APICS Certified Supply Chain Professional Sample Questions (Q109-Q114):

NEW QUESTION # 109

All of the following are key lean concepts EXCEPT:

- A. banish waste and strive for perfection
- B. no more than 3.4 defects per million opportunities
- C. empowered teams
- D. orderly, safe workplace
- E. eliminate inventories

Answer: B

NEW QUESTION # 110

A manufacturer has direct relationships with its tier 1 suppliers. Which of the following supplier capabilities is a benefit to the manufacturer establishing a direct relationship with lower-tier suppliers?

- A. Provides information about impending shifts in the economy
- B. Provides smaller lot sizes
- C. Provides Just in Time deliveries
- D. Provides components with short lead times

Answer: A

NEW QUESTION # 111

Which of the following relationship activities is most impacted by a lack of trading partner trust?

- A. Coordination
- B. Collaboration
- C. Cooperation
- D. Communication

Answer: B

Explanation:

Collaboration in supply chain management involves working together with trading partners to achieve mutual goals and improve overall performance. This relationship activity requires a high level of trust, as it often involves sharing sensitive information, joint planning, and coordination of efforts. A lack of trust can severely impact collaboration because it can lead to reluctance in sharing information, misalignment of objectives, and ineffective joint decision-making. Trust is foundational for true collaborative efforts to succeed.

NEW QUESTION # 112

Which of the following distribution approaches for a low-volume, high-variety product line typically will result in the highest level of customer service and the lowest total distribution costs?

- A. Shipment from a central distribution warehouse
- B. Shipment through a multi-echelon distribution network
- C. Direct shipment from plant to customers
- D. Outsourcing the distribution function

Answer: A

Explanation:

For a low-volume, high-variety product line, shipping from a central distribution warehouse typically results in the highest level of customer service and the lowest total distribution costs. This approach allows the company to consolidate inventory in a single location, facilitating better inventory management and control. A central warehouse can stock a wide variety of products, ensuring availability and quick response to customer orders. It also allows for more efficient use of transportation resources by consolidating shipments, which reduces transportation costs.
