account
container
database
item

Answer:

Explanation:

When provisioning an Azure Cosmos DB  , you need to specify which type of API you will use.

account
container
database
item

Explanation

Table Description automatically generated

When provisioning an Azure Cosmos DB  , you need to specify which type of API you will use.

account
container
database
item

NEW QUESTION # 50

Match the types of workloads to the appropriate scenarios.

To answer, drag the appropriate workload type from the column on the left to its scenario on the right. Each workload type may be used once, more than once, or not at all.

NOTE: Each correct match is worth one point.

Workload Types	Answer Area						
	<table border="1"><tr><td>Workload Type</td><td>Analyzing web traffic from the past year</td></tr><tr><td>Workload Type</td><td>Classifying images that were uploaded last month</td></tr><tr><td>Workload Type</td><td>Tracking how many people are currently using a website</td></tr></table>	Workload Type	Analyzing web traffic from the past year	Workload Type	Classifying images that were uploaded last month	Workload Type	Tracking how many people are currently using a website
Workload Type	Analyzing web traffic from the past year						
Workload Type	Classifying images that were uploaded last month						
Workload Type	Tracking how many people are currently using a website						
							

Answer:

Explanation:

Workload Types	Answer Area						
	<table border="1"><tr><td>Batch</td><td>Analyzing web traffic from the past year</td></tr><tr><td>Batch</td><td>Classifying images that were uploaded last month</td></tr><tr><td>Streaming</td><td>Tracking how many people are currently using a website</td></tr></table>	Batch	Analyzing web traffic from the past year	Batch	Classifying images that were uploaded last month	Streaming	Tracking how many people are currently using a website
Batch	Analyzing web traffic from the past year						
Batch	Classifying images that were uploaded last month						
Streaming	Tracking how many people are currently using a website						
							

NEW QUESTION # 51

Hotspot Question

To complete the sentence, select the appropriate option in the answer area.

Answer Area

Relational data uses to enforce relationships between different tables.

collections
columns
keys
partitions

Answer:

Explanation:

Answer Area

Relational data uses to enforce relationships between different tables.

collections
columns
keys
partitions

Explanation:

<https://teachcomputerscience.com/relational-databases/>

NEW QUESTION # 52

Select the answer that correctly completes the sentence.

Answer Area

A block of code that runs in a database is called

Answer:

Explanation:

Answer Area

A block of code that runs in a database is called

a stored procedure.

NEW QUESTION # 53

Select the answer that correctly completes the sentence.

Answer:

Explanation:

See the answer below:

Explanation

Answer as below.

Answer Area

A key/value data store is optimized for

simple lookups.
