## Exam RCA Guide, RCA Reliable Exam Simulator

The competition in the tech sector is getting tougher and tougher day by day. Therefore, itPass4sure is offering updated and latest Relativity RCA Questions so aspirants can ace the Relativity RCA test in a short time and stay competitive in today's challenging job market.

## Relativity Certified Administrator Sample Questions (Q27-Q32):

### NEW QUESTION # 27

After imaging the documents in preparation for production, the case team asks for the estimated image count of the production. How can you quickly obtain the image count for the case team?

- A. Use the Has Images widget on your pre-production dashboard.
- B. Export the results of the Mass Convert operation.
- C. Export the Relativity Image Count field and calculate it in Excel.
- D. Use the Tally/Sum/Average mass operation on the Relativity Image Count field.

**Answer: D**

Explanation:

The correct answer is D. Use the Tally/Sum/Average mass operation on the Relativity Image Count field.

Relativity's Tally/sum/average documentation says this mass operation is commonly used to determine the number of pages in a print job or production. Relativity also specifically documents, in related guidance, that to estimate project size you can use Tally/sum/average on the Relativity Image Count field.

This makes it the fastest and most direct built-in method for obtaining an image count estimate. The other options are less efficient or are not the documented workflow for quickly producing a total image count.

Therefore, the correct answer is to use Tally/Sum/Average on the Relativity Image Count field.

### NEW QUESTION # 28

What does the Prepare Only action do on a prioritized review queue?

- A. Runs the saved search and trains the classifier.
- B. Grants reviewers access to the documents in the queue.
- C. Takes a statistical sample of documents to code first.
- D. Releases checked out documents to idle reviewers so that an active reviewer can code them.

**Answer: A**

Explanation:

The correct answer is B. Runs the saved search and trains the classifier. Relativity's Review Center documentation states that during the Preparing state, the queue is refreshing the saved search for the first time , and for a prioritized review queue , this also trains the classifier . The Review Center admin quick reference guide further states that Prepare Only re-runs the saved search for all queues and retrains the AI classifier for prioritized review queues , and it does not start the queue.

That makes option B the direct documented effect of Prepare Only. It does not grant reviewer access by itself, it does not release checked-out documents, and it is not a statistical sampling action. From a case administration perspective, Prepare Only is used to get the queue ready and refresh the machine-learning state before reviewers begin or resume work. Therefore, the correct answer is B .

### NEW QUESTION # 29

You need a user to perform some admin operations, including creating groups, managing users, and assigning permissions. However, you do not want them to review the Processing or Production queues. How should you configure the user's permissions?

- A. Add them to an instance-level group with permissions to create groups, manage users, and assign permissions.
- B. Add the user to the System Admin group and configure the System Admin group to restrict permissions to access Process and Production queues.
- C. Add the user to the System Admin group.
- D. Add the user to the Workspace Admin group.

**Answer: A**

### NEW QUESTION # 30

When you export a Relativity application, what file type is used?

- A. RAR
- B. TAR
- C. RAP
- D. ZIP

**Answer: C**

Explanation:

The correct answer is D. RAP . Relativity's official application export documentation states that when you export an application, Relativity produces a RAP file . The documentation explicitly says that after the export completes, you can find the RAP file in the selected folder and then upload that file to the target workspace or Relativity instance for deployment. This is the standard application package format used by Relativity for moving custom or configured applications between environments.

This matters in case administration because administrators frequently manage applications across workspaces and instances, including exporting custom objects, views, layouts, scripts, event handlers, and other application components. Knowing that the package format is .rap is essential when promoting configurations between development, test, and production environments. The other options are generic archive formats that may be familiar in general computing, but they are not the official Relativity application package type.

Relativity also refers throughout its application installation and export documentation to installing or uploading .rap files , which reinforces that this is the correct and platform-specific answer. Therefore, from an RCA perspective, the correct answer is RAP , because that is the documented file type generated when a Relativity application is exported.

### NEW QUESTION # 31

With email thread visualization ETV, under what conditions does the red exclamation point indicate coding mismatch?

- A. The email and its attachments are coded as Needs Review.
- B. The email and its duplicate spare are coded differently.
- C. The email is coded but its attachments are missing.
- **D. The email and other parent emails in the thread are coded differently.**

**Answer: D**

Explanation:

The correct answer is C. The email and other parent emails in the thread are coded differently. Relativity' s Email thread visualization documentation explains the meaning of the visual warning icons used in the thread display. The red exclamation point is associated with a coding mismatch condition in the thread. In practice, this means related parent emails in the thread have been coded inconsistently, which is exactly the kind of review inconsistency ETV is designed to expose.

This is different from missing attachments, duplicate spare comparison, or a generic "Needs Review" state.

ETV is focused on surfacing thread relationships, inclusiveness, missing emails, and coding consistency across the email conversation. From a Structured Analytics standpoint, the red exclamation point is a QC indicator that reviewers should inspect the thread because coding decisions across parent emails do not align.

Therefore, the correct answer is C .

## NEW QUESTION # 32

.....

Our RCA exam cram is famous for instant access to download, and you can receive the downloading link and password within ten minutes, and if you don't receive, you can contact us. Moreover, RCA exam materials contain both questions and answers, and it's convenient for you to check the answers after practicing. We offer you free demo to have a try before buying, so that you can know what the complete version is like. We offer you free update for 365 days for RCA Exam Dumps, so that you can obtain the latest information for the exam, and the latest version for RCA exam dumps will be sent to your email automatically.

**Exam RCA Guide:** <https://www.itpass4sure.com/RCA-practice-exam.html>

And after using our RCA learning prep, they all have marked change in personal capacity to deal with the RCA exam intellectually, So to solve all these problems, itPass4sure offers actual RCA Questions to help candidates overcome all the obstacles and difficulties they face during RCA examination preparation, Relativity RCA Free Practice Exams maybe you are still hesitant.

Optimize your content, Tom Martin has spent more RCA than half of his career selling advertising agencies' professional services, And after using our RCA learning prep, they all have marked change in personal capacity to deal with the RCA Exam intellectually.
