Scrum Professional Scrum Master I Sample Questions (Q154-Q159):

NEW QUESTION # 154

If burndown charts are used to visualize progress, what does a trend line through a release burndown chart indicate?

- A. The evolution of the cost spent on the project.
- B. When the project will be over if the Product Owner removes work that is equal in effort to any new work that is added.
- **C. When the work remaining will likely be completed if nothing changes on the Product Backlog or the Development Team.**
- D. When all work will be completed to the Scrum Team can be released for other work.

Answer: C

Explanation:

a burndown chart is a graphical representation of work left to do versus time. It is very useful for predicting when all of the work will be completed. It is often used in agile software development methodologies such as Scrum. However, burndown charts can be applied to any project containing measurable progress over time. A release burndown chart tracks progress across multiple Sprints towards a product release. It shows how much work remains in the Product Backlog at any given time during the release cycle. A trend line through a release burndown chart indicates when the work remaining will likely be completed if nothing changes on the Product Backlog or the Development Team.

NEW QUESTION # 155

Which Scrum Value is affected by a lack of trust in the Scrum Team?

- A. Focus
- B. Courage
- C. Commitment.
- **D. All of the above**
- E. Openness
- F. Respect

Answer: D

Explanation:

The correct answer is F, because all of the Scrum Values are affected by a lack of trust in the Scrum Team. Trust is essential for the Scrum Team to work effectively and deliver value. Without trust, the Scrum Team may lose focus, respect, openness, courage, and commitment.

NEW QUESTION # 156

The Scrum Team should have all the skills needed to:
(choose the best answer)

- A. Do all of the development work, except for specialized testing that requires additional tools and environments.
- B. Complete the project within the date and cost as calculated by the Product Owner.
- **C. Turn Product Backlog items into a valuable, useful Increment.**

Answer: C

Explanation:

Scrum Teams are cross-functional, meaning the members have all the skills necessary to create value each Sprint. They are responsible for all product-related activities from stakeholder collaboration, verification, maintenance, operation, experimentation, research and development, and anything else that might be required¹². The Scrum Team's goal is to deliver a "Done" Increment that meets the Definition of Done and the Sprint Goal³.

NEW QUESTION # 157

When should a Sprint Goal be created? (Choose the best answer.)

- A. It should have been created in the previous Sprint during Product Backlog refinement.
- B. At any time during the Sprint.
- **C. During Sprint Planning.**
- D. It must be established before Sprint Planning in order to begin planning.
- E. A Sprint Goal is not mandatory in Scrum.

Answer: C

NEW QUESTION # 158

Which of the following might the Scrum Team discuss during a Sprint Retrospective?

- A. Its Definition of "Done".
- B. Skills needed to improve the Development Team's ability to deliver.
- C. All of the above.
- D. The way the Scrum Team does Sprint Planning.
- E. Methods of communication.

Answer: C

Explanation:

The correct answer is E, because all of these topics can be discussed during a Sprint Retrospective. The Scrum Guide states that "the purpose of the Sprint Retrospective is to plan ways to increase quality and effectiveness. ... During each Sprint Retrospective, the Scrum Team plans ways to improve product quality by adapting the definition of 'Done' as appropriate." Therefore, the Scrum Team can discuss any aspect of their process, communication, skills, or definition of 'Done' that may help them improve.
