MS-721 exam is ideal for professionals who are looking to advance their careers by demonstrating their expertise in designing and deploying communication and collaboration solutions.

Microsoft Collaboration Communications Systems Engineer Sample Questions (Q114-Q119):

NEW QUESTION # 114

Hotspot Question

You are planning a Microsoft Teams Phone deployment.

You need to recommend a Teams Phone solution for a sales team of 20 users. The solution must meet the following requirements:

- The team must be assigned a single dedicated phone number.
- An auto attendant must be used for inbound and outbound PSTN calls.
- Each member of the sales team must NOT be assigned their own phone number.

Which Teams Phone feature should you include in the recommendation, and how many Calling Plan licenses should you recommend assigning? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

The requirement states that the sales team must be assigned a single dedicated phone number and that each member must not have their own phone number. Group call pickup allows members of the team to answer calls made to the dedicated number without having individual phone numbers assigned. This feature enables collaborative answering of calls and is effective for managing calls directed to a common number.

For the solution to work with a single dedicated phone number and an auto attendant, only one Calling Plan license is required. This license will cover the dedicated number used for inbound and outbound PSTN calls for the entire team. The auto attendant can route calls effectively, allowing all team members to manage calls without needing separate licenses for each individual.

NEW QUESTION # 115

You have a Microsoft Teams Phone deployment.

When you attempt to deploy a Session Border Controller (SBC) named sbclxontoso.com, you receive the following error message: "We can't use the "SBC1-Contoso.com" domain as it hasn't been set up in the organization. Try again. If you continue to have problems, contact Microsoft customer support." You need to add the SBC to the tenant.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

NEW QUESTION # 116

You have a Microsoft Teams deployment

You have a meeting room that contains a Teams Rooms for Android device assigned to an account named Room1. You deploy a Teams panel to the entrance of the meeting room and sign in the panel by using the Room1 account. You need to ensure that attendees are notified when participants of the next meeting are waiting to use the room. What should you configure from Device settings on the Teams panel?

- A. Device pairing
- B. Allow early check-out
- C. Max room occupancy notification

- D. Allow room reservation extensions

Answer: A

NEW QUESTION # 117

Hotspot Question

You have a Microsoft Teams Phone deployment that contains three Teams-certified Android devices named Phone1, Phone2, and Phone3.

You need to configure the devices to meet the requirements shown in the following table.

Which IP Phone Policy SignInMode parameter should you specify for each device? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Box 1: MeetingSignIn

Phone1

Remove access to the people app and voicemail app.

Set the calendar app as the default interface.

To remove access to the People and Voicemail apps and set the Calendar app as the default interface on a Microsoft Teams Phone, you should use the MeetingSignIn SignInMode parameter within a custom Teams IP Phone policy. This mode is specifically designed for meeting rooms and shared spaces, providing a focused experience with the calendar as the primary interface.

Box 2: CommonAreaPhoneSignIn

Remove access to the people app.

Set the keypad as the default interface.

Ensure that advanced calling features are enabled.

To achieve the desired settings on a Microsoft Teams phone, where the People app is removed, the keypad is the default interface, and advanced calling features are enabled, the CommonAreaPhoneSignIn value for the SignInMode parameter in the Teams IP Phone Policy should be used. This mode is specifically designed for common area phones and disables the People app while enabling the keypad as the default interface and allowing access to advanced calling features.

Box 3: UserSignIn

Phone3

Ensure that the calendar app, people app, and voicemail app appear on the home screen.

Ensure that call handling and call forwarding can be configured

To ensure the calendar, people, and voicemail apps appear on the home screen of a Microsoft Teams Phone, the SignInMode parameter in the Teams IP Phone Policy should be set to UserSignIn. This setting enables the full individual user Teams experience on the phone, including access to these apps.
