Microsoft Power BI Data Analyst Sample Questions (Q71-Q76):

NEW QUESTION # 71

You are building a data model for a Power BI report. You have data formatted as shown in the following table.

Machine-User	DownloadMB
ABC-123	
BAC-657	125

You need to create a clustered bar chart as shown in the following exhibit.

What should you do?

- A. From Power Query Editor, create a column that contains the last three digits of the Machine-User column.
- **B. From Power Query Editor, split the Machine-User column by using a delimiter.**
- C. In a DAX function, create two calculated columns named Machine and User by using the substitute function.
- D. in a DAX function, create two measures named Machine and User by using the substitute function.

Answer: B

NEW QUESTION # 72

You need to create a Power BI report. The first page or the report must contain the following two views:

* Sales By Postal Code

* Sales by Month

Both views must display a slicer to select a value for a field named Chain.

The Sales By Postal Code view must display a map visual as shown in the following exhibit.

Answer Area

Answer:

Explanation:

Answer Area

NEW QUESTION # 73

How should you distribute the reports to the board? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Box 1: Using a workspace membership

Scenario:

The company wants to provide a single package of reports to the board that contains custom navigation and links to supplementary information.

Note: Workspace is a shared environment for a group of people. You can have multiple Power BI content in a workspace. One workspace can have hundreds of dashboards, reports, and datasets in it.

Box 2: A mail-enabled security group

Scenario: Security Requirements

The reports must be made available to the board from powerbi.com. A mail-enabled security group will be used to share information with the board.

NEW QUESTION # 74

You attempt to publish a Microsoft Excel file to Power BI, and you receive the error message shown in the exhibit. (Click the Exhibit button.)

The file is in c:\data\.

You need to ensure that you can publish the file to Power BI.

What should you do first?

- A. Set the file attributes to read-only.
- B. Save the file in a Microsoft SharePoint document library.
- C. Add a digital signature to the workbook.
- **D. Decrypt the workbook.**

Answer: D

Explanation:

<https://docs.microsoft.com/en-us/power-bi/service-publish-from-excel>

NEW QUESTION # 75

You have a Power BI report.

You have a table named Dalai that contains 10 million rows. Data is used in the following visuals:

- A card that shows the number of records
 - A bar chart that shows total transaction amount by territory
 - A scatter plot that shows transaction amount and profit amount on the axes and points colored by territory
- You need to modify the scatter plot to make it easier for users to identify meaningful patterns.

The solution must not affect the accuracy of the other visuals. What should you do?

- A. Apply a row filter to the Dalai query in Power Query Editor.
- B. Add a count field of the transaction amount to the size bucket of the scatter plot
- **C. Add a trend line to the scatter plot**
- D. Enable high-density sampling on the scatter plot

Answer: C

Explanation:

A trend line is a straight line that best represents the points on a scatterplot. The trend line may go through some points but need not go through them all. The trend line is used to show the pattern of the data. This trend line may show a positive trend or a negative trend.
