation as an integrated whole made up of interdependent subsystems such as HR, finance, operations and procurement. It is based on systems theory, seeing organisations as "open systems" that interact with their external environment. Inputs such as people, information and resources are transformed into outputs such as products, services and stakeholder value. Feedback loops are essential to monitor performance and make adjustments. The key idea is synergy - the whole is greater than the sum of the parts. For example, in procurement, sourcing decisions influence not only supplier performance but also finance (budgets), operations (continuity), and CSR (sustainability). A systems approach ensures that procurement strategies are aligned to wider organisational goals and continuous improvement.

The contingency approach develops this idea further, arguing that there is no universal way to manage. Instead, the best approach depends on situational factors such as environment, size, technology, or workforce capability. It rejects "one-size-fits-all" rules and stresses that management must adapt. For example, in a stable market, a hierarchical structure with formal rules may work well, whereas in volatile markets, flexible and decentralised decision-making is more effective. In procurement, this could mean using strict process controls for routine, low-value items, but adopting agile, collaborative approaches when managing strategic supplier partnerships in uncertain global supply chains.

In comparison, the systems approach gives managers a holistic view of how different parts of the organisation connect and interact with the external environment, while the contingency approach emphasises adaptability and situational leadership. Together, they suggest that effective managers need both a broad systems perspective and the ability to tailor their approach depending on context. In conclusion, the systems approach stresses coordination, integration and feedback across the organisation, while the contingency approach stresses flexibility and the idea that "it depends." Both are highly relevant to procurement and supply leaders who must integrate across functions and adapt strategies to dynamic and uncertain supply environments.

NEW QUESTION # 34

Caleb is the newly appointed CEO of Star Fish Limited, a company that manufactures and installs gym equipment. The company employs 100 people and has dedicated teams for Finance, Product Development and Procurement. Some staff work from the office and some staff work remotely from home. Contrast and provide an example of a formal and informal group that may form at this organisation. What factors should Caleb be aware of that can contribute to group formations? (25 points)

Answer:

Explanation:

See the Explanation for Detailed Answer

Explanation:

Formal vs Informal Groups (10-12 marks):

Formal groups are those deliberately created by management to achieve organisational objectives. They have defined structures, roles, and reporting lines. In Star Fish Ltd, examples include the Procurement Team, responsible for sourcing suppliers and managing contracts. This group has clear goals, formal leadership, and measurable outputs.

By contrast, informal groups arise naturally among employees based on social interactions, common interests, or personal relationships. They are not officially sanctioned but strongly influence behaviour. At Star Fish Ltd, an example could be a fitness club of employees who exercise together during breaks or a WhatsApp group among remote workers who support each other socially. These groups provide belonging and morale but may also resist management decisions if excluded.

Factors Influencing Group Formation (12-15 marks):

Common goals and tasks - People working on shared objectives, such as the Product Development Team working on new gym equipment, naturally form groups.

Geography and work arrangements - Staff working remotely may form virtual support groups, while office-based staff bond more through daily interactions.

Shared interests and values - Employees passionate about fitness or sustainability may form informal networks within the company.

Friendship and social needs - Based on Maslow's hierarchy, people seek belonging. Friendships often develop into informal groups.

Leadership and influence - Charismatic or respected individuals may attract followers, leading to informal group formation around their personality.

Organisational culture - A collaborative culture encourages group formation for teamwork, while a competitive culture may create cliques or rival groups.

Technology and communication platforms - With remote work, online groups (Teams, Slack, WhatsApp) facilitate informal interaction and knowledge sharing.

Conclusion:

At Star Fish Ltd, formal groups like the Procurement Department are designed to deliver organisational objectives, while informal groups such as fitness clubs or virtual chat groups form naturally. Caleb must recognise that both types of groups are powerful. Formal groups deliver results, but informal groups influence morale, motivation, and resistance to change. By understanding the factors driving group formation, Caleb can harness both to build cohesion, encourage collaboration, and support the organisation's

success.

NEW QUESTION # 35

Explain the '2 factor hygiene theory' of motivation and how this can affect the motivation of employees within an organisation (25 points).

Answer:

Explanation:

See the Explanation for Detailed Answer

Explanation:

The Two-Factor Hygiene Theory, developed by Frederick Herzberg, explains what drives employee satisfaction and dissatisfaction at work. Herzberg argued that there are two categories of factors that affect motivation.

The first category is Hygiene Factors. These are extrinsic elements such as pay, working conditions, company policies, job security and supervision. If these are poor or absent, employees become dissatisfied. However, their presence alone does not create motivation - they simply prevent dissatisfaction. For example, in procurement, if buyers do not have fair pay or adequate systems, they will feel frustrated, but improving pay alone will not guarantee enthusiasm or creativity.

The second category is Motivators. These are intrinsic to the job itself, such as achievement, recognition, responsibility, advancement, and personal growth. When present, these factors actively increase motivation and job satisfaction. For instance, giving a procurement professional ownership of a supplier relationship, recognising their success in a negotiation, or offering training opportunities can significantly boost motivation.

The impact of Herzberg's theory on motivation is significant. Managers cannot rely only on hygiene factors like pay and working conditions to motivate staff. These need to be in place to avoid dissatisfaction, but true motivation comes from providing meaningful work, opportunities for growth, and recognition.

In practice, this means managers should:

Ensure hygiene factors are adequate (fair pay, safe environment, supportive policies).

Focus on motivators such as giving responsibility, offering progression pathways, and recognising achievement.

Design jobs with variety and challenge, rather than only repetitive tasks.

Encourage intrinsic motivation through empowerment and involvement in decision-making.

In procurement and supply, applying Herzberg's theory could mean ensuring staff have reliable systems and clear processes (hygiene), while also providing opportunities to lead supplier negotiations, recognise cost savings achievements, or involve staff in strategic sourcing projects (motivators).

In conclusion, Herzberg's Two-Factor Theory shows that avoiding dissatisfaction through hygiene factors is not enough. Managers must also provide motivators to create true engagement and drive performance. For procurement leaders, balancing both sets of factors is essential for building high-performing, motivated teams.
