

Associate-Google-Workspace-Administrator Zertifizierungsantworten & Associate-Google- Workspace-Administrator Lerntipps

2026 Die neuesten EchteFrage Associate-Google-Workspace-Administrator PDF-Versionen Prüfungsfragen und Associate-Google-Workspace-Administrator Fragen und Antworten sind kostenlos verfügbar: <https://drive.google.com/open?id=13WhsuRV43P1IimPIRNiW1pN8pmZ7-RGP>

Die Fragen zur Google Associate-Google-Workspace-Administrator Zertifizierungsprüfung von EchteFrage sind die gründlichste, die genaueste und die neueste Praxistest. Sie werden Selbstbewusstsein finden, die Schwierigkeiten beim ersten Versuch zu überwinden. Die Google Associate-Google-Workspace-Administrator Zertifizierungsprüfung wird von allen Ländern akzeptiert. Alle Länder werden sie gleich behandeln. Das Google Associate-Google-Workspace-Administrator Zertifikat wird Ihnen nicht nur helfen, Ihre Fachkenntnisse und Fähigkeiten zu verbessern, sondern auch mehrere berufliche Chancen zu erhalten.

Google Associate-Google-Workspace-Administrator Prüfungsplan:

Thema	Einzelheiten
Thema 1	• Configuring Services: This section of the exam evaluates the expertise of IT Systems Engineers and emphasizes configuring Google Workspace services according to corporate policies. It involves assigning permissions, setting up organizational units (OUs), managing application and security settings, and delegating Identity and Access Management (IAM) roles. The section also covers creating data compliance rules, applying Drive labels for data organization, and setting up feature releases such as Rapid or Scheduled Release. Candidates must demonstrate knowledge of security configurations for Google Cloud Marketplace applications and implement content compliance and security integration protocols. Furthermore, it includes configuring Gmail settings such as routing, spam control, email delegation, and archiving to ensure communication security and policy alignment across the organization.
Thema 2	• Managing Objects: This section of the exam measures the skills of Google Workspace Administrators and covers the management of user accounts, shared drives, calendars, and groups within an organization. It assesses the ability to handle account lifecycles through provisioning and deprovisioning processes, transferring ownership, managing roles, and applying security measures when access needs to be revoked. Candidates must understand how to configure Google Cloud Directory Sync (GCDS) for synchronizing user data, perform audits, and interpret logs. Additionally, it tests knowledge of managing Google Drive permissions, lifecycle management of shared drives, and implementing security best practices. The section also focuses on configuring and troubleshooting Google Calendar and Groups for Business, ensuring proper access control, resource management, and the automation of group-related tasks using APIs and Apps Script.

Thema 3	• Data Access and Authentication: This section of the exam evaluates the capabilities of Security Administrators and focuses on configuring policies that secure organizational data across devices and applications. It includes setting up Chrome and Windows device management, implementing context-aware access, and enabling endpoint verification. The section assesses the ability to configure Gmail Data Loss Prevention (DLP) and Access Control Lists (ACLs) to prevent data leaks and enforce governance policies. Candidates must demonstrate an understanding of configuring secure collaboration settings on Drive, managing client-side encryption, and restricting external sharing. It also covers managing third-party applications by controlling permissions, approving Marketplace add-ons, and deploying apps securely within organizational units. Lastly, this section measures the ability to configure user authentication methods, such as two-step verification, SSO integration, and session controls, ensuring alignment with corporate security standards and compliance requirements.
Thema 4	• Supporting Business Initiatives: This section of the exam measures the skills of Enterprise Data Managers and covers the use of Google Workspace tools to support legal, reporting, and data management initiatives. It assesses the ability to configure Google Vault for retention rules, legal holds, and audits, ensuring compliance with legal and organizational data policies. The section also involves generating and interpreting user adoption and usage reports, analyzing alerts, monitoring service outages, and using BigQuery to derive actionable insights from activity logs. Furthermore, candidates are evaluated on their proficiency in supporting data import and export tasks, including onboarding and offboarding processes, migrating Gmail data, and exporting Google Workspace content to other platforms.
Thema 5	• Troubleshooting: This section of the exam measures the skills of Technical Support Specialists and focuses on identifying, diagnosing, and resolving issues within Google Workspace services. It tests the ability to troubleshoot mail delivery problems, interpret message headers, analyze audit logs, and determine root causes of communication failures. Candidates are expected to collect relevant logs and documentation for support escalation and identify known issues. The section also evaluates knowledge in detecting and mitigating basic email attacks such as phishing, spam, or spoofing, using Gmail security settings and compliance tools. Additionally, it assesses troubleshooting skills for Google Workspace access, performance, and authentication issues across different devices and applications, including Google Meet and Jamboard, while maintaining service continuity and network reliability.

