Last but not least, you will get the privilege to enjoy free renewal of our C_TADM_23 preparation materials during the whole year. All of the staffs in our company wish you early success.

SAP Certified Technology Consultant - SAP S/4HANA System

Administration Sample Questions (Q20-Q25):

NEW QUESTION # 20
What are start conditions of a background job in an AS ABAP-based SAP system? Note: There are 2 correct answers to this question.

- A. Reaching a specific date and time
- B. Starling of a dynamic work process
- C. Locking user DDIC in client 000
- D. Occurring of an event

Answer: A,D

Explanation:
A background job in an AS ABAP-based SAP system is a program that runs in the background without user interaction. A background job can be started by two types of start conditions: time-based or event-based. A time-based start condition specifies a specific date and time when the job should start. An event-based start condition specifies an event that triggers the job start. An event is a message that is sent by an application or the system to signal that a certain condition has occurred. For example, an event can be the completion of another job, the creation of a file, or the arrival of an IDoc. Reference: [SAPTEC], Unit 5: Background Processing, Lesson: Scheduling Background Jobs, Slide 8-9; [ADM100], Unit 5: Background Processing, Lesson: Scheduling Background Jobs, Slide 8-9.

NEW QUESTION # 21
What can you do to determine the SAPUI5 patch level in an AS ABAP-based SAP system?

- A. Use the program /UI5/UI5_UPLOAD_PATCH_TO_MIME
- B. Use the program WDG_MAINTAIN_UR_MIMES
- C. Execute the ICF service /sap/public/bc/ui5_ui5
- D. Check the version of software component SAP_UI

Answer: D

Explanation:
To determine the SAPUI5 patch level in an AS ABAP-based SAP system, one should check the version of the software component SAP_UI (C). This component includes the SAPUI5 libraries and their versions, providing a clear indication of the SAPUI5 patch level currently deployed on the system. The software component version can be viewed in the system via transaction codes such as 'SPAM' or 'SAINT', which display information about installed software components and their versions. Programs like 'WDG_MAINTAIN_UR_MIMES' (A) and '/UI5/UI5_UPLOAD_PATCH_TO_MIME' (D), as well as services like '/sap/public/bc/ui5_ui5' (B), are related to specific maintenance tasks or services and do not directly provide information about the SAPUI5 patch level.

NEW QUESTION # 22
How does SAP HANA encrypt the data persistence layer?

- A. By table level
- B. By row level
- C. By column level
- D. By page level

Answer: D

Explanation:
SAP HANA encrypts the data persistence layer at the page level (D). This encryption method applies to the data stored on disk, where each page of data in the persistence layer is encrypted to secure the data at rest. This approach provides a strong security measure, ensuring that even if physical data storage is compromised, the data remains inaccessible without the appropriate encryption keys. Encrypting data at the table (A), row (B), or column (C) level is not the method employed by SAP HANA for its persistence layer encryption.

NEW QUESTION # 23

When installing an SAP S/4HANA Server 1909 system, which actions can the Software Provisioning Manager (SWPM) perform only when the installation is started with the option SAPINST_STACK_XML? Note: There are 3 correct answers to this question.

- A. Install an SAP Host Agent
- B. Set up Transport Management System (TMS)
- C. Import additional languages
- D. Apply a SPAM/SAINT update
- E. Set the password of user DDIC in client 000

Answer: B,C,D

NEW QUESTION # 24

You configure the Transport Management System (TMS) as pan of the installation of an AS ABAP-based SAP system What information can you supply for the first SAP system that uses a specific transport directory? Note: There are 3 correct answers to this question.

- A. The password of a new user that will be created
- B. The description of the AS ABAP-based SAP system
- C. The user ID of a new user that will be created
- D. The name of the Transport Group
- E. The name of the Transport Domain

Answer: A,B,E

NEW QUESTION # 25

......
