Pegasystems PEGACPBA24V1 Exam Syllabus Topics:

Topic	Details
Topic 1	• Data and Integration: This section measures skills of Data Analysts and Integration Specialists focusing on configuring data objects, relationships, and records. Candidates learn to capture and present data through fields and views, create calculated values, validate data with business logic rules, manipulate application data including setting default property values, and configure data transforms.
Topic 2	• Security: Designed for Security Analysts and Access Managers, this domain covers the relationship between personas, operators, and access groups within Pega. Candidates articulate the difference between authorization and authentication and understand their applications.

Topic 3	• Application Development: This section evaluates skills of Pega Business Architects and Developers in application development. It covers the roles and skills of a Pega Business Architect, identification of project stakeholders, and benefits of Pega's Center-out™ business architecture. Candidates learn about App Studio's value, understand rules, rulesets, classes, and the role of generative AI. The domain also covers Pega's CI • CD pipeline with Deployment Manager, use of collaboration tools, managing application development with user stories, feedback, and bug tracking, and using tools like Case Type Backlog and Estimator for project scoping.