Wenn Sie Anfänger sind oder Ihre beruflichen Fertigkeiten verbessern wollen, wird EchteFrage Ihnen helfen, Ihrem Traum Schritt für Schritt zu ernähern. Wenn Sie Fragen haben, werden wir Ihnen sofort helfen. Innerhalb eines Jahres bieten wir kostenlosen Update-Service.

Google Associate Google Workspace Administrator Associate-Google-Workspace-Administrator Prüfungsfragen mit Lösungen (Q102-Q107):

102. Frage

An employee is leaving your company and has numerous files stored in My Drive. Their manager wants to retain access to these files. You need to offboard the departing employee's Google Workspace account while ensuring that the manager can still access the files while following Google-recommended practices. What should you do?

- **A. Transfer ownership of the departing employee's files to the manager during the user deletion process.**
- B. Use Google Vault to establish a retention policy for the organizational unit (OU) of the departing employee. Assign the Google Archived User license.
- C. Instruct the departing employee to share their My Drive folder with the manager before leaving. Delete the Google Workspace account on the departing employee's last day.
- D. Download the departing employee's Drive data by using Google Takeout. Upload the data to the manager's Drive before deleting the departing employee's Google Workspace account.

Antwort: A

Begründung:

Transferring ownership of the departing employee's files to the manager ensures that the manager retains access to all the files, including those stored in My Drive, without requiring additional steps like downloading or sharing files. This method follows Google-recommended practices and ensures that the files remain under proper management even after the employee's account is deleted. This process can be done efficiently during the offboarding process to ensure continuity of access.

103. Frage

Your organization uses live-streaming to host large Google Meet meetings. You need to limit the participation to affiliated Google Workspace domains by using the Admin console. What should you do?

- A. Turn off live streaming to Youtube.
- B. Add the Trusted Workspace domain names in the Stream dialog box.
- C. Turn on in-house live streaming. Invite users from affiliated domains.
- **D. Add participants to an organizational unit (OU). Turn on live streaming.**

Antwort: D

Begründung:

By organizing participants into an organizational unit (OU) in the Admin console, you can control access to live streaming and ensure that only users from affiliated Google Workspace domains are allowed to participate in the live-streamed meetings. Turning on live streaming within this context will ensure that the meeting is restricted to the appropriate participants from the specified domains.

104. Frage

Your company's security team should be able to investigate unauthorized external file sharing. You need to ensure that the security team can use the security investigation tool and you must follow the principle of least privilege. What should you do?

- A. Grant the super admin role to a delegate from the security team.
- **B. Create a custom admin role with security center privileges. Assign the role to the individual security team members.**
- C. Share the Drive audit log with the security team.
- D. Create a pre-built reporting role. Assign the role to the security team alias.

Antwort: B

Begründung:

By creating a custom admin role with security center privileges, you can ensure that the security team has the necessary access to investigate unauthorized external file sharing while adhering to the principle of least privilege. This approach provides the security team with the specific permissions they need without granting unnecessary broader privileges, such as those associated with the super admin role.

105. Frage

You work for a healthcare provider that uses an external medical billing company to manage patient records and invoices. Your organization's employees need to share patient documents with the billing company's employees for processing. You need to configure access so the medical billing company's employees can view and edit the documents, but they cannot delete the documents. What should you do?

- **A. Create a shared drive that is managed by your organization's employees. Grant Contributor access to the billing company's staff.**
- B. Restrict access for the medical billing company's employees by using Data Loss Prevention (DLP) policies.
- C. Create a shared drive. Grant Content Manager access to your organization's employees and the billing company.
- D. Create a group, and add the employees from your organization and the billing company. Create a shared folder on Google Drive. Grant Editor access to the group

Antwort: A

Begründung:

Creating a shared drive and granting Contributor access to the billing company's staff allows them to view and edit documents, but

not delete them. This is the most suitable approach because it ensures that only your organization's employees manage the overall shared drive, while still allowing external users to collaborate on documents without compromising their integrity by preventing deletion. The shared drive structure also offers better control over document permissions compared to shared folders.

106. Frage

Your organization has hired temporary employees to work on a sensitive internal project. You need to ensure that the sensitive project data in Google Drive is limited to only internal domain sharing. You do not want to be overly restrictive. What should you do?

- A. Restrict the Drive sharing options for the domain to allowlisted domains.
- B. Create a Drive DLP rule, and use the sensitive internal Project name as the detector.
- C. Turn off the Drive sharing setting from the Team dashboard.
- **D. Configure the Drive sharing options for the domain to internal only.**

Antwort: D

Begründung:

By configuring the Drive sharing options for your domain to "internal only," you ensure that sensitive project data is restricted to your organization's internal users. This prevents any external sharing while allowing your team members to collaborate freely within the organization. It strikes the right balance between maintaining security and avoiding unnecessary restrictions on collaboration.
