IT업계 종사자라면 누구나 SAP 인증 C_CPI_2506 시험을 패스하고 싶어하리라고 믿습니다. 많은 분들이 이렇게 좋은 인증 시험은 아주 어렵다고 생각합니다. 네 맞습니다. 패스할 확률은 아주 낮습니다. 노력하지 않고야 당연히 불가능한 일이 아니겠습니까? SAP 인증 C_CPI_2506 시험은 기초 지식 그리고 능숙한 전업 지식이 필요 합니다. Itcertkr는 여러분들한테 SAP 인증 C_CPI_2506 시험을 쉽게 빨리 패스할 수 있도록 도와주는 사이트입니다. Itcertkr의 SAP 인증 C_CPI_2506 시험 관련 자료로 여러분은 짧은 시간 내에 간단하게 시험을 패스할 수 있습니다. 시간도 절약하고 돈도 적게 들이는 이런 제안은 여러분들한테 딱 좋은 해결책이라고 봅니다.

SAP C_CPI_2506 시험요강:

주제	소개
주제 1	<ul style="list-style-type: none">SAP Event Mesh: This section of the exam measures the skills of Solution Architects and centers on using SAP Event Mesh to support event-driven integration. It highlights the importance of asynchronous communication, event publishing, and subscription models, allowing organizations to build scalable and decoupled systems.

주제 2	<ul style="list-style-type: none"> Managing APIs: This section of the exam measures the skills of Solution Architects and focuses on managing APIs within the SAP ecosystem. It covers topics such as API provisioning, lifecycle management, security policies, and monitoring, ensuring candidates can handle APIs effectively for enterprise integration needs.
주제 3	<ul style="list-style-type: none"> Implementing Cloud Integration: This section of the exam measures the skills of Integration Consultants and examines how cloud integration flows are designed and deployed. It emphasizes creating integration scenarios, handling connectivity, and applying best practices to build efficient, secure, and reliable integration processes in SAP's cloud environment.
주제 4	<ul style="list-style-type: none"> SAP Integration Suite Overview: This section of the exam measures the skills of Integration Consultants and covers the foundational concepts of the SAP Integration Suite. It provides an understanding of the suite's capabilities, its role in connecting applications, and its relevance in modern cloud-based integration scenarios.

C_CPI_2506 100% 시험패스 덤프자료 - C_CPI_2506 높은 통과율 시험덤프

Itcertkr에서는 소프트웨어버전과 PDF버전 두가지버전으로 덤프를 제공해드립니다. PDF버전은 구매사이트에서 무료샘플을 다운받아 체험가능합니다. 소프트웨어버전은 실력테스트용으로 PDF버전공부후 보조용으로 사용가능합니다. SAP 인증C_CPI_2506덤프 무료샘플을 다운받아 체험해보세요.

최신 SAP Certified Associate C_CPI_2506 무료샘플문제 (Q42-Q47):

질문 # 42

You want to build an architecture that is largely asynchronous. Which design do you use to exchange notifications between the partners involved?

- A. Serverless design
- B. Request-driven design
- C. Hexagonal design
- D. Event-driven design

정답: D

설명:

You can use an OData adapter to implement a synchronous call to a remote HTTP API as an integration flow component. An OData adapter allows you to send and receive messages using the OData protocol. OData stands for Open Data Protocol and is a standard for exposing and consuming data over HTTP or HTTPS. You can use an OData adapter to communicate with OData services that support CRUD (Create, Read, Update, Delete) operations on resources. Reference: Integration Software | SAP Integration Suite, Modernize Integration with SAP Integration Suite | openSAP

질문 # 43

You have set up a basic authentication policy, but the API proxy returns an HTTP status of 401. What could be a reason?

- A. In the AssignMessage policy, the Assign To tag has the type="preFlow"
- B. In the AssignMessage policy, the Assign To tag has the type="postFlow"
- C. In the AssignMessage policy, the Assign To tag has the type="request"
- D. In the AssignMessage policy, the Assign To tag has the type="response"

정답: C

설명:

In API Management (SAP Integration Suite), when implementing Basic Authentication policies:

If the AssignMessage policy does not correctly assign credentials to the request message, authentication will fail. This results in HTTP 401 Unauthorized.

Other tags like preFlow, postFlow, response are policy flow phases, but the credentials must be applied to the request for proper authentication.

Thus, the root cause is when the Assign To = request is missing/misconfigured.

질문 # 44

Why does the API Management capability of the SAP Integration Suite require API providers?

- A. To create APIs
- **B. To incorporate APIs from source systems**
- C. To create authenticated API instances

정답: B

설명:

The API Management capability of the SAP Integration Suite requires API providers to incorporate APIs from source systems. An API provider is a system or application that exposes the interface and functionality of an API. The API Management capability allows you to connect to different types of API providers, such as OData, SOAP, REST, or RFC, and manage their lifecycle, security, and consumption. Reference: Integration Software | SAP Integration Suite, Modernize Integration with SAP Integration Suite | openSAP

질문 # 45

You want to send messages over an SOAP adapter to an integration flow. Which method do you use to send the messages?

- A. GET
- B. UPDATE
- C. PATCH
- **D. POST**

정답: D

설명:

When sending messages to an integration flow via SOAP adapter:

The request follows standard SOAP protocol semantics.

Messages are sent using HTTP POST, since SOAP messages are enclosed in an XML envelope carried in the HTTP request body. GET, UPDATE, PATCH are not applicable for SOAP operations.

Thus, the correct method is POST.

질문 # 46

In a Content Modifier, you want to set up a call to the message body of the previous Content Modifier. Which notation do you use to implement this?

- A. S{body.in}
- B. S[bodyin]
- **C. S{in body}**
- D. S(inbody)

정답: C

설명:

To access the message body of the previous Content Modifier step in an integration flow, you must use the notation S{in body} in the current Content Modifier step. This notation means that you want to read the value from the in-message body of the exchange container. The exchange container is used to store additional data besides the message that is being processed by SAP Integration Suite. It has two message containers: in-message and out-message. The in-message contains the original message that was received by the integration flow, while the out-message contains the modified message that will be sent by the integration flow. Reference: Content Modifier Basics | SAP Help Portal, Exchange Container | SAP Help Portal
