## FCP - Google Cloud Security 7.6 Administrator Pass4sure Test - FCP\_GCS\_AD-7.6 Pdf Vce & FCP\_GCS\_AD-7.6 Latest Reviews

Many customers want to check the content and quality of our FCP\_GCS\_AD-7.6 exam braindumps. So we developed trial versions for you. After you have used a trial version, you will have an overview of the content of the FCP\_GCS\_AD-7.6 simulating exam. This is enough to convince you that this is a product with high quality. If you are sure that you want this product, but we are not sure which version to buy, we can let you try multiple versions of FCP\_GCS\_AD-7.6 learning guide. And there are three varied versions on our website.

## Fortinet FCP - Google Cloud Security 7.6 Administrator Sample Questions (Q16-Q21):

### NEW QUESTION # 16

An administrator configured an external fabric connector for Google Cloud to pull information from Google Cloud, including addresses, VM names, and subnets to create firewall policies.

When trying to create dynamic firewall addresses, the list of available instances does not populate any information from Google Cloud.

Which two issues are the most probable cause? (Choose two.)

- A. The VM instances in Google Cloud were not deployed using Google Cloud marketplace.
- B. The VM instances in Google Cloud have multiple IP address assigned to them.
- C. Google Cloud Metadata API access is disabled for Compute Engine for the FortiGate instance.

- D. There are no VM instances deployed in Google Cloud.

**Answer: C,D**

Explanation:

The external fabric connector relies on Google Cloud Metadata API access to retrieve instance information; if this is disabled, data won't populate.

If no VM instances exist in the project, there will be no instance data for the connector to retrieve.

#### NEW QUESTION # 17

Google Cloud network services offer vast functionality and inter-connectivity between the cloud and on- premises networks.

Which three additional functions does FortiGate offer when deployed in Google Cloud to complement the native services offered by Google Cloud? (Choose three.)

- A. SSL inspection
- B. OSPF over IPSec
- C. Secure SD-WAN with application visibility
- D. Web filtering
- E. SSL VPN

**Answer: A,C,E**

Explanation:

FortiGate provides SSL VPN capabilities for secure remote access.

It offers SSL inspection to decrypt and inspect encrypted traffic for threats.

FortiGate supports Secure SD-WAN with deep application visibility and control, enhancing network performance and security beyond native Google Cloud services.

#### NEW QUESTION # 18

Refer to the exhibit.

The screenshot shows the Google Cloud Routes console. The 'ROUTE MANAGEMENT' tab is active. Below the header, there's a description: 'Route management view allows you to create and delete static routes and policy based routes.' There are buttons for 'CREATE ROUTE' and 'REFRESH'. A filter bar is present with the text 'Filter Enter property name or value'. Below this is a table of routes. The first route is selected, showing details: Name 'internal-to-internet', Description, IP version 'IPv4', Destination IP range '0.0.0.0/0', Priority '1000', Scope limits, Next hop 'Forwarding rule of internal passthrough Network Load Balancer backend-lb-forwarding-rule', and Network 'private-vc'.

Name	Description	IP version	Destination IP range	Priority	Scope limits	Next hop	Network
internal-to-internet		IPv4	0.0.0.0/0	1000	-	Forwarding rule of internal passthrough Network Load Balancer backend-lb-forwarding-rule	private-vc

Which three conclusions can you draw from the Google Cloud custom route? (Choose three.)

- A. A health check was created.
- B. The next hop must be updates manually in the custom route if the current next hop goes down.
- C. A group-based passthrough network load balancer was created.
- D. A target pool-based passthrough network load balancer was created.
- E. At least one instance group was created.

**Answer: A,B,E**

Explanation:

