Do you want to gain all these Microsoft Dynamics 365 Supply Chain Management Functional Consultant (MB-330) certification exam benefits? Looking for the quick and complete Microsoft MB-330 exam dumps preparation

way that enables you to pass the MB-330 Certification Exam with good scores? If your answer is yes then you are at the right place and you do not need to go anywhere. Just download the It-Tests MB-330 Questions and start Microsoft Dynamics 365 Supply Chain Management Functional Consultant (MB-330) exam preparation without wasting further time.

Microsoft Dynamics 365 Supply Chain Management Functional Consultant Sample Questions (Q158-Q163):

NEW QUESTION # 158

A company uses Planning Optimization and first in, first out (FIFO) inventory valuation. The company also has special requirements on sales margins. Company policy states that marking must be a single issue that is fully marked against a single receipt, regardless of quantity. What should you do to respect marking when planned orders are being firmed? Select only one answer.

- **A. Enable Ordered Reserved.**
- B. Set the Update marking parameter to No.
- C. Set the Update marking parameter to Standard.
- D. Allow negative inventory.
- E. Set the Update marking parameter to Extended.

Answer: A

NEW QUESTION # 159

A company must ship product from one warehouse, receive it in another, and account for the inventory. It will take two days for the shipment to travel between locations.

You need to set up and process the transfer between the two warehouses.

How should you complete the setup? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

NEW QUESTION # 160

A company uses Dynamics 365 Supply Chain Management.

The company classifies and tracks products based on how useful they are for achieving their business goals. Certain product classifications are important in relation to inventory controls and margins. Other classifications have a small profit margin and are less important for inventory variances.

The classification configuration must feed into existing classification reports and system logic.

You need to configure the products for the classifications.

Where should you configure the classifications?

- A. Unreleased product variant
- B. Released product
- C. Unreleased product
- **D. Product attributes**
- E. Released product variant

Answer: D

NEW QUESTION # 161

You need to enable the system to correctly calculate vendor claims.

Which configurations should you use for the rebates? To answer, move the appropriate configurations to the correct requirements.

You may use each configuration once, more than once, or not at all. You may need to move the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

□ Explanation:

□ Topic 8, Munson's Pickles and Preserves Farm

Background

Current Environment

Munson's Pickles and Preserves Farm is a distribution company that supplies pickles, preserves, pickling supplies, and accessory products to local farmers' markets as well as grocers. Munson's Pickles and Preserves Farm does not produce or provide canning services for any items.

Munson's Pickles and Preserves Farm has an accounting system that is disconnected from the warehousing system. This has caused issues with controlling and valuing inventory. With these core drivers, Munson's Pickles and Preserves Farm decides to implement Dynamics 365 Finance and Dynamics 365 Supply Chain Management.

Warehousing

- * Munson's Pickles and Preserves Farm has a single warehouse that serves as the distribution center for all products.
- * The warehouse has bulk locations as well as racking, but location names and numbers do not exist.
- * Bulk locations are for storage of extra inventory that will not fit into the picking locations.
- * The warehouse is temperature-controlled, with locations grouped into two zones: refrigerated and non-perishable.
- * Inventory adjustments are made regularly due to lack of inventory controls.

Inventory Data

- * Item numbers are inconsistent and were set up as "smart-numbering," such as 1-23-PKL and 44-24-PICK.
- * Cucumbers are not grown by Munson's Pickles and Preserves Farm and may be sourced from local farmers.
- * Pickles come in bottle sizes of 8 oz. 16 oz. 32 oz. The bottles are packed in cases.
- * Pickles may be spear, chip, or whole shapes within the bottles. This does not impact the cost of the pickles when they are the same flavor.
- * Pickle flavors are sweet spicy, and dill. The flavors vary in price.
- * Preserves come in multiple flavors, such as mango, strawberry, and grape. These are seasonal items only.

Due to the varying flavors and quantities, the preserves are owned by the vendor until they are sold. The mango preserves require refrigeration. The other preserves do not require refrigeration.

- * Many items are sold as accessories or supplies for pickling.
- * Some items within inventory have an expiration date, such as vinegar.
- * Fast-moving items are identified by inventory turns per quarter. Sweet and spicy pickles are the most popular.

