NEW QUESTION # 22

Refer to the exhibit. An organization must inspect all the endpoint internet traffic on FortiSASE, and exclude Google Maps traffic

from the FortiSASE VPN tunnel and redirect it to the endpoint physical interface.
Which configuration must you apply to achieve this requirement?

- A. Add the Google Maps URL in the zero trust network access (ZTNA) TCP access proxy forwarding rule.
- B. Exempt Google Maps in URL filtering in the web filter profile.
- C. Configure a steering bypass tunnel firewall policy using Google Maps FQDN to exclude and redirect the traffic.
- **D. Add the Google Maps URL as a steering bypass destination in the endpoint profile.**

Answer: D

Explanation:

To exclude specific internet traffic (such as Google Maps) from being tunneled through FortiSASE and instead direct it out the local endpoint interface, you must configure it as a steering bypass destination in the FortiClient endpoint profile. This ensures traffic matching the URL bypasses the FortiSASE tunnel.