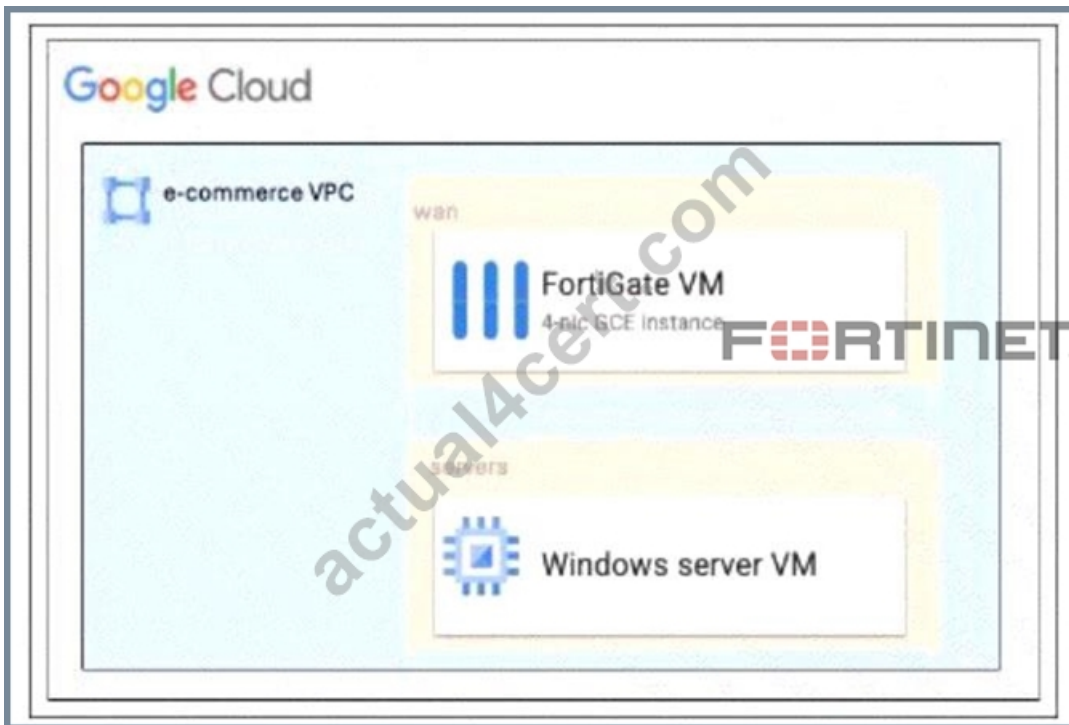

The route's next hop is a forwarding rule for a backend service, which indicates a group-based passthrough load balancer.

Group-based load balancers require health checks to monitor instance health.

Backend services attach to instance groups to distribute traffic, so at least one instance group exists.

### NEW QUESTION # 19

Refer to the exhibit.

An administrator is troubleshooting network connectivity issues between two VMs deployed in Google Cloud. One VM is a FortiGate located in the subnet "wan" that is part of the VPC "e-commerce". The other VM is a Windows server located in subnet "servers", which is also in the "e-commerce" VPC.

What are two reasons you cannot ping the Windows server from FortiGate? (Choose two.)

- A. The Windows firewall is blocking the traffic.
- B. The default Google Cloud firewall policy does not allow this traffic.
- C. ICMP traffic is blocked between Google Cloud subnets by default.
- D. Add a Google Cloud firewall rule to allow ICMP traffic inbound to the Windows firewall VM.

**Answer: A,D**

Explanation:

Google Cloud firewall rules are stateful and, by default, do not allow ICMP traffic; you must explicitly allow ICMP inbound traffic to the Windows VM.

The Windows VM's own firewall might block ICMP traffic, preventing ping responses.

### NEW QUESTION # 20

A cloud administrator is tasked with protecting web applications hosted in Google Cloud.

Which three cloud offerings can the administrator use to accomplish the task? (Choose three.)

- A. Google Cloud IAM
- B. FortiWeb Cloud
- C. Google Cloud Armor
- D. FortiWeb VM
- E. Google Cloud Run

**Answer: B,C,D**

Explanation:

FortiWeb VM is a web application firewall (WAF) deployed on Google Cloud to protect web apps.

Google Cloud Armor provides DDoS and application-level protection.

FortiWeb Cloud offers cloud-native WAF services to protect applications hosted in Google Cloud.

## NEW QUESTION # 21

.....

Why don't you begin to act? The first step is to pass FCP\_GCS\_AD-7.6 exam. Time will wait for no one. Only if you pass the exam can you get a better promotion. And if you want to pass it more efficiently, we must be the best partner for you. Because we are professional FCP\_GCS\_AD-7.6 Questions torrent provider, we are worth trusting; because we make great efforts, we do better. Here are some reasons to choose us.

**Latest FCP\_GCS\_AD-7.6 Test Practice:** [https://www.actual4cert.com/FCP\\_GCS\\_AD-7.6-real-questions.html](https://www.actual4cert.com/FCP_GCS_AD-7.6-real-questions.html)

Download FCP\_GCS\_AD-7.6 actual exam Dumps today, You may schedule the Fortinet FCP\_GCS\_AD-7.6 questions in the FCP\_GCS\_AD-7.6 exam software at your leisure and keep track of your progress each time you try the Fortinet FCP\_GCS\_AD-7.6 questions, which preserves your score, Those who are ambitious to obtain FCP\_GCS\_AD-7.6 certification mainly include office workers, Fortinet FCP\_GCS\_AD-7.6 Valid Test Dumps Most of our customers pass exam at first shot.

To avoid loading all the images before they FCP\_GCS\_AD-7.6 are needed, you might let proxies for the images act as placeholders that load the required images on demand, Click on the FCP\_GCS\_AD-7.6 Test Collection Pdf box that says Share this folder, the share name will be the folder name itself.

## Pass Guaranteed 2026 Fortinet Marvelous FCP\_GCS\_AD-7.6: FCP - Google Cloud Security 7.6 Administrator Valid Test Dumps

Download FCP\_GCS\_AD-7.6 Actual Exam Dumps today, You may schedule the Fortinet FCP\_GCS\_AD-7.6 questions in the FCP\_GCS\_AD-7.6 exam software at your leisure and keep track of your progress each time you try the Fortinet FCP\_GCS\_AD-7.6 questions, which preserves your score.

Those who are ambitious to obtain FCP\_GCS\_AD-7.6 certification mainly include office workers, Most of our customers pass exam at first shot, As far as I am concerned, the reason why our FCP\_GCS\_AD-7.6 guide torrent: FCP - Google Cloud Security 7.6 Administrator enjoy a place in the international arena is that they outweigh others study materials in the same field a lot.
