

Sample Plat-Dev-210 Questions, Reliable Plat-Dev-210 Exam Book

You can free download part of ActualCollection's practice questions and answers about Salesforce Certification Plat-Dev-210 Exam online. Once you decide to select ActualCollection, ActualCollection will make every effort to help you pass the exam. If you find that our exam practice questions and answers is very different form the actual exam questions and answers and can not help you pass the exam, we will immediately 100% full refund.

Salesforce Plat-Dev-210 Exam Syllabus Topics:

Topic	Details
Topic 1	• Omnistudio Data Mappers: This part of the exam measures the skills of a Data Engineer and focuses on the use of Omnistudio Data Mappers for extracting, transforming, and loading data. It includes identifying the appropriate Data Mapper for a given requirement, as well as determining the necessary Extract, Load, Transform, and Turbo Extract functionalities based on specific use cases. This section ensures the candidate can effectively map and manipulate data to support business processes.
Topic 2	• Expression Sets & Decision Matrices: This section measures the skills of a Logic Designer and covers the configuration and application of Expression Sets and Decision Matrices within Omnistudio tools. It requires demonstrating an understanding of how Expression Sets evaluate conditions and how Decision Matrices use rule-based logic to determine outcomes. This knowledge is essential for automating decisions and streamlining complex business processes.
Topic 3	• Flexcards: This section of the exam measures the skills of a Solution Architect and covers the ability to design and configure FlexCards based on specific business requirements. It evaluates the candidate's knowledge in selecting appropriate card styles, defining data sources and fields, and implementing user actions across different card states. Additionally, this domain tests the understanding of constructing the underlying JSON data structure that powers the FlexCards framework, ensuring that the configured cards meet both functional and technical specifications.

Topic 4	• Integration Procedures: This section measures the skills of an Integration Architect and involves designing and configuring Integration Procedures to automate processes and integrate systems. It requires comparing and contrasting different elements and configurations within Integration Procedures to meet specific use cases. Candidates are also tested on selecting the correct elements and properties to satisfy functional requirements, ensuring seamless data flow and process automation.
Topic 5	• Integrated Troubleshooting and Deployment: This final section measures the skills of a Support Engineer and focuses on identifying and resolving issues within Omnistudio tools. It involves diagnosing errors based on given scenarios and determining where breakdowns occur in the data flow for specific customer issues. This ensures the candidate can effectively troubleshoot, debug, and maintain solutions to ensure optimal performance and reliability.

How To Improve Your Professional Skills By Achieving The Salesforce Plat-Dev-210 Certification?

With so many years' development, we can keep stable high passing rate for Salesforce Plat-Dev-210 exam. You will only spend dozens of money and 20-30 hours' preparation on our Salesforce Plat-Dev-210 Test Questions, passing exam is easy for you. Salesforce Plat-Dev-210 exam cram PDF will be the right shortcut for your exam.

Salesforce Certified Omnistudio Developer Sample Questions (Q97-Q102):

NEW QUESTION # 97

In an Integration Procedure, a developer needs to perform a multi-step calculation on every element of an array. Based on best practices, what two methods are recommended?

Choose 2 answers

- **A. Use a Matrix Action to call a Calculation Matrix.**
- **B. Use a Calculation Action to call a Calculation Procedure.**
- C. Use a List Action to merge the array elements together.
- D. Use a Set Values Element inside a Loop Block.

Answer: A,B

Explanation:

According to the Integration Procedure Actions page, a Calculation Action can be used to "call a Calculation Procedure that performs calculations on input data" and a Matrix Action can be used to "call a Calculation Matrix that performs calculations on input data".

NEW QUESTION # 98

A developer needs to limit the of a DataRaptorExtract to a maximum of one result. How should the developer configure this?

- A. Use a Custom Output Type when creating the DataRaptor
- **B. Use the LIMIT filter on the Extract definition**
- C. Define a formula with the Filter function
- D. Set the Limit Property on the Action that calls the DataRaptor Extract.

Answer: B

Explanation:

Using the LIMIT filter on the Extract definition allows the developer to specify the maximum number of results to return from the DataRaptor Extract. Defining a formula with the Filter function is used to filter the results based on a condition. Using a Custom Output Type when creating the DataRaptor is used to define the structure of the output data. Setting the Limit Property on the Action that calls the DataRaptor Extract has no effect on limiting the results.

NEW QUESTION # 99

A developer needs to transform contact data into a JSON array.

Given the input JSON shown above, what are two ways a developer could configure a DATA Raptor transform to achieve the expected Output JSON? Choose 2 answers

- A. Set the Input JSON Path as Contact the out JSON Path as Contact and the output Data type as List.
- B. Use a formula LIST(Contact), and add the output of the formula as the input in the Transform tab.
- C. Set the input JSON Path as Contact and the OutPut JSON Path as List (Contact)
- D. Set the Input JSON path as List(Contact) and the Output JSON Path as Contact.

Answer: A,B

Explanation:

A DataRaptor Transform can be used to transform data from one format to another, such as JSON, XML, or CSV. The developer can specify the input and output paths for each field in the Transform tab. The developer can also use formulas to manipulate data in the Formula tab1. To transform contact data into a JSON array, the developer can use either of these methods:

* Use a formula LIST(Contact), and add the output of the formula as the input in the Transform tab. This will create a list of contact objects from the input JSON and output it as a JSON array.

* Set the Input JSON Path as Contact, the Output JSON Path as Contact, and the Output Data Type as List. This will output each contact object as an element of a JSON array.

NEW QUESTION # 100

A developer builds a new OmniScript. It contains aSet Values element with a ContextId key/value pair that was used during testing. What should the developer do before moving the OmniScript to a production org?

- A. Delete or Deactivate the Set Values element.
- B. Deactivate the contextId key/value pair
- C. Update the ContextId value to specify an id from the Production org.
- D. Add a Show/Hide condition on the Set Values element.

Answer: A

Explanation:

The Set Values element with a ContextId key/value pair was used for testing purposes and is not needed for production. The developer should delete or deactivate the Set Values element before moving the OmniScript to a production org.

NEW QUESTION # 101

An integration Procedure uses an HTTP action to makea REST API call. The response from the REST API must be converted into a specific XML structure before sending it as an input to another external wen service.

How should the developer configure the Integration Procedure to meet this requirement?

- A. Use a DataRaptor Transform to convert JSON to XML
- B. Use a DataRaptor Extract and check the XML checkbox on the Output JSON Path.
- C. Use a Remote Action that calls the XMLStreamWriter class
- D. Use a Remote Action that calls the XMLStreamReader class

Answer: A

Explanation:

According to the OmniStudio Developer Guide, "DataRaptor Transform actions can convert JSON to XML and vice versa." Therefore, the correct answer is C.

NEW QUESTION # 102

.....

First and foremost, you can get the latest version of our Plat-Dev-210 study materials for free during the whole year. Second, our

responsible after sale service staffs are available in twenty four hours a day, seven days a week, so if you have any problem after purchasing Plat-Dev-210 study materials, you can contact our after sale service staffs on our Plat-Dev-210 Study Guide at any time. Last but not least, we have installed the most advanced operation machines in our website, so the most effective and the latest Plat-Dev-210 study materials is right here waiting for you.
