

2026 Marvelous NS0-528: Implementation Engineer - Data Protection Exam Exam Brain Dumps

2026 Latest Free4Torrent NS0-528 PDF Dumps and NS0-528 Exam Engine Free Share: <https://drive.google.com/open?id=1k0AA1bhKSyOucKyDfPu58RdTkItQGJjk>

This product is enough to get ready for the NS0-528 test on the first attempt. Three formats are easy to use and meet the needs of every Implementation Engineer - Data Protection Exam (NS0-528) test applicant. The Network Appliance NS0-528 practice material's three formats are Desktop practice test software, web-based practice exam, and PDF.

Network Appliance NS0-528 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> NetApp ONTAP Business Continuity Solutions: This section of the exam measures the skills of Disaster Recovery Specialists and covers advanced business continuity technologies. This includes the configuration and operation of SnapMirror active sync for continuous data replication and the execution of SVM-DR (Storage Virtual Machine Disaster Recovery) operations to ensure high availability.
Topic 2	<ul style="list-style-type: none"> Data Protection Solutions: This section of the exam measures the skills of Storage Architects and covers the foundational principles of designing data protection solutions. It focuses on creating comprehensive design documentation, understanding the various components involved, and identifying all critical solution dependencies to ensure a robust and reliable data protection strategy.
Topic 3	<ul style="list-style-type: none"> Troubleshooting and Testing: This section of the exam measures the skills of Support Engineers and focuses on the practical skills needed to maintain data integrity. It involves troubleshooting common data protection configuration issues, executing well-defined Disaster Recovery (DR) procedures, and performing data restore operations to recover from data loss.
Topic 4	<ul style="list-style-type: none"> NetApp Data Protection Software: This section of the exam measures the skills of DevOps Engineers and focuses on the deployment and administration of NetApp's proprietary data protection software. A key part of this domain involves applying these solutions to protect modern containerized applications running in Kubernetes environments.
Topic 5	<ul style="list-style-type: none"> NetApp ONTAP Core Data Protection Features: This section of the exam measures the skills of Systems Administrators and validates core knowledge of data protection and redundancy within the ONTAP environment. It encompasses understanding how data efficiencies impact protection strategies and the practical knowledge required to deploy these data protection solutions effectively in a hybrid cloud infrastructure.

Valid Brindumps NS0-528 Questions & Reliable NS0-528 Dumps Free

Before you take the exam, you only need to spend 20 to 30 hours to practice, so you can schedule time to balance learning and other things. Of course, you care more about your passing rate. We will provide you with three different versions. The PDF version allows you to download our NS0-528 quiz prep. After you download the PDF version of our learning material, you can print it out. In this way, even if you do not have a computer, you can learn our NS0-528 Quiz prep. We believe that it will be more convenient for you to take notes. Our website is a very safe and regular platform. You can download our NS0-528 exam guide with assurance. You can take full advantage of the fragmented time to learn, and eventually pass the authorization of NS0-528 exam.

Network Appliance Implementation Engineer - Data Protection Exam Sample Questions (Q109-Q114):

NEW QUESTION # 109

You want to use a Fabric Pool to store destination SnapMirror data to an external capacity tier. Which tiering policy would be used in this scenario?

- A. snapshot-only
- B. auto
- C. backup
- D. none

Answer: C

NEW QUESTION # 110

Your customer wants to use tamper-proof Snapshot copies on a SnapMirror destination volume only. You successfully created a SnapMirror relationship using a SnapMirror policy that contains the following rules:

Rules:

SnapMirror Label	Keep	Preserve	Warn	Schedule	Prefix	Retention Period
sm_created	1	false		-	-	-
hourly	5	false	0	-	-	-
daily	5	false				5days

After initializing, you are able to delete a daily Snapshot copy.

Which command did you need to modify to enable the tamper-proof Snapshot copies as specified in the policy?

- A. volume modify -snapshot-locking-enabled
- B. vserver modify -snapshot-policy
- C. volume snaplock modify -privileged-delete
- D. volume snapshot modify -expiry-time

Answer: A

Explanation:

Although the SnapMirror policy includes rules for retaining Snapshot copies, the ability to make them tamper-proof (i.e., locked) depends on enabling snapshot locking on the destination volume. You must explicitly run:

```
volume modify -volume <vol_name> -snapshot-locking-enabled true
```

Without this setting, SnapMirror-created Snapshot copies can still be deleted manually. Enabling snapshot-locking ensures that retention rules (like the 5-day daily rule in your policy) are enforced and Snapshots are immutable.

NEW QUESTION # 111

An administrator needs to maintain 10 snapshots per volume on a NetApp AFF system and replicate to a destination with a snapshot retention of 120.

Which NetApp feature should the administrator use?

- A. SnapMirror
- B. XCP
- C. MetroCluster
- D. SnapMirror active sync

Answer: A

Explanation:

SnapMirror supports asymmetric snapshot retention, allowing the source volume (on the AFF system) to retain 10 snapshots while the destination retains up to 120 snapshots. This is useful for long-term retention or compliance at the destination without consuming extra capacity on the source.

NEW QUESTION # 112

You want to set up SnapLock to meet regulatory requirements and to help safeguard the authenticity of the archived data. In this scenario, which two statements are correct? (Choose two.)

- A. SnapLock Compliance and SnapLock Enterprise use different licenses to enable SnapLock functionality.
- B. A SnapLock license is deployed at a cluster level and not required for every node.
- C. Only a single SnapLock license is required to use both SnapLock Compliance and SnapLock Enterprise functionality.
- D. All nodes in a cluster must have the SnapLock license for the cluster to be compliant.

Answer: C,D

NEW QUESTION # 113

You are upgrading your Data ONTAP cluster from clustered Data ONTAP 8.3 to clustered Data ONTAP 9.1. Which two actions must be performed for the SnapMirror relationships? (Choose two.)

- A. After the upgrade, resynchronize, and resume SnapMirror relationships.
- B. Delete and re-create SnapMirror relationships.
- C. Delete the obsolete SnapMirror Snapshot copies which were created in Data ONTAP 8.3.
- D. Break existing SnapMirror relationships.

Answer: A,D

NEW QUESTION # 114

.....

Let me be clear here a core value problem of Free4Torrent. All Network Appliance exams are very important. In this era of rapid development of information technology, Free4Torrent just one of the questions providers. Why do most people to choose Free4Torrent ? Because the Free4Torrent exam information will be able to help you pass the test. It provides the information which is up to date. With Free4Torrent Network Appliance NS0-528 Test Questions, you will become full of confidence and not have to worry about the exam. However, it lets you get certified effortlessly.
