

3V0-21.23 Prüfungsfrage, 3V0-21.23 Prüfungsaufgaben

Die VMware 3V0-21.23 Zertifizierungsprüfung ist zur Zeit sehr beliebt bei den IT-Fachleuten. Durch die VMware 3V0-21.23 Zertifizierungsprüfung werden Ihre Lebens- und Arbeitsverhältnisse verbessert. Daneben wird Ihre Position in der IT-Branche gefestigt.

VMware 3V0-21.23 Prüfungsplan:

| Thema | Einzelheiten |
|---------|--|
| Thema 1 | <ul style="list-style-type: none"> IT Architectures, Technologies, Standards: This section of the exam measures the skills of IT Architects and covers differentiating between business and technical requirements, as well as conceptual, logical, and physical design. A key skill measured is "Designing System Availability." |
| Thema 2 | <ul style="list-style-type: none"> VMware Products and Solutions: Targeting VMware Engineers, this section describes VMware Cloud Foundation architecture, its components like vSphere and NSX, benefits such as automation and scalability, and use cases like hybrid cloud environments. It assesses understanding of VMware Validated Solutions. |
| Thema 3 | <ul style="list-style-type: none"> Plan and Design the VMware Solution: This part targets Solution Designers, evaluating their ability to gather business objectives, create conceptual models based on these objectives, develop logical designs, and translate them into physical designs that meet specific requirements like manageability or security. |

3V0-21.23 Prüfungsaufgaben - 3V0-21.23 Prüfungen

Es kann den Erfolg erleichtern, wenn Sie den kürzen Weg und die Geschicke benutzen. Wenn Sie die Garantie für einmaligen Erfolg zur VMware 3V0-21.23 Zertifizierungsprüfung, ist VMware 3V0-21.23 Dumps von PrüfungFrage Ihre einzig und beste Wahl. Die Dumps werden von Ihnen immer gut bewertet. Und es ist unmöglich für Sie, bessere Dumps zu finden. Sie können Ihnen die Prüfungsinhalten zeigen, damit Sie mit dem Ziel die Kenntnisse lernen. Außerdem können Sie alle Prüfungsfragen und -antworten im Gedächtnis halten, wenn Sie nicht genug Zeit für die Vorbereitung haben. Die Dumps beinhalten viele Prüfungsfragen in aktuellen Prüfungen. Damit können Sie die VMware 3V0-21.23 Prüfung bestehen.

VMware vSphere 8.x Advanced Design 3V0-21.23 Prüfungsfragen mit Lösungen (Q78-Q83):

78. Frage

Which of the listed requirements would be classified as a recoverability non-functional requirement?

- A. The platform must be integrated with existing change control policies.
- **B. The platform must be able to support a maximum tolerable downtime (MTD) of 30 minutes.**
- C. Maintenance windows must be scheduled to take place monthly during an established overnight period.
- D. The platform must be available 24 hours a day, 7 days a week with the exception of scheduled downtime.

Antwort: B

Begründung:

Recoverability - Easy to restore after an outage

Measurements : MTD, RPO, RTO

79. Frage

An architect will be updating an existing vSphere data center design.

The following information has been provided:

The new design must carry over existing VLANs for workloads.

The networking for storage must not share the data path with workload traffic.

The new design must be able to add additional VLANs.

The new design must reduce management overhead.

The new replacement servers have two 100 GB network cards.

Which design will meet the requirements for existing workload networks and allow scaling of additional networks?

- A. One vSphere standard switch (VSS) configuration
Workload and storage traffic on separate uplinks
- B. One vSphere standard switch (VSS) configuration
Workload and storage traffic on separate uplinks
- C. Two vSphere distributed switches (VDS)
Each VDS uses one uplink as active and the other uplink as passive
Existing and new workload traffic on one VDS and storage traffic on the other VDS
- **D. One vSphere distributed switch (VDS) configuration**
The VDS uses aggregated uplinks
Workload and storage traffic on the aggregated uplinks

Antwort: D

Begründung:

The customer's requirements include the following:

Carry over existing VLANs for workloads: This can be easily achieved with a vSphere distributed switch (VDS), as it supports the configuration of VLANs and ensures that they can be applied to multiple ESXi hosts across the data center.

Networking for storage must not share the data path with workload traffic: By using aggregated uplinks in the VDS configuration, the architect can easily separate workload traffic and storage traffic by using different uplinks or VLANs. Aggregated uplinks ensure that there is sufficient bandwidth for both workloads and storage, while keeping them logically separated in terms of traffic management.

Add additional VLANs: A VDS supports the dynamic addition of VLANs. New VLANs can be added and managed centrally, reducing the complexity and management overhead when scaling the network.

Reduce management overhead: The use of a single VDS significantly reduces management complexity compared to managing multiple vSphere standard switches (VSS). With VDS, network configuration and management are centralized and simplified across all ESXi hosts.

Given that the new replacement servers have two 100 GB network cards, the aggregated uplinks in a VDS configuration will provide the required network capacity while ensuring that traffic is properly segmented and scalable.

80. Frage

What is the purpose of a Content Library in vSphere?

- A. To create a backup of the vCenter Server database
- **B. To manage and distribute virtual machine templates and other files**
- C. To provide encryption for virtual machine data
- D. To enable distributed port group configuration

Antwort: B

81. Frage

An architect is conducting interviews to gather requirements for a new vSphere-based private cloud solution.

The following information has been provided by the customer:

The customer, after 10 years within an outsourced managed service contract, has decided to bring application hosting back in-house but lacks the VMware skills to support this.

The customer currently has 5,000 workloads under contract and managed by their partner.

The customer would like to keep IT infrastructure costs at a minimum.

The customer would like to ensure that the solution supports the company's green IT agenda by reducing their carbon footprint.

Which statement is classified as a business factor that would impact the design?

- A. The customer would like to keep IT infrastructure costs at a minimum.
- **B. The customer would like to ensure that the solution supports the company's green IT agenda by reducing their carbon footprint.**
- C. The customer, after 10 years within an outsourced managed service contract, has decided to bring application hosting back in-house but lacks the VMware skills to support this.
- D. The customer currently has 5,000 workloads under contract and managed by their partner.

Antwort: B

82. Frage

Which two of the listed requirements would be classified as performance non-functional requirements? (Choose two.)

- A. The vSphere platform must be able to provide N+1 redundancy
- B. The vSphere platform must be able to provide a service-level agreement (SLA) of 99,9%
- **C. The vSphere platform must be able to provide a minimum throughput of 400 MB/s**
- D. The vSphere platform must be able to provide a recovery time objective of 30 minutes
- **E. The vSphere platform must be able to provide a maximum read latency of 15 ms**

Antwort: C,E

83. Frage

.....

Wollen Sie, dass Ihre IT-Fähigkeiten autoritativ anerkannt werden? Die Prüfungszertifizierung der VMware 3V0-21.23 zu erwerben ist eine der besten Methoden. Wir PrüfungFrage haben die Prüfungssoftware der VMware 3V0-21.23 entwickelt, die Ihnen helfen können, die Fachkenntnisse der VMware 3V0-21.23 am schnellsten zu beherrschen. Inhaltvolle Unterlagen, menschliches Layout und einjährige kostenlose Aktualisierung nach dem Kauf. Alle sind gute Unterstützungen fürs Bestehen der VMware 3V0-21.23 Prüfung.
