NSE8_812 Review Guide & Fortinet NSE8_812 Reliable Exam Price: Fortinet NSE 8 - Written Exam (NSE8_812) Exam Pass Once Try

PracticeTorrent NSE8_812 exam certification training materials is not only the foundation for you to succeed, but also can help you play a more effective role in the IT industry. With efforts for years, the passing rate of PracticeTorrent NSE8_812 Certification Exam has reached as high as 100%. If you failed NSE8_812 exam with our NSE8_812 exam dumps, we will give a full refund unconditionally.

Fortinet NSE 8 - Written Exam (NSE8_812) Sample Questions (Q90-Q95):

NEW QUESTION # 90

Refer to the exhibit.

The Company Corp administrator has enabled Workflow mode in FortiManager and has assigned approval roles to the current administrators. However, workflow approval does not function as expected. The CTO is currently unable to approve submitted changes.

Given the exhibit, which two possible solutions will resolve the workflow approval problems with the Workflow_72 ADOM? (Choose two.)

- A. The CTO and CISO need to swap Approval Groups so that the highest authority is in Group #1.
- **B. The CTO must have Standard access level or higher for FortiManager.**
- C. The CTO needs to be added to "Email Notification" in the Workflow_72 ADOM.
- **D. The CTO must have a defined email address for their admin user account.**
- E. The CISO must have a higher access level than "Read_Only_User" in FortiManager.

Answer: B,D

NEW QUESTION # 91

An administrator discovers that CPU utilization of a FortiGate-200F is high and determines that no traffic is being accelerated by hardware.

Why is no traffic being accelerated by hardware?

- A. strict-dirty-session-check is enabled in global config.
- **B. check-protocol-header is set to strict in the global config.**
- C. delay-tcp-npu-session is enabled under the firewall policy.
- D. Oper-session-accounting is enabled under np6x-lite config.

Answer: B

NEW QUESTION # 92

Which two methods are supported for importing user defined Lookup Table Data into the FortiSIEM? (Choose two.)

- A. SCP
- B. Report
- **C. FTP**
- **D. API**

Answer: C,D

Explanation:

User defined Lookup Table Data (LTD) is a feature that allows users to import custom data into FortiSIEM for correlation, reporting, and analysis purposes. Users can create LTD files in CSV format and import them into FortiSIEM using two methods: FTP or API. FTP is a file transfer protocol that allows users to upload LTD files to a designated folder on the FortiSIEM server. API is an application programming interface that allows users to send HTTP requests to upload LTD files to FortiSIEM using RESTful web services. Reference: <https://docs.fortinet.com/document/fortisiem/6.4.0/administration-guide/19662/user-defined-lookup-table-data>

NEW QUESTION # 93

Refer to the exhibit showing an SD-WAN configuration.

According to the exhibit, if an internal user pings 10.1.100.2 and 10.1.100.22 from subnet 172.16.205.0/24, which outgoing interfaces will be used?

- A. port1 and port15
- **B. port16 and port1**
- C. port1 and port1
- D. port16 and port15

Answer: B

Explanation:

According to the exhibit, the SD-WAN configuration has two rules: one for traffic to 10.1.100.0/24 subnet, and one for traffic to 10.1.100.16/28 subnet. The first rule uses the best quality strategy, which selects the SD-WAN member with the best measured quality based on performance SLA metrics. The second rule uses the manual strategy, which specifies port1 as the SD-WAN member to select. Therefore, if an internal user pings 10.1.100.2 and 10.1.100.22 from subnet 172.16.205.0/24, the outgoing interfaces will be port16 and port1 respectively, assuming that port16 has the best quality among the SD-WAN members.

Reference: <https://docs.fortinet.com/document/fortigate/6.2.14/cookbook/218559/configuring-the-sd-wan-interface>

NEW QUESTION # 94

Refer to the exhibit that shows VPN debugging output.

The VPN tunnel between headquarters and the branch office is not being established.

What is causing the problem?

- A. There is a mismatch in the ISAKMP SA lifetime.
- B. The Phase-1 encryption algorithms are not matching.
- C. HQ is using IKE v1 and the branch office is using with IKE v2.
- D. There is no matching Diffie-Hellman Group.

Answer: B
