## ServiceNow Certified Implementation Specialist - Strategic Portfolio Management Sample Questions (Q50-Q55):

### NEW QUESTION # 50

A user's availability is calculated as:

- A. Allocated hours divided by the total capacity
- B. Capacity minus allocation
- C. Sum of allocated and confirmed hours, divided by the total capacity
- D. Allocated time

**Answer: A**

Explanation:

According to the ServiceNow documentation<sup>1</sup>, a user's availability is calculated as the ratio of allocated hours to total capacity, expressed as a percentage. Allocated hours are the hours that a user is assigned to work on a project or demand. Total capacity is the maximum number of hours that a user can work in a given period, based on their schedule and availability profile. A user's availability indicates how much of their time is already allocated and how much is still available for new assignments.

### NEW QUESTION # 53

To set up a group for selection in a resource plan, the group record needs to include which role?

- A. pps\_resource
- B. itil

- C. it\_project\_user
- D. resource\_manager

**Answer: A**

Explanation:

Explanation

According to the Assigning Resource Roles document, to set up a group for selection in a resource plan, the group record needs to include the pps\_resource role. This role grants access to the Resource Management application and allows the group members to view and update their resource allocations. The other options are not correct, as they are not required for a group to be selected in a resource plan. The it\_project\_user role grants access to the Project Portfolio Management application and allows the user to create and update projects. The itil role grants access to the ITIL application and allows the user to manage incidents, problems, and changes. The resource\_manager role grants access to the Resource Management application and allows the user to manage resource plans and allocations.
