Individuals who hold this certification can demonstrate their expertise in creating custom applications on the Salesforce platform, which is a valuable skill in today's digital economy. Additionally, this certification is a great way to differentiate yourself from other professionals in the Salesforce ecosystem and stand out to potential employers.

Salesforce Certified Platform App Builder Sample Questions (Q228-Q233):

NEW QUESTION # 228

An App Builder has been asked to integrate Salesforce with an external web service. The web service must be notified every time an Opportunity is Won. Which two can satisfy this requirement?

- A. Use a process and an outbound message
- **B. Use a process and Apex Code**
- C. Use a flow and an outbound message
- **D. Use a workflow rule and an outbound message**

Answer: B,D

NEW QUESTION # 229

An app builder wants to update a field on the parent record when a child record connected via lookup is deleted. What automation should the app builder use?

- **A. Apex code**
- B. Workflow rule
- C. Screen flow
- D. Process Builder

Answer: A

NEW QUESTION # 230

Representatives at Cloud Kicks use Salesforce to record information for new Leads. When new prospects are added, an outbound message is sent to the data warehouse with the Lead's information.

What automation tool should an app builder use to meet this requirement?

- A. Use Lightning Flow to send an outbound message.
- B. Design an approval process that sends an outbound message.
- C. Create a process using Process Builder to send an outbound message.
- **D. Create a workflow rule with an outbound message as the action.**

Answer: D

NEW QUESTION # 231

An app builder is tasked with adding key performance indicators on client pages. They want to see a summary of the number of open Opportunities and the number of won Opportunities for each Account.

Where should the app builder go to build these new rollups?

- A. Lightning Object Creator
- B. Opportunity Object
- C. Lightning App Builder
- **D. Account Object**

Answer: D

Explanation:

The app builder should go to the Account object to build these new rollups. A roll-up summary field is a type of field that can aggregate numeric values from child records related to a parent record by a master-detail relationship. The app builder can create two roll-up summary fields on the Account object that count the number of open Opportunities and the number of won Opportunities related to each Account. Lightning App Builder is not a place where the app builder can build these new rollups. Lightning App Builder is a tool that allows the app builder to customize the layout and components of Lightning pages, such as record pages, home pages, or app pages. It cannot create new fields or relationships on objects. Lightning Object Creator is not a place where the app builder can build these new rollups. Lightning Object Creator is a tool that allows the app builder to create custom objects from spreadsheet data by uploading a file and mapping columns to fields. It cannot create roll-up summary fields or relationships on existing objects. Opportunity object is not a place where the app builder can build these new rollups. The Opportunity object is the child object in the relationship with the Account object, and roll-up summary fields can only be created on the parent object.

NEW QUESTION # 232

Cloud Kicks asked the app builder to insert a list of 25,000 records using deduplication for the Race_Track__c custom object. Which tool should be used?

- A. Import Wizard
- B. Schema Builder
- C. Data Loader
- D. Lightning Object Creator

Answer: C

Explanation:

Explanation

To insert a list of 25,000 records using deduplication for the Race_Track__c custom object, an app builder should use Data Loader. Data Loader is a tool that allows users to insert, update, delete, or export large amounts of data in Salesforce. Data Loader can also perform deduplication by matching records based on external ID fields or Salesforce record IDs. [Source]