Purchasing and Sales

- * Munson's Pickles and Preserves Farm has an online store that can be found at munsonspicklesandpreservesfarm.com.
- * The online store is limited to a subset of products that are accessories only, such as bottles and jars.
- * A new product line of kosher pickles is going to be distributed by Munson's Pickles and Preserves Farm.
- * VendorA is the largest vendor that Munson's Pickles and Preserves Farm buys products from. Munson's Pickles and Preserves Farm's second largest vendor is VendorB.

Requirements

Warehousing

- * The warehouse manager requires fast-moving items to be easily accessible to the order pickers in AisleA, with no more than one item per bin location in AisleA. Both sweet and spicy pickles have more inventory than will fit in AisleA, resulting in bulk location storage.
 - o Spicy pickles must have no less than half of a pallet in AisleA at any time.
 - o Sweet pickles must have enough inventory in AisleA prior to creating waves for warehouse work.
- * Strawberry preserves are selling slowly this season. They are put away in higher bin locations because they are not considered fast-moving items.

Inventory & Data

- * Item numbers must be set up to create a streamlined numbering system. Munson's Pickles and Preserves Farm requires that the old item number be stored in Dynamics 365 for cross reference purposes. Munson's Pickles and Preserves Farm has settled on 0000001 as the item format for pickles instead of 1-23-PKL PKL will be stored as an attribute.
 - * Item numbers for pickles must be consolidated where possible into a single item number, regardless of bottle size.
 - * Cucumbers must be sold at actual cost because they are a special order.
 - * Kosher pickles must be set up in the item master. The kosher pickles are the same size jars and flavors as the other pickles, except that they have a kosher designation and will be slightly more expensive.
 - * Vinegar and other perishable items must have date tracking for the manufacturer's batch number and expiration date of the product.
 - * A batch of mango preserves had to be thrown away because the warehouse workers put away the product into the non-perishable zone.
- Purchasing & Sales
- * Cucumbers must be sourced from local vendors for special orders only.

- * Munson's Pickles and Preserves Farm recently signed an exclusivity agreement with VendorA, and buyers must now only purchase from VendorA.
- * VendorA recently purchased a competitor company, VendorB. VendorA wants to ensure that all agreements with VendorA also apply to VendorB while they work on merging the two companies into one.
- * VendorC sells preserves to Munson's Pickles and Preserves Farm and requires the following:
 - o Shipment requirement: VendorC owns the product after shipment to Munson's Pickles and Preserves Farm until the time of sale.
 - o On-hand requirement: VendorC has access to view on-hand preserve inventory at Munson's Pickles and Preserves Farm warehouse.

Issues

- * CustomerD reports that the vinegar they ordered had a week left before it expired when they received it. This did not give CustomerD enough time to use the vinegar before they had to dispose of it CustomerD now requires that all vinegar has more than 30 days left before the expiration date.
- * A customer calls and states that they ordered kosher pickles and received regular pickles. Inventory Control Clerk 2 reports that kosher and non-kosher pickles of the same variety are in the same warehouse location, contributing to the picking errors.
- * A salesperson reports that the margin is incorrect on a customer's special order because the cucumber cost was for the most recent receipt of cucumbers, not the cucumbers received for the specific customer order.
- * An internal audit revealed that large quantities of pickles were missing and written off as damaged on multiple occasions over the past year. No documentation or explanation of the write offs exist. There is no documentation of disposal, and no approval from management to substantiate that the pickles were not stolen.
- * Jars of pickles are received as eaches. Case counts of pickle jars vary by size:
 - o 8 oz jars are 12 per case
 - o 16 oz jars are 6 per case
 - o The varied counts in each case create overhead in the warehouse.
- * The receiving clerk in the warehouse wants to ensure that broken bottles of vinegar are moved to a damage location named locationA. Expired vinegar should be moved to a return-to-vendor location named LocationB. All other vinegar should be put away and sold according to normal location directives.
- * Operator 1 is picking a pallet of strawberry preserves from a location to the shipping dock. While picking up the pallet. Operator1 drops the pallet. Operator! must make sure that the strawberry preserves are not available for shipment until the damage is evaluated.
- * Operator2 tries to print wave labels that contain item 0000001. The labels start to print and then jam. At the same time, the printer battery needs to be recharged and the labels need to be reprinted.

NEW QUESTION # 162

You are the inventory manager for a distribution center. You are configuring the inventory breakdown for a new center in California. You need to set up warehouse locations for the center and configure the prerequisite inventory hierarchy. Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:
